

**2020-2021 Comprehensive Plan Amendment Docket CPA-4:
2022-2027 Capital Improvement Program – Annual Update
Public Hearing Staff Report**

Date: November 3, 2021

Prepared by: Maya Teeple, Senior Planner

Proponent/Applicant: Thurston County Community Planning & Economic Development

Proposal Description: Annual Comprehensive Plan Amendment to update Appendix G, the Capital Improvement Program (CIP). The CIP is a required part of the capital facilities element under the Growth Management Act.

Action Requested: Repeal Appendix G, 2021-2026 CIP and replace with a new Appendix G, 2022-2027 CIP with all new tables, capital project descriptions, and revenue/expenditure amounts.

Location: Thurston County

APN: N/A

Acres: N/A

Comprehensive Plan Changes: ☐ Map Changes ☒ Text Changes ☐ Both
☐ Development Code Amendments (____)
☒ Affected Jurisdictions (Thurston County)

BACKGROUND

Thurston County annually updates its Capital Improvement Program (CIP), which is a 6-year financing plan of capital facilities. The CIP details the revenue sources and future costs for capital facilities located throughout the County. These capital facilities ensure that infrastructure and facilities are built to support forecast population growth and meet levels of service standards adopted in the Comprehensive Plan. The 2021-2026 CIP will be repealed and replaced in its entirety with a 2022-2027 CIP.

PUBLIC OUTREACH/PARTICIPATION:

CIP documents are posted online at <https://www.thurstoncountywa.gov/planning/Pages/capital-improvements.aspx> for public review. The Transportation Improvement Plan (TIP), which is referenced in the CIP, had a separate public hearing before the Board of County Commissioners

on September 28, 2021. A legal notice and webmail for the CIP update was issued on October 7, 2021. A press release on the CIP update was issued October 22, 2021. After the Planning Commission hearing and recommendation to the BoCC, the CIP will also receive a public hearing before the Board of County Commissioners.

PREVIOUS REVIEW:

The Board of County Commissioners held a preliminary work session on the CIP on July 21, 2021

The Planning Commission held a work session on the CIP update on September 15, 2021. Attachments and other supporting materials for that meeting can be viewed at: <https://www.thurstoncountywa.gov/planning/Pages/pc-meetings.aspx>

SEPA:

An environmental determination for the proposed amendment is required pursuant to WAC 197-11-704. A Determination of Non-Significance was issued on October 15, 2021, and may be reviewed here: <https://www.thurstoncountywa.gov/planning/Pages/capital-improvements.aspx>

PUBLIC COMMENT:

To date, no public comments have been received. Any written comments that are received up until 4PM the day of the hearing will be forwarded to the Planning Commission, and included on the project website.

CHAPTER 1 - INTRODUCTION

The Growth Management Act (GMA) requires Thurston County to maintain a capital facilities element. The Comprehensive Plan includes the 20-year capital facilities plan goals, policies, and objectives, and additional comprehensive plan chapters address specific types of capital facilities and levels of service (see especially Chapters 2, 5, 6, and 7). This Appendix serves as the 6-year financing plan required by GMA (RCW 36.70A.070(3)(d)) for capital facilities necessary to support growth as anticipated in the land use element (Chapter 2). This 6-year plan is called the Capital Improvement Program (CIP). The CIP may be amended when the County amends its budget.

The capital facilities covered by this CIP are primarily those owned or managed by Thurston County government necessary to support growth and development. A summary of the facilities provided by other government entities to support planned growth is also provided. For purposes of the CIP, capital facilities are defined as those projects anticipated to cost \$100,000 or more, with a 10-year life cycle, and anything funded with real estate excise tax (REET) funds or impact fees.

Capital facilities provided by cities, including the extension of water and sewer systems to unincorporated urban growth areas adjacent to the cities, are found in joint plans with cities in Thurston County. The portions of joint plans that apply to unincorporated urban growth areas are adopted by both the applicable city and Thurston County.

Planning for capital facilities is a complex task carried out by each department of the County. It requires an understanding of current conditions relative to future needs, an assessment of various types of capital facilities that could be provided, analysis to identify the most effective and efficient facilities to support the needed service and addressing how these facilities will be financed. This CIP is the product of separate but coordinated planning efforts, each focusing on a specific category of facilities.

The CIP is a planning document. It is not a budget for expenditures, nor a guarantee that the projects will be implemented. It assumes receipt of outside grant resources, and if grants are not received, projects may be delayed or removed. Each capital project listed in the CIP will need to go through a separate environmental review and approval process.

The CIP includes a six-year capital construction and investment program for specific projects. It also includes purchases for public facilities and services by the County. The CIP specifies revenues that will include such capital facilities within projected funding capacities. Part of the function of the CIP is to clearly identify the sources of public money for such purposes. The CIP incorporates by reference the Transportation Improvement Program and its supporting documents. This plan fulfills the county's financial planning responsibilities under the GMA which covers a six-year period, the years 2022-2027. Transportation grants typically require a six-year plan, and this period is one in which the County can address its immediate capital needs.

Summary of revenue sources and expenditures

The following tables provide a summary of the sources of funds for capital projects found in this CIP, by county department, and estimated expenditures over the next six-year planning period.

This page intentionally blank.

Table 1-1 Summary by Revenue Source

Revenue Sources	Parks and Open Space	Solid Waste	Storm and Surface Water Utility	Water and Sewer Utility	Transportation	County Buildings	Totals by Revenue Source
Existing Revenues							
Central Services Building Reserve						\$7,510,000	\$7,510,000
Grants Committed	\$5,466,000		\$877,500		\$15,158,180	\$11,590,000	33,091,680
Other, Federal/State/Local Agency	\$172,500				\$16,706,042		\$16,878,542
Parks Impact Fees	\$3,169,650						\$3,169,650
Real Estate Excise Tax	\$1,095,250			\$3,180,000	\$28,887,000	\$51,700,000	\$84,862,250
Road Fund					\$31,260,231	\$100,000	\$31,360,231
Solid Waste Tipping Fees, Rates and Charges		\$28,570,000					\$28,570,000
Stormwater Utility Rates			\$4,742,500				\$4,742,500
Transportation Impact Fees					\$3,058,700		\$3,058,700
Trial Court Improvement Fund						\$2,150,000	\$2,150,000
Utility Revenue				\$6,999,000			\$6,999,000
Existing Revenues Totals	\$9,903,400	\$28,570,000	\$5,620,000	\$10,179,000	\$95,070,153	\$73,050,000	\$222,392,553

Revenue Sources	Parks and Open Space	Solid Waste	Storm and Surface Water Utility	Water and Sewer Utility	Transportation	County Buildings	Totals by Revenue Source
Proposed New Revenues or Increased Rates							
Bonds - Future						\$50,500,000	\$50,500,000
Utility Loans/Grants							0
Proposed Totals							

REVENUE TOTALS	\$9,903,400	\$28,570,000	\$5,620,000	\$10,179,000	\$95,070,153	\$123,550,000	\$272,892,553
-----------------------	--------------------	---------------------	--------------------	---------------------	---------------------	----------------------	----------------------

Table 1-2 Summary by Division and Year

Divisions	2022	2023	2024	2025	2026	2027	Total	% of Total Cost (rounded)
Parks	\$1,827,400	\$1,045,800	\$1,678,800	\$3,805,400	\$1,471,000	\$75,000	\$9,903,400	3%
Solid Waste	\$6,720,000	\$15,160,000	\$5,440,000	\$100,000	\$800,000	\$350,000	\$28,570,000	11%
Storm & Surface Water	\$2,718,000	\$2,030,000	\$722,000	\$50,000	\$50,000	\$50,000	\$5,620,000	2%
Transportation	\$16,948,690	\$19,118,078	\$23,570,985	\$17,242,400	\$9,080,000	\$9,110,000	\$95,070,153	34%
Water & Sewer	\$1,201,000	\$4,416,000	\$969,000	\$1,557,000	\$1,336,000	\$700,000	\$10,179,000	4%
General Government Facilities	\$12,740,000	\$16,510,000	\$50,900,000	\$21,300,000	\$1,800,000	\$20,300,000	\$123,550,000	46%
Total	\$42,155,090	\$58,279,878	\$83,280,785	\$44,054,800	\$14,537,000	\$30,585,000	\$272,892,553	100.00%

CHAPTER 2 – COUNTY PARKS, RECREATION AND OPEN SPACE

The inventory of County Parks, trails, open space and preserve area is 2,578 acres. This inventory is shown in table 2-1.

Table 2-1 Existing Parks and Trails Inventory

Facility Name	Location	Capacity or size
ACTIVE REGIONAL PARKS		
Deschutes Falls	SE	155 Acres
Kenneydell	SW	18 Acres 22 Acres Addition
Burfoot	NW	60 Acres
Frye	NW	86 Acres
Guerin	NW	40 Acres
OPEN SPACE/UNDEVELOPED PARK SITES

Ralph Munro Trail	NW	- - (1.5 trail miles)
HISTORIC SITES		
Mima Cemetery	SW	2 Acres
Ft. Eaton Monument	SE	1 Acres
George Washington Bush Monument	SE	1 Acres

Future Needs

Currently there are about 972 acres of developed and operational parkland and trails, designed to meet the level of service for parks, recreation and open space as stated in Chapter 9 of the Thurston County Comprehensive Plan Thurston County. Additional lands needed over the 20-year planning period for the comprehensive plan is approximately 210 acres. Land acquisition and park and trail development proposed in the six-year planning period as described in Table 2-2 will assure the adequate level of service is maintained to address the needs and demands of the growing population.

Proposed Improvements

Parkland and trail improvement projects and associated facilities, totaling about \$4.4 million, are proposed over the six-year planning period. These costs would be paid for by parks impact fees and real estate excise tax funds as shown in the Table 2-2.

Table 2-2: Public Works- Parks and Open Space Project Funding

REVENUES FOR PROJECTS							
Fund Source	2022	2023	2024	2025	2026	2027	6-Yr. Total
Real Estate Excise Tax	\$520,000	\$313,750	\$109,000	\$67,500	\$42,500	\$42,500	\$1,095,250
Park Impact Fees	\$1,167,980	\$555,610	\$966,680	\$434,380	\$22,500	\$22,500	\$3,169,650
FLAP Grant Appropriation	\$16,920	\$166,440	\$593,120	\$3,293,520	\$1,396,000	\$0	\$5,466,000
Conservation Futures	\$122,500	\$10,000	\$10,000	\$10,000	\$10,000	\$10,000	\$172,500
TOTALS	\$1,827,400	\$1,045,800	\$1,678,800	\$3,805,400	\$1,471,000	\$75,000	\$9,903,400

EXPENDITURES FOR PROJECTS									
Project Name	Fund Source	Urban Growth Area	2022	2023	2024	2025	2026	2027	6-Yr. Total
Deschutes Falls Park Walkway and View Point Improvements	PIF/REET	Rural Thurston County	\$5,000						\$5,000

DESCHUTES FALLS PARK - WALKWAY AND VIEW POINT IMPROVEMENTS

DESCRIPTION: Improvements include the addition of a viewpoint deck platform overlooking the falls. Improvement will also be made to the paths approaching the viewpoint.

LOCATION: Approximately 15 miles from Yelm at the end of Bald Hills Road in southeastern part of county.

JUSTIFICATION (Need/Demand): This is the largest publicly owned piece of recreational property in the southeastern part of the county. There is a high demand for park facilities in this section of the county. There is also a high demand for public use of this particular site. With its pristine natural environment, this site is one of the county's most valuable park assets. Current conditions include a large mud area at the viewpoint and approaching trails. The mud surface is not ideal for users and negatively impacts the environment as the mud area alters native vegetation and water run-off.

IMPLICATION OF NOT DOING THE PROJECT: User experience and natural environment continue to be negatively impacted.

LINKS TO OTHER PROJECTS OR FACILITIES: Deschutes Falls Parking Lot Expansion. Close proximity to the Weyerhaeuser properties opened for public recreational use. Adjacent to Department of Natural Resources Bald Hills Preserve.

BURFOOT PARK RESTROOM REPLACEMENT

DESCRIPTION: The existing restroom was built in 1977 and has exceeded its life expectancy. The project would include the removal of the existing restroom and replacing it with a larger, and more energy efficient building, and adding an additional restroom thereby increasing capacity and reducing the amount of required maintenance.

LOCATION: 6927 Boston Harbor Rd.

JUSTIFICATION (Need/Demand): The existing restroom does not have the capacity to serve the current need.

IMPLICATION OF NOT DOING THE PROJECT: Additional maintenance is required to keep the restroom operational. The park rents out picnic facilities which provides revenue. The restroom needs to be able to serve these uses or the risk of losing revenue.

LINKS TO OTHER PROJECTS OR FACILITIES: Boston Harbor Boat Launch

CHEHALIS WESTERN TRAIL - CULVERT REPLACEMENT

DESCRIPTION: Many of the County parks/trails culverts are reaching, or have exceeded, their life expectancy and need replacement. The existing failing culverts impact fish passage and do not meet the existing NPDES standards.

LOCATION: Chehalis Western Trail near Latigo St SE.

JUSTIFICATION: (Need/Demand): As culverts approach their life expectancy and begin to degrade, they must be prioritized for substantial repair or replacement.

IMPLICATION OF NOT DOING THE PROJECT(S): Continued deterioration of trail culverts. Negative impact to fish passage.

LINKS TO OTHER PROJECTS OR FACILITIES:

The Chehalis Western Trail intersects with the county-owned Yelm-Rainier-Tenino Trail, linking the cities of Lacey, Olympia Tumwater, Yelm, Rainier, and Tenino. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets.

CHEHALIS WESTERN TRAIL – 41st Ave NE TRAILHEAD

DESCRIPTION: Project includes creating a ±21 stall parking area for the Chehalis Western Trail. Includes constructing an asphalt parking surface, drainage structure, and installation of informational signage.

LOCATION: Near the intersection of the Chehalis Western Trail and 41st Ave NE.

JUSTIFICATION: (Need/Demand): This project would allow for vehicles to park in a safe manner as opposed to parking adjacent to the right-of-way. Addresses the need to add designated parking areas for trail use.

IMPLICATION OF NOT DOING THE PROJECT(S): Continued congestion with parking adjacent to the right-of-way.

LINKS TO OTHER PROJECTS OR FACILITIES:

The Chehalis Western Trail intersects with the county-owned Yelm-Rainier-Tenino Trail, linking the cities of Lacey, Olympia Tumwater, Yelm, Rainier, and Tenino. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets.

KENNEYDELL PARK – RESTROOM REPLACEMENT

DESCRIPTION: Project replaces the existing restroom located adjacent to the Lodge Building. The existing building was in place when the County purchased the property in 1988. The age of the structure is unknown but estimated to be approximately 50 years old.

LOCATION: Kenneydell Park 6745 Fairview Rd SW.

JUSTIFICATION (Need/Demand): The existing restroom is configured in a way that does not meet current ADA conditions. The building is essentially facing backwards now that it's main function is the serve the lodge. General items such as toilets, sinks, stalls, heat, and plumbing are all beyond their life expectancy. The new restroom will address additional capacity with an additional number of stalls and will become ADA compliant.

IMPLICATION OF NOT DOING THE PROJECT: A continuation in the degradation of the structure. Continue to be non-compliant with the ADA requirements

LINKS TO OTHER PROJECTS OR FACILITIES: Will link with the currently un-developed Gate-Belmore Trail

YELM –RAINIER- TENINO TRAIL RESTROOM – RAINIER

DESCRIPTION: Install a new restroom building in Rainier near the City-owned Wilkowski Park to replace an outdated portable building currently used for City Park reservations. The new restroom will serve both the Yelm-Rainier-Tenino Trail users and Wilkowski Park. The restroom will be maintained by City of Rainier staff.

LOCATION: City of Rainier.

JUSTIFICATION: The existing restroom is not operational most of the year as it is well beyond any reasonable life expectancy. The 14.5 mile Yelm-Rainier-Tenino Trail has restroom access at both ends, but nothing for the 14.5 mile stretch in between. Rainier is located half-way between tenino and Yelm, making it a strategic location.

IMPLICATION OF NOT DOING THE PROJECT(S): Restrooms are not available for a span of almost 14 miles. The existing portable building is not able to be opened due to the deteriorated condition.

LINKS TO OTHER PROJECTS OR FACILITIES: Links the rural Cities of Yelm, Rainier, Tenino and Bucoda in the future. Connects with the County-owned Chehalis Western Trail. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets. Links with proposed park sites at McIntosh Lake, the Deschutes River, and other county and city park sites.

GATE-BELMORE TRAIL 88TH Ave SW to 66TH Ave SW

DESCRIPTION: Develop, repurpose and improve unused rail corridor into a new regional trail Linking southwester Thurston County to Kenneydell Park.

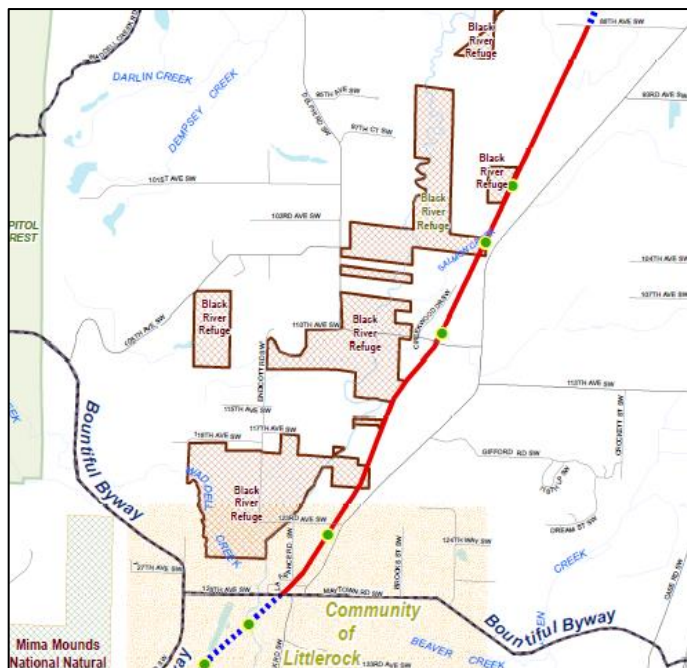

LOCATION: Corridor runs from 88th Ave SW (south) to 66th Ave SW (north).

JUSTIFICATION: 2 miles of undeveloped rail corridor and degraded trestles would be upgraded to current standards and open to the public. Develops 1st leg of the complete Gate-Belmore Trail. Links southwest Thurston County to Kenneydell Park.

IMPLICATION OF NOT DOING THE PROJECT(S): Continued degradation of the current trestles, causing potentially unsafe conditions. Trail maintenance increases as trail integrity degrades. No link from southwest Thurston County to Kenneydell Park.

LINKS TO OTHER PROJECTS OR FACILITIES: Links southwest Thurston County to Kenneydell Park. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets.

GATE-BELMORE TRAIL 128TH Ave SW to 88TH Ave SW

DESCRIPTION: Develop, repurpose and improve unused rail corridor into a new regional trail Linking southwester Thurston County to the community of Littlerock.

LOCATION: Corridor runs from 128th Ave SW(south) to 88th Ave SW (north).

JUSTIFICATION: 4.5 miles of undeveloped rail corridor including four (4) deteriorated trestles would be upgraded to current standards and open to the public. In alignment with the 2025 Regional Transportation Plan this project develops Gate-Belmore Trail between south Tumwater and Littlerock to enhance opportunities for transportation alternatives and communities connections.

IMPLICATION OF NOT DOING THE PROJECT(S): Continued degradation of the current trestles, causing potentially unsafe conditions. Trail maintenance increases as trail integrity degrades. No link from south Tumwater to Littlerock. Pedestrians and bicyclist will need to continue to utilize Littlerock Road SW, which is a high vehicular traffic roadway with speeds ranging for 25 to 50 miles per hour with limited shoulder widths.

LINKS TO OTHER PROJECTS OR FACILITIES: Links south Tumwater to Littlerock. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets including the Black River Unit of the Billy Frank Jr. Nisqually National Wildlife Refuge (NNWR).

BURFOOT TRAIL SYSTEM FOOTBRIDGE/STAIRWAY

DESCRIPTION: The existing existing trail system includes many footbridges and stairways. The bridges/stairways have exceeded their life expectancy and are in need of replacement. This project will pay for materials and labor needed to rebuild/replace the failing infrastructure.

LOCATION: 6927 Boston Harbor Rd.

JUSTIFICATION (Need/Demand):

Burfoot Park is a heavily used facility. The main attraction of the park is the access to Puget Sound/Budd Inlet. The trails, stairways, and bridges provide the connection from the main body and parking of the park to the shoreline. The bridges and stairways are wooden structures have deteriorated to a point that they do not serve the volume of people who use this facility.

IMPLICATION OF NOT DOING THE PROJECT: Additional maintenance will continue to be required to keep the trails operational.

LINKS TO OTHER PROJECTS OR FACILITIES: Boston Harbor Boat Launch

FIR TREE RD TRAILHEAD PARKING ACCESS IMPROVEMENTS

DESCRIPTION: Project adds to the existing parking area at the site. The existing parking lot does not have adequate parking spaces to serve the need.

LOCATION: Fir Tree Rd. Trailhead,
Chehalis Western Trail.

JUSTIFICATION (Need/Demand):

The existing parking lot does not provide adequate parking spaces for trail users during the summer months. The parking lot currently features 11 parking stalls. Overflow vehicles have resorted to parking on the grass lawn areas, impacting picnic table use. New parking spaces will address capacity by allowing more users to park safely inside the trailhead.

IMPLICATION OF NOT DOING THE PROJECT: Vehicles continuing to park on and degrade grass lawn areas, presenting possible safety issues, and reducing visitors to the park.

LINKS TO OTHER PROJECTS OR FACILITIES: The Chehalis Western Trail intersects with the County-owned Yelm-Rainier-Tenino Trail, linking the cities of Lacey, Olympia Tumwater, Yelm, Rainier, and Tenino. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets.

DESCHUTES FALLS PARK – PARKING EXPANSION

DESCRIPTION: Project adds to the existing parking area at the site. The existing parking lot does not have adequate parking spaces to serve the need.

LOCATION: Deschutes Falls Park. 25005 SE Bald Hills Rd.

JUSTIFICATION (Need/Demand): The existing parking lot does not provide adequate parking spaces for park users during the summer months. Many vehicles are currently required to park on Bald Hills Road, adjacent to the site, to access the park. New parking spaces will address capacity by allowing more users to park safely inside the park.

IMPLICATION OF NOT DOING THE PROJECT: Vehicles continuing to parking on Bald Hills Road presenting possible safety issues, and reducing visitors to the park.

LINKS TO OTHER PROJECTS OR FACILITIES: Deschutes Falls Park – Walkway and View Point Improvements. Close proximity to the Weyerhaeuser properties opened for public recreational use. Adjacent to Department of Natural Resources Bald Hills Preserve.

67TH AVE SE TRAILHEAD RESTROOM**DESCRIPTION:**

Install a new restroom building at the 67th Ave SE Trailhead. The new restroom will serve Chehalis Western Trail users. There is no existing restroom at this facility.

LOCATION: 67th Ave SE, Chehalis Western Trail.

JUSTIFICATION: There is no existing restroom at this facility. The trailhead currently features 14 parking stalls, multiple picnic tables and benches. This is a heavily used trailhead for access to the Chehalis Western Trail in the south end of the urban corridor.

IMPLICATION OF NOT DOING THE PROJECT(S):

There is currently no restroom at one of our highest volume trailheads. 67th Ave trailhead sits at the south end of the urban corridor. User experience will continue to be negatively impacted

LINKS TO OTHER PROJECTS OR FACILITIES:

The Chehalis Western Trail intersects with the county-owned Yelm-Rainier-Tenino trail, linking the cities of Lacey, Olympia Tumwater, Yelm, Rainier, and Tenino. Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets.

BURFOOT PARK – LEVEL AND GRADE LAWN AREA

DESCRIPTION: Project includes the re-grading of a 3-acre lawn area. Involved in this project is the need for a large volume of soil to be imported, grading, and re-seeding. This project will reduce the amount maintenance time needed and will make the area more usable for the public for recreational activities.

LOCATION: 6927 Boston Harbor Rd.

JUSTIFICATION (Need/Demand): Burfoot Park is a very popular destination for the citizens and visitors to the region. The lawn was installed in 1977 and has settled into a series of depressions that increase the time required for maintenance of the site and lowers the life expectancy of the machinery.

IMPLICATION OF NOT DOING THE PROJECT: Increased time to perform maintenance and higher replacement cost for machinery.

LINKS TO OTHER PROJECTS OR FACILITIES: Boston Harbor Boat Launch

FRYE COVE – LAWN RENOVATION

DESCRIPTION: Project addresses an issue of safety, aesthetics, and maintenance efficiency. The existing lawn has been settling in a way that produces large “sinkholes”. The fill, over which the lawn was placed, is comprised of concrete rubble and has many voids. This project will over-excavate the lawn area, remove or reposition the concrete pieces, and replace and grade the soils.

LOCATION: Frye Cove park 4000 NW 61st Ave.

JUSTIFICATION (Need/Demand): The completed project will provide for a safer public area, improve the aesthetics, and reduce maintenance time.

IMPLICATION OF NOT DOING THE PROJECT: More sinkholes may develop making the area less safe and continue to take additional maintenance time to repair.

LINKS TO OTHER PROJECTS OR FACILITIES: Allows parks users access to the waters of Eld Inlet and the Puget Sound for recreational use.

YELM–RAINIER-TENINO TRAIL/CITY OF RAINIER RECREATIONAL COURTS PARK IMPROVEMENTS

DESCRIPTION: Install new recreational sport courts in Rainier near the City-owned Wilkowski Park. The new sport courts will serve both the Yelm-Rainier-Tenino Trail users and Wilkowski Park. The sports will be maintained by City of Rainier staff.

LOCATION: City of Rainier.

JUSTIFICATION: The local recreational facilities consist of a small playground and basketball court. Installation of new sports courts would add more diverse options for recreation and fitness. Rainier is located half-way between Tenino and Yelm, making it a strategic location for Yelm-Rainier-Tenino trail and Wilkowski

park users.

IMPLICATION OF NOT DOING THE PROJECT(S): Lack of diverse recreational and fitness options for citizens of Rainier and users of the Yelm-Rainier-Tenino trail.

LINKS TO OTHER PROJECTS OR FACILITIES: Links to the Yelm-Rainier-Tenino Trail Restroom project and the Yelm-Rainier-Tenino trail, which links the rural Cities of Yelm, Rainier, Tenino and Bucoda in the future. Connects with the County-owned Chehalis Western Trail.

Connects urban and rural communities, businesses, schools, residences, park facilities, and other valuable assets. Links with proposed park sites at McIntosh Lake, the Deschutes River, and other county and city park sites.

TRAIL SURFACE PRESERVATION PROGRAM

DESCRIPTION: Implement a Trail Surface Preservation Program to pro-actively and efficiently schedule maintenance and repairs on all County-owned paved asphalt multi-use trails.

LOCATION: Assets are located County wide within the trails system inventory of properties.

JUSTIFICATION (Need/Demand): Without a Trail Surface Preservation Program, paved asphalt trails will continue to degrade and required additional reactionary maintenance. This program would allow the county to remain in compliance with ADA

requirements for multi-use trails.

IMPLICATION OF NOT DOING THE PROJECT: Continued degradation to paved asphalt multi-use trail surfaces, requiring additional maintenance. Potential for ADA non-compliant trail surfaces

LINKS TO OTHER PROJECTS OR FACILITIES: Varies

PARKS, TRAILS AND OPEN SPACE ACQUISITION PROGRAM

DESCRIPTION: - The Thurston County Comprehensive Parks, Open Space, and Trails Plan defines several goals oriented to preserving open space and natural areas. The focus is on properties that contain special features intended to be used regionally by all residents of the county, inside and/or outside cities

LOCATION: Various locations throughout the county.

JUSTIFICATION (Need/Demand): To allow the county to remain in compliance with the Parks Comprehensive Plan in terms of acreage per 1000 residents and to allow for purchase of properties that may become available with the purchase being time sensitive.

IMPLICATION OF NOT DOING THE PROJECT: Opportunity to purchase unique properties or properties that may be time-sensitive may be lost.

LINKS TO OTHER PROJECTS OR FACILITIES: Varies

PARKS IMPROVEMENTS AND DEVELOPMENT PROGRAM

DESCRIPTION:

Repairs to existing Parks system infrastructure is required to ensure that safe and operation sites are available to the public. Additional capacity is added as needed to keep pace with a consistent increase in the volume of users.

LOCATION: County-wide.

JUSTIFICATION (Need/Demand):

There are life expectancies associated with the infrastructures that make up the County Parks system. Facility Improvements are used to repair/replace existing infrastructures to make sure facilities remain safe, accessible and to add capacity when needed.

IMPLICATION OF NOT DOING THE PROJECT:

Infrastructure failure results in an unsafe condition that puts the County in a position of elevated liability. Repairing a system through proper maintenance is much more cost effective than replacing or repairing due to a failure.

LINKS TO OTHER PROJECTS OR FACILITIES:

Varies depending upon site.

CHAPTER 3 - SOLID WASTE

State law requires each county within the state, in cooperation with various cities and towns within the county, to prepare a coordinated, comprehensive Solid Waste Management Plan. The purpose of this plan is to serve as a guiding document for local governments' solid waste programs, including programs for waste reduction, collection, handling, recycling, and disposal. The plan must also list all existing solid waste management facilities within the participating jurisdictions and outline needs for future facilities that will be required to meet population and waste generation projections (RCW 70.95.080).

An inventory of the solid waste management facilities owned by Thurston County is presented below. These facilities are located at the Waste and Recovery Center (WARC), 2420 Hogum Bay Road NE in Lacey, unless otherwise noted.

Table 3-1 Existing Inventory

Facility Name	Location	Capacity or size
Transfer Station	WARC	Maximum 159 tons per hour <u>or</u> 80 customers per hour
Closed Landfill (formerly Hawks Prairie Landfill)	WARC	N/A
HazoHouse (moderate risk waste facility)	WARC	150 customers per day
Vactor and Street Sweeping Decant Facility	WARC	3,200 square feet
Rainier Drop-Box Facility	Rainier	240 cubic yards per day
Rochester Drop-Box Facility	Rochester	320 cubic yards per day

Future Needs

Thurston County's transfer station receives and manages most of the solid waste generated in the County, as well as a small amount of waste generated in nearby counties. The transfer station, HazoHouse, and two drop-box facilities must serve increasing numbers of customers and corresponding quantities of waste as population increases. The scales and scalehouses associated with the transfer station can accommodate up to about 800 customers per day (based on a 10-hour day) without forming long queue lines that create unacceptable customer wait times and conflicts with traffic movement within the facility. Currently, the scalehouses exceed the peak daily customer count about 20 percent of the time, with the highest customer demand on weekend with counts over 1,200. Based on current and projected population growth in Thurston County and corresponding waste generation rates over the next six years, the transfer station and drop-box facilities will need significant

investment to construct those improvements needed to address aging infrastructure and meet service demand. In addition, the County is obligated to maintain the environmental monitoring systems and other environmental management infrastructure associated with the closed landfill, much of which requires repair or replacement due to obsolescence or damage from differential settlement.

Proposed Improvement Projects

As shown in Table 3-2, repairs and improvements to the closed landfill, transfer station and drop-box facilities and possible facility expansion totaling over \$28 million are proposed over the six-year planning period. These costs will be paid from solid waste tipping fees as shown in Table 3-2.

Table 3-2 Solid Waste Proposed Capital Projects and Funding

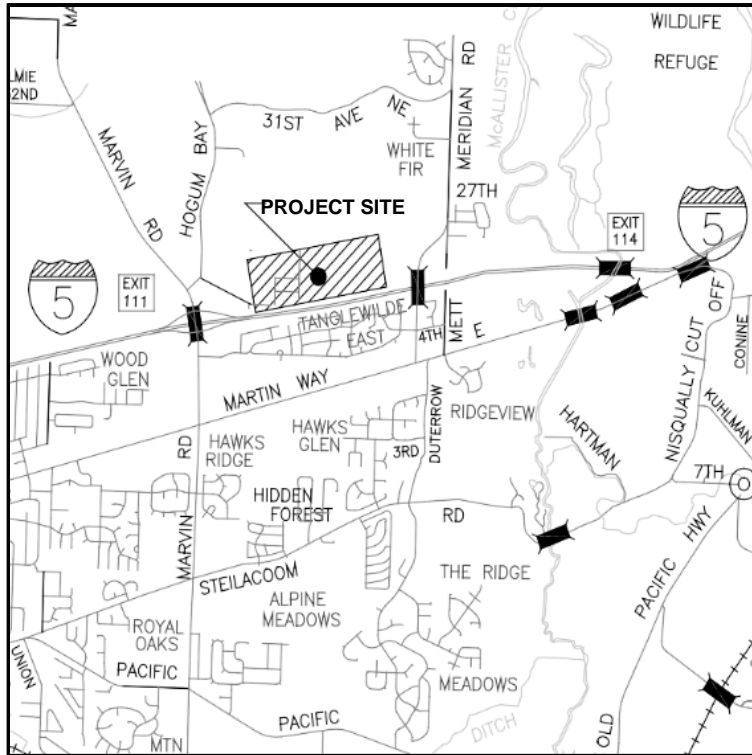

REVENUES FOR PROJECTS							
Fund Source	2022	2023	2024	2025	2026	2027	6-Yr. Total
Solid Waste Tipping Fees, Rates and Charges	\$6,720,000	\$15,160,000	\$5,440,000	\$100,000	\$800,000	\$350,000	\$28,570,000
TOTALS	\$6,720,000	\$15,160,000	\$5,440,000	\$100,000	\$800,000	\$350,000	\$28,570,000

Closed Landfill–Flare Station

DESCRIPTION: Replacement of the closed landfill’s Flare Station which is required for methane gas treatment and migration control.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

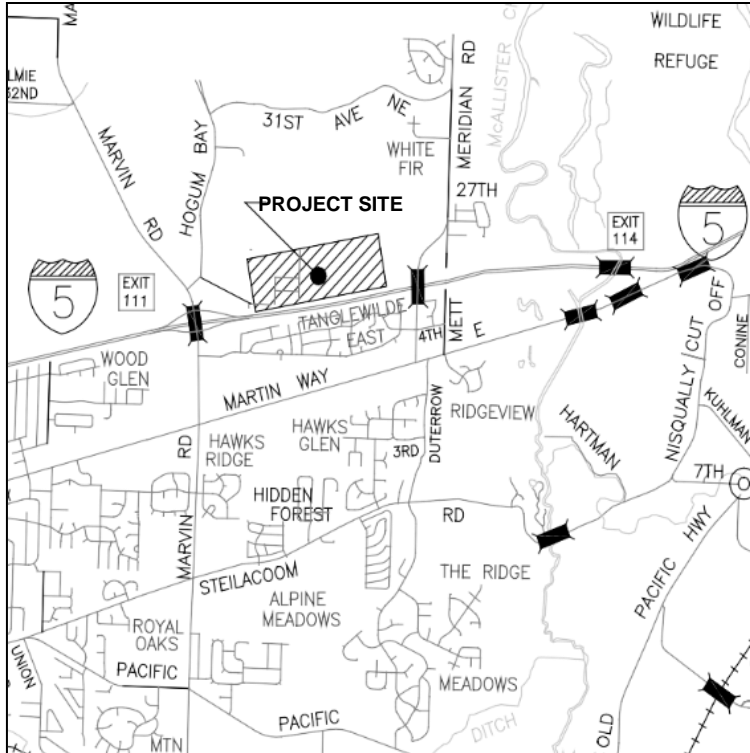

JUSTIFICATION: The current flare station is oversized, and replacement is required in order to operate at current and projected levels of methane gas within the closed landfill.

IMPLICATION OF NOT DOING THE PROJECT (S): Operation of the existing flare station will fail to meet permit requirements for

treatment of methane gas and migration control.

LINKS TO OTHER PROJECTS OR FACILITIES: The closed landfill’s SCADA system has failed due to an aged software platform. All environmental systems and pump stations at the site must tie into this platform in order to maintain electronic control and alarm capability. Design and replacement of the SCADA system must be accomplished in parallel with repair and upgrade of these other systems and pump stations.

SCADA System Replacement

DESCRIPTION: Replacement of the closed landfill's electronic control system (SCADA).

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: The controlling electronic system (SCADA) and associated software that supports the flare and other environmental monitoring systems has failed and must be replaced.

IMPLICATION OF NOT DOING THE PROJECT (S): Operation of the existing flare station will fail to meet permit requirements for treatment of methane gas and

migration control. Critical site infrastructure and systems will not be able to be comprehensively monitored or problems addressed remotely.

LINKS TO OTHER PROJECTS OR FACILITIES: The closed landfill's SCADA system has failed due to an aged software platform. All environmental systems and pump stations at the site must tie into this platform in order to maintain electronic control and alarm capability. Design and replacement of the SCADA system must be accomplished in parallel with repair and upgrade of these other systems and pump stations.

Rochester Drop-Box Facility–Renovation, Security and Utility Upgrades, and Scale Installation

DESCRIPTION: Renovation of the Rochester Drop-Box Facility to include security and utility upgrades and installation of scales for weighing loads and potential reconfiguration of the Public Tipping Area.

LOCATION: 16500 Sargent Road, Rochester

JUSTIFICATION: Infrastructure at the drop-box facility is obsolete and inadequate to meet staffing, operational, and technology needs, as well as increased customer demand. Scales should be installed at the site to improve functionality, accommodate population growth, and ensure full fee recovery. Improvements to the Public Tipping Area

will support operational efficiencies.

IMPLICATION OF NOT DOING THE PROJECT(S): Failure to renovate the facility will result in increasing costs for repairs of aging infrastructure, the inability to implement security and technology upgrades, reduced customer service levels, and inefficient waste transport operations.

LINKS TO OTHER PROJECTS OR FACILITIES: A site evaluation for a possible second transfer station in south Thurston County is underway. A new transfer station would eliminate the need for Rochester Drop-Box renovations as the site would be decommissioned.

Rainier Drop-Box Facility–Renovation, Security and Utility Upgrades, and Scale Installation

DESCRIPTION: Renovation of the Rainier Drop-Box Facility to include security and utility upgrades and installation of scales for weighing loads and potential reconfiguration of the Public Tipping Area.

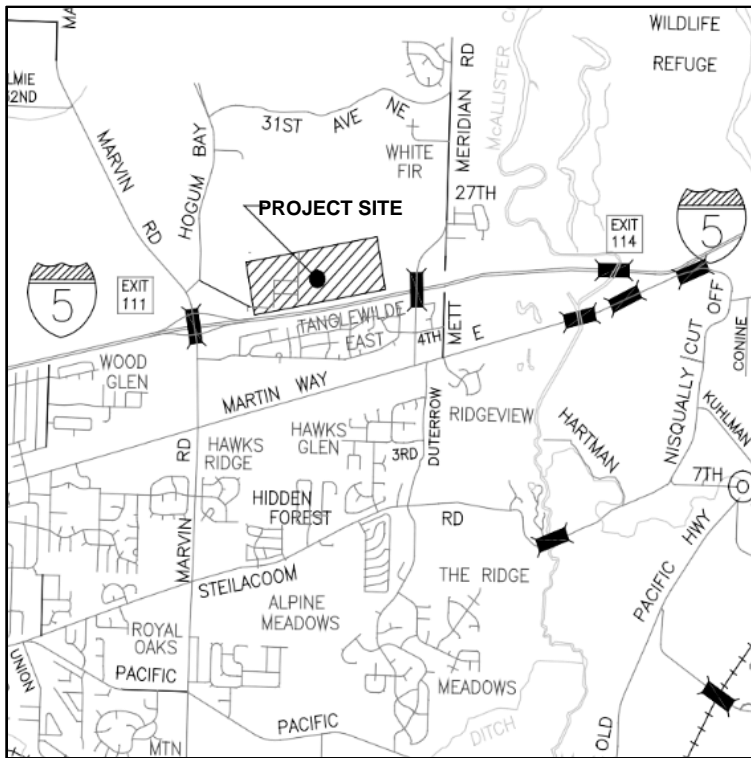

LOCATION: 13010 Rainier Acres Road SE, Rainier

JUSTIFICATION: Infrastructure at the drop-box facility is obsolete and inadequate to meet staffing, operational, and technology needs, as well as increased customer demand. Scales should be installed at the site to improve functionality, accommodate population growth, and ensure full fee recovery. Improvements to the Public Tipping Area will support operational efficiencies.

IMPLICATION OF NOT DOING THE PROJECT(S): Failure to renovate the facility will result in increasing costs for repairs of aging infrastructure, the inability to implement security and technology upgrades, reduced customer service levels, and inefficient waste transport operations.

LINKS TO OTHER PROJECTS OR FACILITIES: A site evaluation for a possible second transfer station in south Thurston County is underway. A new transfer station would eliminate the need for Rainier Drop-Box renovations as the site would be decommissioned.

Pump Systems Upgrades and Improvements

DESCRIPTION: Repairs and upgrades to pump stations 001 – Leachate Lagoon Outlet. General upgrade to improve function of valve station, configuration, and access, including eliminating need for confined-space entry; station 002, which transfers waste water from the transfer station to the main sanitary line; 003 - Replacement of pump station, which transfers combined waste water and leachate off site. Stormwater transition pond – channels stormwater offsite, needing upgrade and repairs. SCADA control allows for full pump system integration.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: All existing pump systems have aging equipment requiring repair or replacement in order to manage wastewater, leachate and stormwater effectively, with regular, accessible maintenance and integrated controls. Systems must allow for monitoring and sampling to meet permit requirements.

IMPLICATION OF NOT DOING THE PROJECT(S): Failure to address needed repairs and upgrades will compromise the ability to transfer waste water from the transfer station, stormwater from the transition pond, compromise the ability to control discharge from the leachate lagoon, and maintenance efforts for 001 will continue to require confined-space entry.

LINKS TO OTHER PROJECTS OR FACILITIES: The pump systems improvements and repairs will be linked to the electronic system designed and installed as part of the Flare Station and SCADA System Replacement.

Security, Technology, and Electrical Improvements

DESCRIPTION: Improved site security including lighting, cameras, and access control; technology upgrades to replace obsolete components, improve network infrastructure and connectivity needs; and electrical system upgrades including facility back-up generator systems.

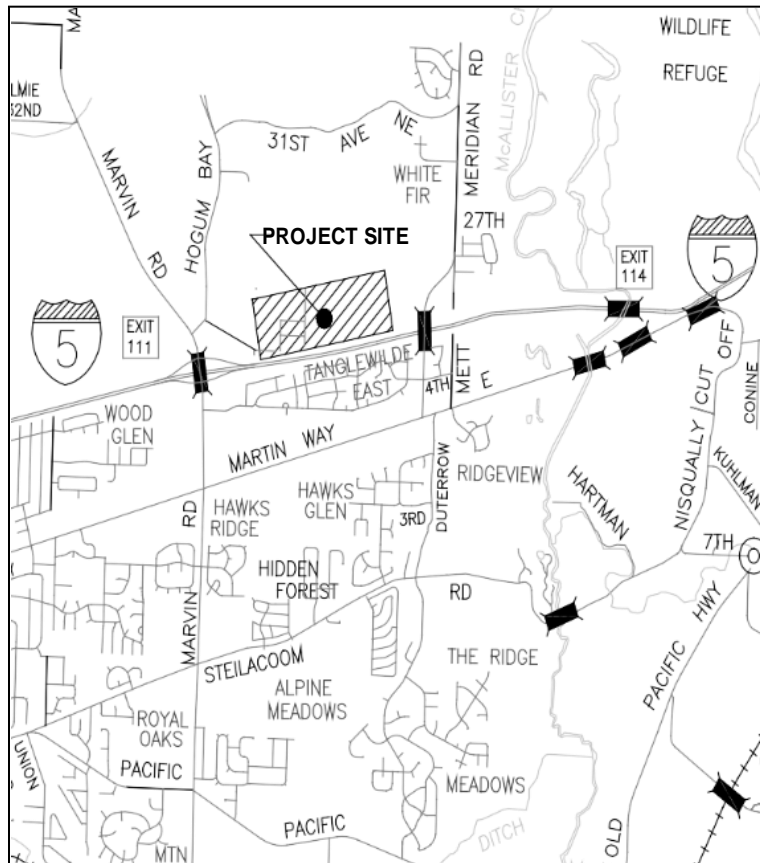

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: Much of the infrastructure associated with security and technology is insufficient or obsolete. Improved site security including lighting, cameras, and access control are required in order to prevent access by unauthorized persons and vehicles when facility is closed. The facility's emergency power back-up systems and communication / network infrastructure required improvements in order to support security and technology upgrades and reduce service disruptions from network and power outages. This project also supported the upgrade of the Paradigm scale software system at the scalehouses and implementation at the HazoHouse for improved customer service, operational efficiencies, and data collection. The Paradigm upgrade was successfully completed in 2021.

IMPLICATION OF NOT DOING THE PROJECT (S): Security issues resulting from unauthorized persons and vehicles accessing the site when the facility is closed will not be addressed. In addition, needed technology upgrades and replacement of obsolete components that are required to support improved security and connectivity will not occur.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Transfer Station Operations Facilities Upgrades and Improvements

DESCRIPTION: Upgrades to the transfer station lower bay area to address stormwater and security issues, and other infrastructure improvements to the transfer station.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: The lower bay area of the transfer station is unpaved, and the resulting dust, mud, and ponding are causing negative impacts to the stormwater collection system. In addition, lighting in the area is insufficient for working and security. Infrastructure has deteriorated to the point that working surfaces are worn through.

IMPLICATION OF NOT DOING THE PROJECT(S): Failure to address the lack of paving and improper grade in the lower bay area will result in continued negative impacts to the stormwater collection system, which would have to be addressed through increased and ongoing maintenance of that system. Further deterioration of the infrastructure will cause operational inefficiencies and potential safety issues.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Transfer Station Sort Line Removal

DESCRIPTION: Removal of the transfer station sort line in order to increase the available tipping floor space in the transfer station.

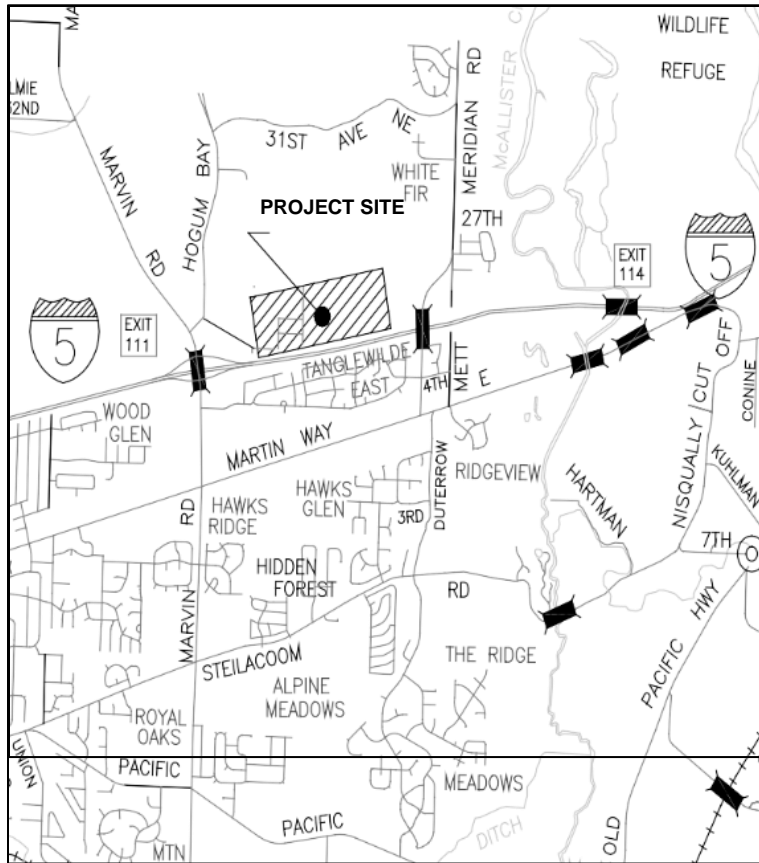

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: A sort line for recovering materials from waste brought to the transfer station has been out-of-use since 2014 and needed repairs are estimated to cost over \$1,000,000. Removal of the sort line is a cost-effective way to increase available floor space in the transfer station and potentially defer the need for future expansion.

IMPLICATION OF NOT DOING THE PROJECT(S): The transfer station operation would benefit from the additional floor space within the transfer station created by removal of the sort line.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Transfer Station Compactor Overhaul and Maintenance

DESCRIPTION: Overhaul and maintenance of the transfer station compactor, which is used to load solid waste in rail containers for transportation to the landfill for disposal

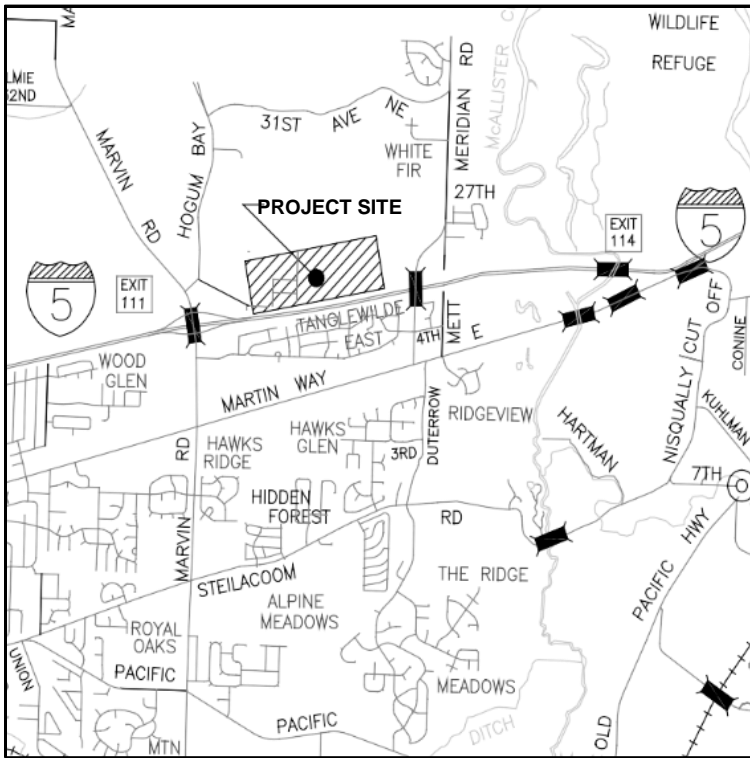

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: Capacity of the transfer station is limited by the load-out rate of the single compactor. Transfer station compactor must be overhauled and routinely maintained through 2030 to ensure uninterrupted operation. (Compactor replacement anticipated in 2031.)

IMPLICATION OF NOT DOING THE PROJECT(S): Maintenance of the compactor is required in order to keep up with loading the incoming waste delivered to the site and ensure efficient transfer to the disposal facility (i.e., landfill). Compactor failure could result in significant impacts on ability to comply with site permits and manage waste in an environmentally sound manner.

LINKS TO OTHER PROJECTS OR FACILITIES: None

WARC Site Reconfiguration: Public Tipping Area with New Scales and Scalehouses and New Administrative Operations Facilities

DESCRIPTION: Relocation of the Public Tipping Area (PTA) from the closed landfill to the southern portion of the facility to include installation of new scales and scalehouses. Construction of a consolidated administration building(s) at the Waste and Recovery Center.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: The existing PTA, scales, and scalehouses are constructed on the closed landfill and require significant initial and ongoing repairs due to differential settlement. Relocation of this infrastructure is recommended in order to eliminate ongoing maintenance issues; expand facility capacity; improve customer access; and reduce wait times, customer queuing, and traffic conflicts with commercial traffic. Construction of a consolidated administrative building(s) outside of the footprint of the closed landfill is recommended to address technology, security, and health and safety needs. This new construction is in lieu of replacing three existing structures located on the closed landfill that are obsolete and damaged by differential settlement.

IMPLICATION OF NOT DOING THE PROJECT (S): Significant costs would be incurred to repair damage caused by differential settlement to the existing PTA, scales, scalehouses, ramps, and administrative facilities, and these costs would be ongoing as settlement continues. In addition, existing infrastructure is inadequate to meet increasing demand for services and address safety concerns.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Transfer Station Facility – Second Location

DESCRIPTION: Evaluate the development of a new transfer station on a new site. The project may include: conceptual sizing and site plan development to determine approximate acreage needed, development of cost estimates, design and construction of the facility.

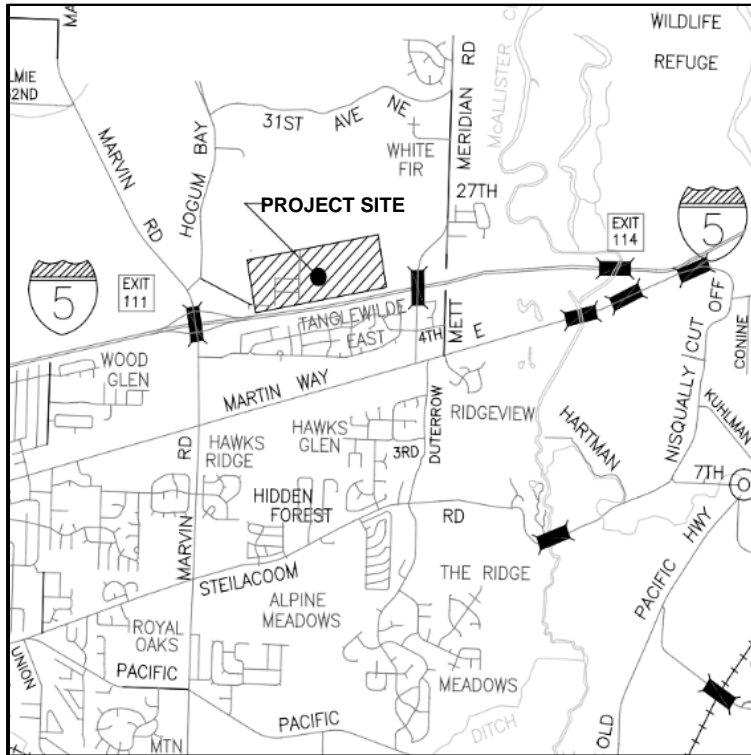

LOCATION: South Thurston County

JUSTIFICATION: Recent 30% design to upgrade the Rainier and Rochester Drop-box sites indicate a substantial investment would be needed. Before continuing with those projects, the County has embarked on this study to determine the feasibility of a new, second transfer station.

IMPLICATION OF NOT DOING THE PROJECT (S): Failure to complete a feasibility study limits the County's potential options to provide long-range waste and recycling services and could result in expending funding in a less than most optimal manner.

LINKS TO OTHER PROJECTS OR FACILITIES: Should the County decide to move forward with development of a new transfer station, the Rainier and Rochester Drop-box facilities renovations would not be needed.

Site Differential Settlement Repairs

DESCRIPTION: Differential settlement caused by decomposing waste within the closed landfill negatively impacts facility infrastructure and requires ongoing assessment and repair. Specifically, the Public Tipping Area requires repairs to eliminate safety issues caused by settlement.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: The facility infrastructure that is constructed on closed landfill is subject to differential settlement and requires ongoing assessment and repair to project County investment as well as to maintain landfill integrity and stay within regulatory compliance.

IMPLICATION OF NOT DOING THE PROJECT (S): Infrastructure constructed on the closed landfill must be assessed and repaired in order to maintain service levels and prevent potential safety hazards. Settlement in the Public Tipping Area needs to be addressed to provide a safe tipping area for customers and operators.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Rainier & Rochester Facilities Renovations and Upgrades Program

DESCRIPTION: Renovations and upgrades to existing facilities and site to maintain current level of service.

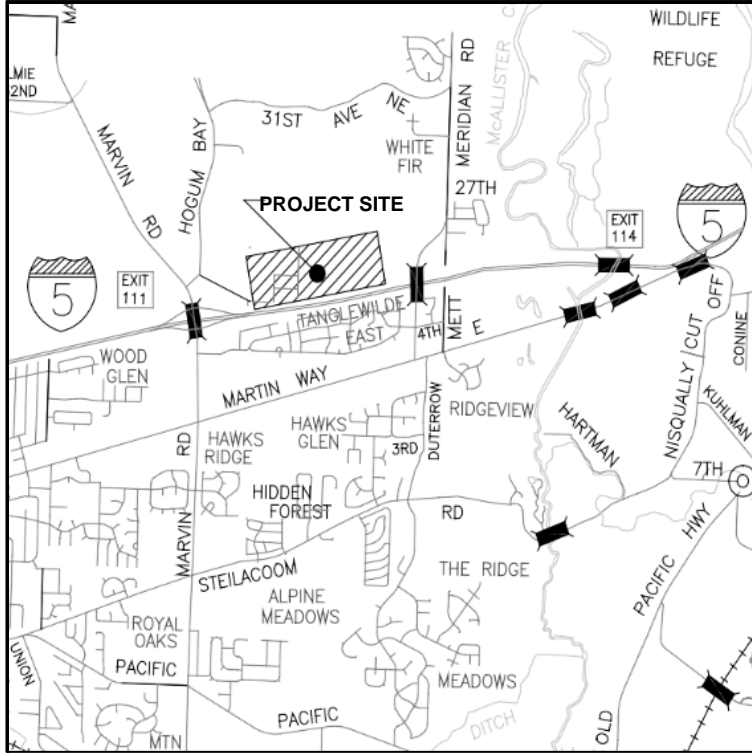

LOCATION: 13010 Rainier Acres Road SE, Rainier, WA
16500 Sargent Road, Rochester, WA

JUSTIFICATION: The facilities and site infrastructure are reaching the end of their useful operational life. This situation will require prompt repair action in order to ensure the drop-box facility's integrity and regulatory compliance.

IMPLICATION OF NOT DOING THE PROJECT (S): Failure to maintain the facilities and infrastructure would negatively impact the drop-box facility's integrity and the County's ability to meet permit requirements as well as maintain current level of service.

LINKS TO OTHER PROJECTS OR FACILITIES: Future renovations and upgrades would not be needed should the County construct a second transfer station.

General Facilities Renovations and Upgrades Program

DESCRIPTION: Renovations and upgrades to existing facilities and site to maintain current level of service.

LOCATION: Thurston County Waste and Recovery Center, 2420 Hogum Bay Road, Lacey

JUSTIFICATION: The facilities and site infrastructure are reaching the end of their useful operational life with much being constructed on closed landfill is subject to differential settlement. This situation will require prompt repair action in order to ensure landfill integrity and stay within regulatory compliance.

IMPLICATION OF NOT DOING THE PROJECT (S): Failure to maintain the facilities and infrastructure would negatively impact landfill integrity and the County's ability to meet permit requirements as well as maintain current level of service.

LINKS TO OTHER PROJECTS OR FACILITIES: None

Lemon Road Pond

Description: Construct a constructed wetland/detention pond to provide water quality treatment and stormwater storage.

Location: 4924 Lemon Road NE, Olympia, WA.
Lat: 47° 6' 9.90027" N **Lon:** 122° 51' 7.26454" W

Justification (Need/Demand): Lemon Road floods during heavy rains and becomes impassable. Woodard Creek has a TMDL for bacteria. This project will construct a constructed wetland to provide water quality treatment and storage to improve water quality before discharging to Woodard Creek and relieve flooding on Lemon Road.

Implication of not doing the project: Lemon Road will continue to flood during heavy rain and water quality of Woodard Creek will not improve.

Links to other related projects or facilities: Woodard Creek Site 4 Retrofit Project.

Comprehensive Plan and Functional Plan(s) Citations: Comprehensive Plan: Capital Facilities, Goal 1, Objective 1C, Policies 1-9; Natural Environment, Goal C, Objective 1, Policies 1-13; Natural Environment, Objective 3; Natural Environment, Goal E, Policies 9&10; Natural Environment, Goal G, Objective 1, Policies 1-8, Objective 2, Policies 2,3,4,9; This will help to address the Woodard Creek TMDL

Level of Service (LOS): Quadrant

Location: Rural NE

Boston Harbor Road NE Outfall and Culvert Project

Description: Repair/replace failing outfall on Boston Harbor Road, upgrade ditches along Boston Harbor Road, and add a culvert under Boston Harbor Road to reduce flooding.

Location: Boston Harbor Rd NE and 73rd Ave NE.

Justification (Need/Demand): The outfall on Boston Harbor Road NE is failing and needs to be repaired or replaced. The failure is causing damage to driveway and yard at 7325 Boston Harbor Road NE. In addition, the roadside ditches are too small and cannot handle the flows in large rain events nor do they provide treatment to meet today's stormwater standards. This project would replace the failing outfall, install a culvert under Boston Harbor Road connecting to the new outfall to reroute flows, replace undersized driveway culverts, and upgrade ditches to meet current county standards. This will alleviate flooding that occurs when the water fills the ditch and goes over the road and floods driveways and yards before flowing into the Sound.

Implication of not doing the project: Water will continue to erode the yard and driveway at 7325 Boston Harbor Road NE. Flooding will continue along Boston Harbor Road.

Links to other related projects or facilities: None.

Madrona Beach Road NW Vic. Retrofits

Description: Fix five locations along Madrona Beach Road NW where the stormwater infrastructure is failing or inadequate to handle stormwater flows.

Location: Madrona Beach Road NW between Sexton Ave NW and 1330 Madrona Beach Road NW.

Justification (Need/Demand): The stormwater infrastructure at these 5 locations are either undersized or failing which causes flooding and damage to the roadway or driveways. The damage causes erosion which washes sediment and pollutants into Mud Bay and Eld Inlet.

Implication of not doing the project: Flooding and damage to the road and driveways and sediment deposition to Eld Inlet will continue.

Links to other related projects or facilities: None.

Woodard Creek Site 1

DESCRIPTION: Install a bioretention swale and two filter vaults within the Thurston County road Right-of-Way, before discharging directly into Woodard Creek. This project was one of 5 projects identified in the 2014 Woodard Retrofit Study.

LOCATION: Along South Bay Road NE near the intersection of 26th Ave. NE. Sec. 06, T18N - 01W.

JUSTIFICATION (Need/Demand): The project is located in the Woodard Creek Basin of the Henderson Inlet Watershed. In 2006 the Washington State Department of Ecology published the *Henderson Inlet Watershed Fecal Coliform Bacteria, Dissolved Oxygen, pH, and Temperature Total Daily Maximum Load Study*. The purpose of the proposed improvements is to improve the water quality of stormwater which is a possible source of bacteria in Woodard Creek, Woodard Bay, and Henderson Inlet. In addition, the *Henderson Inlet Watershed Fecal Coliform Water Quality Implementation Plan* identified needed reductions in fecal coliform bacteria in the Woodard Creek basin. The project will further Thurston County's efforts to comply with the TMDL requirements.

IMPLICATION OF NOT DOING THE PROJECT(S): Further contamination of Woodard Creek with pollutants from stormwater and non-compliance with TMDL requirements

LINKS TO OTHER PROJECTS OR FACILITIES: *Henderson Inlet Watershed Fecal Coliform Bacteria, Dissolved Oxygen, pH, and Temperature Total Daily Maximum Load Study*. *Woodard Creek Basin Stormwater Retrofit Study (2014)*.

Meadows Subdivision Pond 4C Retrofit

Description: The project will retrofit the existing Meadows Subdivision Pond 4C by regrading the site and replacing inlet and outlet structures to meet current water quality treatment and flow control standards. **Location:** Meadows Subdivision between Clover Loop SE and Gadwell Ct. SE between Steilacoom Rd. SE and Pacific Hwy SE.

Justification (Need/Demand): The subdivision and pond were built in the mid-1980's to the stormwater flow and treatment standards current at the time. These standards do not meet the current standards for water quality and flow control. This project will retrofit the pond and structures to improve water quality and add flow control to meet current standards, i.e., Core Requirements #6 and #7.

Implication of not doing the project: This system eventually discharges to Little McAllister Creek. If the project is not completed then high flows of untreated stormwater will continue to degrade Little McAllister Creek and McAllister Creek.

Links to other related projects or facilities: This pond is the first pond in a string of ponds that serve the Meadows subdivision including Mallard Pond a former county CFP project. Future retrofit projects will address the downstream ponds.

Woodard Creek Site 4

DESCRIPTION: Install bioretention swales within the Thurston County road right-of-way to filter the water before discharging to a tributary of Woodard Creek and upgrade ditches and culverts along Lemon Road to alleviate flooding. This project was one of 5 projects identified in the 2014 Woodard Retrofit Study.

LOCATION: Along the south side of 46th Ave. NE between the westerly intersection of Lemon Rd NE and the Chehalis Western Trail. Sec. T19N - 01W

JUSTIFICATION (Need/Demand): The project is located in the Woodard Creek Basin of the Henderson Inlet Watershed. In 2006 the Washington State Department of Ecology published the *Henderson Inlet Watershed Fecal Coliform Bacteria, Dissolved Oxygen, pH, and Temperature Total Daily Maximum Load Study*. The purpose of the proposed improvements is to improve the water quality of stormwater which is a possible source of bacteria in Woodard Creek, Woodard Bay, and Henderson Inlet. In addition, the *Henderson Inlet Watershed Fecal Coliform Water Quality Implementation Plan* identified needed reductions in fecal coliform bacteria in the Woodard Creek basin. The project will further Thurston County's efforts to comply with the TMDL requirements. Additionally, Lemon Rd experiences frequent flooding, project would expand roadside ditches and replace undersized culverts in attempt to alleviate flooding during smaller storm events along the roadway.

IMPLICATION OF NOT DOING THE PROJECT(S): Further contamination of Woodard Creek with pollutants from stormwater and non-compliance with TMDL requirements

LINKS TO OTHER PROJECTS OR FACILITIES: *Henderson Inlet Watershed Fecal Coliform Bacteria, Dissolved Oxygen, pH, and Temperature Total Daily Maximum Load Study. Woodard Creek Basin Stormwater Retrofit Study (2014).*

Manzanita DR NW

DESCRIPTION: Stormwater outfall on a high bank marine bluff.

LOCATION: 7402 Manzanita Dr. NW.
Sec. 17, T19N - 02W.

JUSTIFICATION (Need/Demand): The storm drainage system installed in the 1960's as part of the Boston Harbor Water Front Acre Tracts Division No. 2 development has deteriorated and is causing bank erosion. This is a drainage facility that the county has ownership and maintenance responsibility for due to its age and previous work and repairs made in the past.

IMPLICATION OF NOT DOING THE PROJECT(S): Damage to private property due pipe failure causing erosion of shoreline bank

LINKS TO OTHER PROJECTS OR FACILITIES: N/A.

CHAPTER 5 – TRANSPORTATION

Thurston County is responsible for maintaining over 1,000 miles of roads and associated facilities and 109 bridges. The capital facilities program attempts to meet the demands as the population grows.

Existing Inventory

Thurston County's roadway network is principally made up of County roads as well as state highways, such as I-5, SR 101, SR 8, SR 12, and SR 507, which provide intercity and interstate connections. Table 6-1 depicts the inventory of County roadways by functional classification.

Table 5-1 Existing Transportation Facilities

Facility Name	Location	Capacity or size (miles)
Rural Minor Arterial	County-Wide	14.467
Rural Major Collector	County-Wide	225.549
Rural Minor Collector	County-Wide	53.630
Urban Principal Arterial	County-Wide	7.308
Urban Minor Arterial	County-Wide	34.667
Urban Collector	County-Wide	17.901
Bridges	County-Wide	109
Bike Lanes - As upgrades are made to any road above local access, paved shoulders are added which provide space for pedestrian and bicycle use.		

The County Public Works Transportation Division also maintains the following inventories:

- Traffic Sign Inventory
- Guardrail Inventory
- Bridge Index (summary of bridge conditions)
- Pavement Management Program (pavement condition survey)
- Thurston County Barrier Culvert Inventory (fish passage)

Future Needs

The Chapter 5 Transportation of the Thurston County Comprehensive Plan sets level of service (LOS) standards for county roads and associated facilities. The Six-Year Transportation Improvement Program (TIP) specifies the transportation capital program in accordance with the adopted Comprehensive Plan and provides descriptions of each project.

Proposed Improvement Projects

The county plans to expend approximately \$89.8 million on transportation projects over the next six-year planning period. These projects are improvements or additions to transportation facilities such as roads, bridges, sidewalks, bike lanes, and other roadway features that have been prioritized to meet population demands and within the county budget. The categories below describe the types of projects to be completed. The TIP provides more details about each proposed project and can be found on the Public Works website.

Bridge projects are typically selected by using the State of Washington Inventory of Bridges and Structures (SWIBS) database. The database analyzes the structural adequacy and safety of the bridge, its serviceability and functional obsolescence, and how essential it is for public use. The State Bridge Committee selects bridges based on the SWIBS criteria for available federal funding.

Culvert Projects include those culverts that are in need of repair and/or replacement based upon condition, maintenance history and other criteria.

Design Standard Providing greater lane width, improve roadway curves, slope flattening or increase load carrying capacity on new road construction projects. These does not typically do add lanes except as needed for safety or capacity at certain intersections.

Fish Passage Enhancements that are fish passage barriers or deteriorating culverts are ranked in their order of benefits to salmonid using the Salmon and Steelhead Enhancement and Restoration (SSHEAR) metrology developed by Washington Department of Fish and Wildlife (WDFW). Other priority methods may be used to secure funding depending on the funding opportunities.

Non-Motorized Improvements: Includes the construction of new sidewalks, crosswalks, safe routes to school, and accessibility improvements.

Roadway Capacity improvements are those that assure transportation infrastructure is available to meet demand created by new development as required by the Growth Management Act. County concurrency projects include those not addressed by developers and primarily consist of projects identified as regional needs in the Thurston Regional Transportation Plan, 20-year Transportation Project List contained herein.

Road Preservation considers the inventory of visual pavement distress/cracking, traffic volumes and other factors to rate the pavement. Asphalt overlays are considered a restoration to the roadway versus routine maintenance such as patching or liquid asphalt sealing of the pavement surface.

Safety Improvements includes a variety of investments that are intended to support the goals outlined in the Washington State Strategic Highway Safety Plan, Target Zero. These could include spot improvements such as turn lanes at an intersection or systemic investments made throughout the roadway network. This category also includes repair of compromised roadways where it is determined unsafe to use due to natural disaster, such as floods, mudslides, bank erosion.

Programs include miscellaneous projects, studies, culverts and small bridge improvements and other more minor improvements.

Table 5-2 Transportation Proposed Projects and Funding

REVENUES FOR PROJECTS							
Fund Source	2022	2023	2024	2025	2026	2027	6-Yr. Total
County Roads Fund	\$5,144,320	\$4,203,278	\$5,809,333	\$5,913,300	\$5,080,000	\$5,110,000	\$31,260,231
Transportation Improvement Board	\$1,633,700	\$1,366,300	\$0	\$2,800,000	\$0	\$0	\$5,800,000
Transportation Impact Fees	\$2,192,300	\$866,400	\$0	\$0	\$0	\$0	\$3,058,700

Legend:	Completed Projects:
Bic-Ped - Federal Highway Bicycle-Pedestrian Grant	Mullen Road Phase 1 - Lacey CL to Carpenter Rd
BRAC - Federal Bridge Replacement Fund	Reed Rd Bridge R-3
CRF - County Roads Fund	2018 HSIP
HSIP - Highway Safety Improvement Program	Gate Rd Fish Passage
Local City	N-1 Bridge Repair
Dev - Developer	Chein Hill (Old 99) Repair
NHS - National Highway Safety Grant	2021 Preservation Program Overlay
PIF - Park Impact Fees	Carpenter Rd Wall Barrier
RAP - Rural Arterial Program	
REET - Real Estate Excise Tax Second Quarter	Revised Project Timing:
STBG - Surface Transportation Block Grant	Yelm Hwy & Meridian Rd SE
STP - Surface Transportation Program	Lagito/Spurgeon Fish Passage
TIB - Transportation Improvement Board	Vail Rd SE Improvements Phase 2 (138th Ave SE to 153rd Ave SE)
TIF - Transportation Impact Fees	
WSDOT - WA Dept. of Transportation Direct Appropriation	Dropped Projects:
Light grey shading, normal font - closeout project	Mullen Road Overheight Warning
Medium grey shading, bold font - construction project	Old Highway 99 Rural Capacity Project
Black shading, white font - engineering project	Pacific Ave and Steilacoom Rd. NE Intersection Improvement
	Sargent Rd SW Urban Upgrade
	Steilacoom Rd. Improvements Phase 2 (SR 510 to Hawks Glen DR)
	French Rd NW at Butler Creek Culvert Replacement
	Boston Harbor Rd NE at Adams Creek Culvert Replacement

MULLEN RD UPGRADE PHASE 1
(Lacey City Limits to Carpenter Rd)

DESCRIPTION:

Widen and reconstruct roadway to provide dedicated bike lane, sidewalks, lighting and crosswalks. Roundabout at Carpenter Rd. and a left turn lane on to Mullen Rd. at Glen Terra Dr.

LOCATION:

Lacey UGA - Mullen Rd SE, City of Lacey limitsto Carpenter Rd SE

JUSTIFICATION (Need/Demand):

Improves safety, multi-modal needs, congestion relief, and accommodatesfuture traffic demands. Also provides safe routes to the elementary schoolslocated at each end of the project.

IMPLICATION OF NOT DOING THE PROJECT: Congestion and no sidewalks for school children.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

YELM HIGHWAY AND MERIDIAN RD INTERSECTION IMPROVEMENTS

DESCRIPTION:

Construct a roundabout at the intersection of Yelm Highway and Meridian Rd.

LOCATION:

Lacey UGA – Yelm Highway SE and Meridian Rd SE Intersection

JUSTIFICATION (Need/Demand): This project is needed to improve the safety and mobility for the Yelm Hwy and Meridian Rd intersection. Current operations do not meet adopted Level of Service requirements.

IMPLICATION OF NOT DOING THE PROJECT: Increased traffic delays and no change to other conditions.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

VAIL RD SE IMPROVEMENTS PHASE 2
(138TH AVE SE TO 153RD AVE SE)

DESCRIPTION:

Install paved shoulders, recoverable roadside slopes in adjacent swales, turn lanes, lighting at the Vail Rd and 153rd intersection and pavement upgrades.

LOCATION:

Vail Rd SE, 138th Ave SE to 153rd Ave SE

JUSTIFICATION (Need/Demand): Improve roadway pavement conditions and ensuring the road meets current design standards and accommodating for future traffic demand.

IMPLICATION OF NOT DOING THE PROJECT: No shoulder for increasing number of pedestrian and bicyclists to use. Continued pavement deterioration.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

CARPENTER RD BARRIER

DESCRIPTION:

Replace aluminum pedestrian rail with a cast concrete barrier.

LOCATION:

Carpenter Rd SE, Pacific Ave SE to Martin Way E

JUSTIFICATION (Need/Demand): Supports system safety, maintenance, and preservation.

IMPLICATION OF NOT DOING THE PROJECT: Pedestrian and roadside facilities not repaired.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A.

**MARVIN RD UPGRADE PHASE 2
(MULLEN RD INTERSECTION)**

DESCRIPTION:

Construct a roundabout at the intersection of Marvin Rd and Mullen Rd.

LOCATION:

Marvin Rd SE & Mullen Rd SE Intersection

JUSTIFICATION (Need/Demand): This project is needed to improve the safety and mobility for the intersection of Marvin Rd and Mullen Rd. Current operations do not meet adopted Level of Service requirements.

IMPLICATION OF NOT DOING THE PROJECT: Increase in congestion and, due to concurrency requirements, new development may not be allowed.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

JOHNSON POINT RD & HAWKS PRAIRIE RD INTERSECTION IMPROVEMENTS

DESCRIPTION:

Construct a roundabout at the intersection of Johnson Point Rd, Hawks Prairie Rd and South Bay Rd.

LOCATION:

Lacey UGA - Johnson Point Rd NE, South Bay Rd NE & Hawks Prairie Rd NE Intersection

JUSTIFICATION (Need/Demand): Traffic has increased, and new development continues to add more traffic. The roundabout will provide for safer and more efficient turning movements as traffic increases.

IMPLICATION OF NOT DOING THE PROJECT: N/A

LATIGO ST AT SPURGEON CREEK & CHEHALISWESTERN TRAIL

DESCRIPTION:

Improve fish passage conditions by installing larger culverts or bridge, remove fish barriers and enhance aquatic environment.

LOCATION:

Latigo St SE, 0.15 mile S of 89th Ave SE

JUSTIFICATION (Need/Demand): Remove fish passage barriers under roadway and trail systems, open up habitat, improve road crossings by upgrading culverts and bridges.

IMPLICATION OF NOT DOING THE PROJECT: N/A

SARGENT RD SW - US 12 TO OLD HWY 99
(SOUTH GRAND MOUND UGA IMPROVEMENTS)

DESCRIPTION:

Widen and rehabilitate existing roadway, construct urban improvements such as lighting, sidewalks and bike lanes.

LOCATION:

Sargent Rd SW, Old Hwy 99 S to US 12

JUSTIFICATION (Need/Demand): With the upcoming installation of a roundabout at US 12 and Sargent this portion of roadway will see a significant increase in traffic between US 12 and Sargent Rd.

IMPLICATION OF NOT DOING THE PROJECT: N/A

PACIFIC AVE SAFETY

DESCRIPTION:

Construct ADA accessible crossings through the installation of pedestrian refuge islands, by improving curb ramps and improving sidewalks.

LOCATION:

Pacific Ave SE, Carpenter Rd SE to Union Mills Rd SE

JUSTIFICATION (Need/Demand): To install ADA compliant pedestrian crossings and to improve safety for all users.

IMPLICATION OF NOT DOING THE PROJECT: Pedestrian and bicycle facilities at these locations will not accommodate the needs of all users.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

OLD HWY 99 & TILLEY RD
INTERSECTION IMPROVEMENTS (HSIP)

DESCRIPTION:

Widen and reconstruct roadway to provide additional turn lanes, illumination and drainage.

LOCATION:

Old Hwy 99 S and Tilley Rd SE Intersection

JUSTIFICATION (Need/Demand): Enhance driver safety at the intersection of Old Hwy 99 and Tilley Rd by providing a separation between turning vehicles and through traffic.

IMPLICATION OF NOT DOING THE PROJECT: Will not improve the safety for left turning drivers on Old Hwy 99 SE.

US 12 URBAN IMPROVEMENTS PHASE 1
(OLD HWY 99 TO W UGA BOUNDARY)

DESCRIPTION:

Construct a single lane roundabout at the intersection of US 12 and Sargent Rd. Designed with the ability to expand in the future to two lanes on the east and west approaches.

LOCATION:

US 12 & Sargent Rd SW Intersection

JUSTIFICATION (Need/Demand): Adding an access to US 12 in Grand Mound at Sargent Rd will improve traffic circulation and relieve traffic congestion at US 12, Old Hwy 99 and Elderberry intersection.

IMPLICATION OF NOT DOING THE PROJECT: Increased congestion at the intersection of Old Highway 99, Elderberry and US 12 which could impact development and safety.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

MARVIN RD UPGRADE PHASE 1 (22ND AVE TO UNION MILLS RD)

DESCRIPTION:

Reconstruct roadway to provide 2 to 3 lanes, bike lanes, pedestrian refuge islands, planter strips, medians, sidewalks, lighting and drainage. Intersection improvements include a roundabout at 19th Ave and access control at Union Mills Rd.

LOCATION:

Marvin Rd from 22nd Ave to Union Mills Rd SE

JUSTIFICATION (Need/Demand): This project is needed to improve the safety and mobility for the Marvin Rd corridor. Current operations do not meet adopted Level of Service requirements.

IMPLICATION OF NOT DOING THE PROJECT: Increase in congestion and, due to concurrency requirements, new development may not be allowed.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

**MARVIN RD UPGRADE PHASE 3-
(UNION MILLS RD TO PACIFIC AVE)**

DESCRIPTION:

Reconstruct roadway to provide 2 to 3 lanes, bike lanes, pedestrian refuge islands, planter strips, medians, sidewalks, lighting and drainage.

LOCATION:

Marvin Rd SE, Union Mills SE to Pacific Ave SE

JUSTIFICATION (Need/Demand): This project is needed to improve the safety and mobility for the Marvin Rd corridor. Current operations do not meet adopted Level of Service requirements.

IMPLICATION OF NOT DOING THE PROJECT: Increase in congestion and, due to concurrency requirements, new development may not be allowed.

LITTLEROCK RD & 113TH AVE SW BRIDGE AND INTERSECTION IMPROVEMENTS

**DESCRIPTION:**

Replace Littlerock Rd. Bridge over Blooms Ditch (L-5) and improve intersection conditions at the intersection of 113th Ave. and Littlerock Rd.

LOCATION:

Littlerock Rd SW, 113th Ave SW to Blooms Ditch

JUSTIFICATION (Need/Demand): A left hand turn lane is needed to improve the safety and operations of the Littlerock Rd and 113th Ave Intersection. The L-5 bridge is similar in construction to another bridge on Littlerock Rd (L-4, Salmon Crk) that failed and needs to be replaced.

IMPLICATION OF NOT DOING THE PROJECT: Continued safety, capacity and preservation needs.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

2024 COUNTY ROAD SAFETY (HSIP)

DESCRIPTION:

Install improvements including signing, placement markings, guardrails and lighting. This aligns with the Washington State Target Zero plan to reduce fatal and serious injuries collisions to zero by the year 2030.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand): Improve safety and performance of the transportation system. Meet the requirements of WSDPT's Target Zero plan.

IMPLICATION OF NOT DOING THE PROJECT: No improvement in Thurston County roadway safety and no reduction in fatal and serious crash rates.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

GATE ROAD CULVERT REPLACEMENTS

DESCRIPTION:

Improve fish passage conditions by installing larger structures and enhancing aquatic environment at two locations along Gate Rd at a tributary to Mima Creek, near Mima Rd.

LOCATION:

Gate Road SW, 2.75 miles E of Moon Rd SW

JUSTIFICATION (Need/Demand): The culverts under the roadway are undersized and in poor condition.

IMPLICATION OF NOT DOING THE PROJECT: Continued degradation of the culverts and lack of accessibility for fish passage.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

EVERGREEN PKWY & MUD BAY RD INTERCHANGE IMPROVEMENTS

DESCRIPTION:

Construct two roundabouts at the intersections of Mud Bay Rd NW and the Evergreen Parkway NW off-ramps.

LOCATION:

Mud Bay Rd NW and Evergreen Parkway NW Intersections

JUSTIFICATION (Need/Demand): The left turning movements from the NB Evergreen Pkwy off-ramp and SB Evergreen Pkwy off-ramp are currently performing at a level of service (LOS) of E and D respectively. This LOS is at or below the acceptable level mandated by the Growth Management Act. Project will also improve pedestrian, bicycle, and ADA facilities.

IMPLICATION OF NOT DOING THE PROJECT: Increased traffic delays during peak hours.

BLACK LAKE BELMORE RD BRIDGE APPROACH REPAIR

DESCRIPTION:

Construct a timber pile embankment to support roadway and bridge approach slabs from future settlement.

LOCATION:

Black Lake-Belmore Rd SW over Black Lake Ditch

JUSTIFICATION (Need/Demand): Improve safety for all users at this location. These approaches will continue to settle and operations crew routinely need to install asphalt to provide a drivable and safe surface. This adds weight which leads to further settlement.

IMPLICATION OF NOT DOING THE PROJECT: Not improving the safety to the Thurston County community.

OLD HWY 99 AT INTERSECTIONS OF SARGENT RD AND 201ST AVE

DESCRIPTION:

Construct a roundabout at the intersection of Old Hwy 99 and 201st Ave. Construct a right-in right-out intersection treatment at the intersection of Old Hwy 99 and Sargent Rd.

LOCATION:

Old Highway 99 at Sargent Rd and 201st Ave Intersections

JUSTIFICATION (Need/Demand): This will improve traffic circulation and accommodate the additional traffic coming from the new US12 and Sargent Road access safely and efficiently.

IMPLICATION OF NOT DOING THE PROJECT: Increased congestion at the intersection of Old Highway 99 with 201st Ave and Sargent Road.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

FISH PASSAGE ENHANCEMENT PROGRAM

DESCRIPTION:

Improve fish passage conditions by installing larger culverts, remove fish barriers and enhance aquatic environment.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand): There are over 300 existing culverts located within Thurston County that have been identified as fish barriers by WDFW.

IMPLICATION OF NOT DOING THE PROJECT: Fish barriers will continue to block the passage of anadromous fish and other materials such as sediment and large woody debris unless addressed. There is also potential litigation concerns similar to the 2013 state injunction.

YELM HWY SE AND PACIFIC AVE SE PEDESTRIAN IMPROVEMENTS PHASE 2

DESCRIPTION:

Construct ADA accessible crossings through the installation of pedestrian refuge islands, by improving curb ramps and improving sidewalks.

LOCATION:

Yelm Hwy SE, Rich Rd SE to Lacey City Limits

JUSTIFICATION (Need/Demand): Improve the safety for bicyclists and pedestrians on these busy corridors.

IMPLICATION OF NOT DOING THE PROJECT: No safety improvements for bicyclists and pedestrians using these busy corridors.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

113TH AVE SE (SR 121/TILLEY RD S TO MCCORKLE RD SE)

DESCRIPTION:

Widen/rehabilitate pavement, construct bicycle lanes and sidewalks, improve drainage, lighting and pedestrian safety. Incorporates sustainable features such as rain gardens.

LOCATION:

113th Ave SE, Tilley Rd S to McCorkle Rd SE.

JUSTIFICATION (Need/Demand): This project will address pavement preservation and improve the roadway to meet design guidelines for safety, mobility and stormwater.

IMPLICATION OF NOT DOING THE PROJECT: Continued preservation needs.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

MCCORKLE RD SE 113TH AVE TO OLD HWY 99

DESCRIPTION:

Widen/rehabilitate pavement, construct bicycle lanes and sidewalks, improve drainage, lighting and pedestrian safety. Incorporates sustainable features such as rain gardens.

LOCATION:

McCorkle Rd SE, 113th Ave to Old Hwy 99 SE.

JUSTIFICATION (Need/Demand): This project will address pavement preservation and also improve the roadway to meet design guidelines for safety, mobility and stormwater.

IMPLICATION OF NOT DOING THE PROJECT: Continued preservation needs.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

LITTLEROCK RD SW CULVERT REPLACEMENT (NEAR SARGENT RD SW)

DESCRIPTION:

Replacement of a culvert under the roadway that is in poor condition and a barrier to fish passage.

LOCATION:

Littlerock Rd SW, 0.25 miles north of Sargent Rd SW

JUSTIFICATION (Need/Demand) The culvert under the roadway is undersized and in poor condition.

IMPLICATION OF NOT DOING THE PROJECT: Continued degradation of the pipe and lack of accessibility for fish passage.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

183RD AVE SW PHASE 1 - US 12 TO SARGENT RD

**DESCRIPTION:**

Widen and rehabilitate pavement, pave and widen shoulders, remove obstructions in the clear zone and replace bridge approach guardrail.

LOCATION:

183rd Ave SW, US 12 to Sargent Rd SW

JUSTIFICATION (Need/Demand): This project will address pavement preservation and improve the roadway to meet design guidelines for safety, mobility and stormwater.

IMPLICATION OF NOT DOING THE PROJECT: Preservation and safety project. Widen shoulders to reduce run-offroad collisions.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

HOUSTON DR AT HOUSTON CREEK FISH PASSAGE

DESCRIPTION:

This project will be for the removal of a fish passage barrier along a tributary to Eld Inlet at the crossing of Houston Dr. The existing 48" culvert is considered a barrier to fish and will need to be replaced to enhance fish passage.

LOCATION:

Houston Dr NE, at Dead End

JUSTIFICATION (Need/Demand): This project will be for the removal of a fish passage barrier along a tributary to Eld Inlet at the crossing of Houston Dr. The existing 48" culvert is considered a barrier to fish and will need to be replaced to enhance fish passage. The blockage is due a water surface drop. Rock weirs were originally placed to backwater the culvert, but they have either washed away or been buried. This project is ranked No. 10 on the TC Fish Passage Priority Array.

IMPLICATION OF NOT DOING THE PROJECT: Will continue to limit the passage of anadromous fish and other aquatic species, as well as terrestrial species. Will continue to limit sediment transport, negating a healthy stream. Will continue to present a blockage for large woody debris, which will increase maintenance costs over the life of the culvert. Will continue to limit riparian management zone function (i.e. tree growth), limiting shade for cooler water temps. Potential litigation by the tribes, similar to the WSDOT injunction.

DRAHAM ST AT WOODLAND CREEK FISH PASSAGE

DESCRIPTION:

This project will be for the removal of a fish passage barrier along Woodland Creek at the crossing of Draham Street NE. The existing 9.5-foot culvert is considered a barrier to fish and will need to be replaced to enhance fish passage.

LOCATION:

Draham St SE, 0.1 mile S of 20th Ln NE

JUSTIFICATION (Need/Demand): The existing culvert has been identified as a fish barrier by WDFW.

IMPLICATION OF NOT DOING THE PROJECT: The fish barrier will continue to block the passage of anadromous fish and other materials such as sediment and large woody debris unless addressed. There is also potential litigation concerns like the 2013 state injunction.

COUNTRY CLUB ROAD NW AT GREEN COVE CREEK CULVERT REPLACEMENT

DESCRIPTION:

Replace a failing, undersized culvert with a structure that meets current fish passage requirements and repairs to the road required by the culvert replacement.

LOCATION:

Country Club Road NW at Green Cove Creek

JUSTIFICATION (Need/Demand): The culvert under the roadway is undersized and in failing condition.

IMPLICATION OF NOT DOING THE PROJECT: Continued degradation of the culvert, jeopardizing the integrity of the road and continued lack of accessibility for fish passage.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

SHAWN DR AT BEATY CREEK FISH PASSAGE

DESCRIPTION:

This project will be for the removal of a fish passage barrier along a tributary to Dempsey Creek at the crossing of Shawn Drive. The existing 36" culvert is considered a barrier to fish and will need to be replaced to enhance fish passage.

LOCATION:

Shawn Dr SW, 0.1 mile SE of Delphi Rd SW

JUSTIFICATION (Need/Demand): This enhancement would open roughly three quarters of a mile of salmon habitat. An alternative analysis will be performed to determine the best crossing structure. This section of road has an ADT of 240. The neighbor stated he has seen fish in the stream every year since moving in years ago. It is anticipated that the design and construction phases of this project will be funded through REET.

IMPLICATION OF NOT DOING THE PROJECT: Will continue to limit the passage of anadromous fish and other aquatic species, as well as terrestrial species. Will continue to limit sediment transport, negating a healthy stream. Will continue to present a blockage for large woody debris, which will increase maintenance costs over the life of the culvert. Will continue to limit riparian management zone function (including tree growth because the velocity of the water doesn't allow for tree establishment), limiting shade for cooler water temps. Potential litigation by the tribes, similar to the WSDOT injunction.

61ST AVE AT FRYE COVE TRIBUTARY FISH PASSAGE

DESCRIPTION:

This project will be for the removal of a fish passage barrier along a tributary to Eld Inlet at the crossing of 61st Ave. The existing 72" culvert is considered by WDFW a barrier to fish due to steep slope and will need to be replaced to enhance fish passage.

LOCATION:

61st Ave NW, 0.28 mile E of Young Rd NW

JUSTIFICATION (Need/Demand): This enhancement would open roughly half of a mile of salmon habitat. An alternative analysis will be performed to determine the best crossing structure. This section of road has an ADT of 260. This culvert has a history of maintenance issues, including clogging of the inlet, and flooding of the adjacent banks. It is anticipated that the design and construction phases of this project will be funded through

IMPLICATION OF NOT DOING THE PROJECT: Will continue to limit the passage of anadromous fish and other aquatic species, as well as terrestrial species. Will continue to limit sediment transport, negating a healthy stream. Will continue to present a blockage for large woody debris, which will increase maintenance costs over the life of the culvert. Will continue to limit riparian management zone function (i.e. tree growth), limiting shade for cooler water temps. Potential litigation by the tribes, similar to the WSDOT injunction.

THOMPSON CREEK RD AT THOMPSON CREEK FISH PASSAGE

DESCRIPTION:

This project will be for the removal of a fish passage barrier along Thompson Creek at the crossing of Thompson Creek Road SW. The existing 11-foot culvert is considered a barrier to fish and will need to be replaced to enhance fish passage.

LOCATION:

Thompson Creek Road SW, 0.28 mile N of Lewis County border

JUSTIFICATION (Need/Demand): The existing culvert has been identified as a fish barrier by WDFW.

IMPLICATION OF NOT DOING THE PROJECT: The fish barrier will continue to block the passage of anadromous fish and other materials such as sediment and large woody debris unless addressed. There is also potential litigation concerns similar to the 2013 state injunction.

STEAMBOAT ISLAND RD BRIDGE RAIL AND PILE CAP REPAIR

**DESCRIPTION:**

Replace guardrail and rehab pile caps.

LOCATION:

Steamboat Island Rd NW over Puget Sound

JUSTIFICATION (Need/Demand): The problem above creates a concern for the safety of users of this bridge. As the guardrail continues to corrode, it's structural integrity lowers, offering less protection to vehicles that may run off the traveled way. The spalling and cracking on the concrete pile caps create a structural concern for the bridge as it continues.

IMPLICATION OF NOT DOING THE PROJECT: . As the guardrail continues to corrode, it's structural integrity lowers, offering less protection to vehicles that may run off the traveled way. The spalling and cracking on the concrete pile caps creates a structural concern for the bridge as it continues to age.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

COUNTYWIDE ELECTRICAL SERVICES PROJECT (HSIP)

**DESCRIPTION:**

Provide street lighting and channelization improvements at several locations throughout the county.

LOCATION:

Countywide

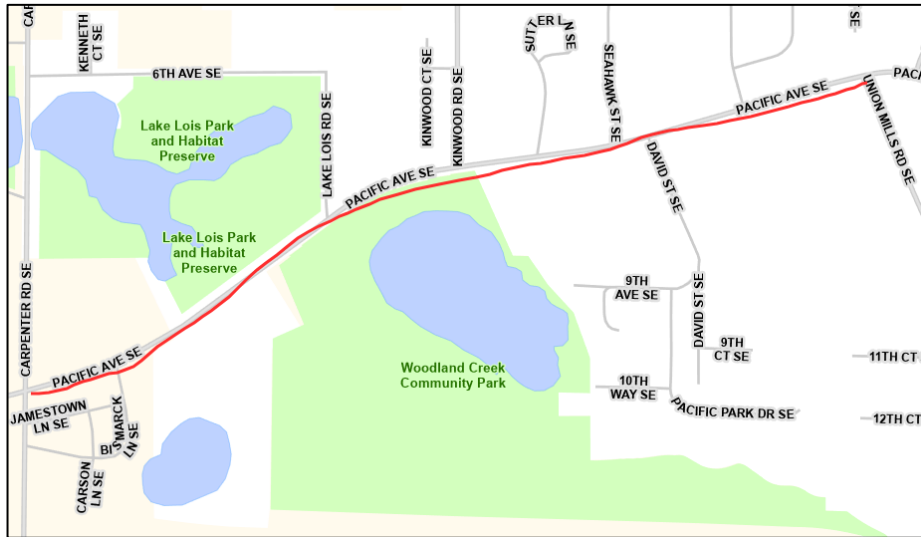

JUSTIFICATION (Need/Demand): The program preserves, maintains, and replaces county bridges.

IMPLICATION OF NOT DOING THE

PROJECT: Addressing fatal and serious injury collisions supports the County's Strategic Plan initiative of improving the community health, wellness and safety of Thurston County. Not addressing this issue could affect County liability in the event these collisions continue.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

PACIFIC AVE SE PAVEMENT PRESERVATION – LACEY CITY LIMITS TO UNION MILL RD SE

DESCRIPTION:

Replace the top layer of existing pavement with fiber reinforced asphalt and upgrade the existing pedestrian facilities to ADA requirements.

LOCATION:

Pacific Ave SE, Lacey City Limits to Union Mills Rd.

JUSTIFICATION (Need/Demand): This portion of Pacific Ave needs pavement rehabilitation and ADA improvements. Continued deterioration will lead to a much more costly full reconstruction project.

IMPLICATION OF NOT DOING THE PROJECT: Much more expensive project in the future. Pedestrian facilities won't meet ADA requirements.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

**YELM HWY SE PAVEMENT PRESERVATION –
RICH RD SE TO LACEY CITY LIMITS**

DESCRIPTION:

Replace the top layer of existing pavement with fiber reinforced asphalt and upgrade the existing pedestrian facilities to ADA requirements.

LOCATION:

Yelm Highway SE, Rich Rd SE to Lacey City Limits.

JUSTIFICATION (Need/Demand):

This portion of Yelm Hwy needs pavement rehabilitation and ADA improvements. Continued deterioration will lead to a much more costly full reconstruction project.

IMPLICATION OF NOT DOING THE PROJECT: Much more expensive project in the future. Pedestrian facilities won't meet ADA requirements.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

ROAD PRESERVATION PROGRAM

DESCRIPTION:

Perform preservation and minor rehabilitation of various roadway surfaces to extend the life of road sections 10-20 years.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand): Roadway preservation techniques and minor rehabilitation continuously maintain road surface conditions in compliance with WAC 136-70-010.

IMPLICATION OF NOT DOING THE PROJECT: Continued deterioration of roadway infrastructure and increased maintenance costs.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

BRIDGE PROGRAM

DESCRIPTION:

Projects in this program keep bridges open and safe for public use. Projects include bridge installment, enhancement, and replacement. An annual Bridge Index Report is required.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand): The program preserves, maintains, and replaces county bridges.

IMPLICATION OF NOT DOING THE PROJECT: Reduce movement of goods, services, and people throughout the county, impairing economic development.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

CULVERT PROGRAM

DESCRIPTION:

Project in this program includes culvert improvement projects designed to install, enhance, or rehabilitate county culverts.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand):

Minimize roadway flooding by improving the condition of county culverts.

IMPLICATION OF NOT DOING THE PROJECT: Roadway flooding, impaired drainage, and damage to roadways.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

AMERICAN WITH DISABILITIES ACT (ADA) IMPROVEMENTS

DESCRIPTION:

Project in this program make curb ramp and sidewalk improvements to align with the Americans with Disabilities Act (ADA).

LOCATION:

Countywide

JUSTIFICATION (Need/Demand):

Improves pedestrian and bicyclist facilities for all users. Improvements are identified in the ADA Transition Plan –

PW supplement.

IMPLICATION OF NOT DOING THE PROJECT: Thurston County will not be compliant with federal ADA requirements or with the recently completed local TCPW supplement of the ADA Transition Plan. This could result in the loss of future federal funding for public works projects. Not pursuing this effort will be inconsistent with the County's Strategic Plan initiative of improving the community health, wellness and safety of Thurston County.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

THURSTON COUNTY PEDESTRIAN AND BICYCLE PROGRAM

DESCRIPTION:

Projects in this program seek to improve conditions for biking and walking, and to protect and preserve community environment and character.

LOCATION:

Countywide

JUSTIFICATION (Need/Demand):

Improves multi-modal use and access to the county roadway system. Increased

multi-modal use decreases need to widen roadways and other costly roadway work.

IMPLICATION OF NOT DOING THE PROJECT: No change in existing conditions.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

CHAPTER 6 – COUNTY OWNED WATER AND SEWER SYSTEMS

The county owns three water systems (Boston Harbor, Grand Mound, and Tamoshan) and 5 sewer systems (Grand Mound, Boston Harbor, Tamoshan/Beverly Beach, Olympic View, and Woodland Creek Estates). Woodland Creek Estates Sanitary Sewer is located within the City of Lacey Urban Growth Area and is maintained by the City of Lacey.

Table 6-1 Existing County Water and Sewer Inventory

Facility Name	Location	# of Connections ¹
SEWER SYSTEMS		
Grand Mound	Southwest	350
Boston Harbor	North	264
Tamoshan / Beverly Beach	Cooper Point	117
Olympic View	NW	27
WATER SYSTEMS		
Grand Mound	Southwest	388
Boston Harbor	North	280
Tamoshan	Cooper Point	95

¹ One connection to a system can represent more than one Equivalent Residential Unit (ERU). Numbers do not include pending connections.

Future Needs

A sewer system level of service standard of capacity to provide sewer collection and wastewater treatment services and a water system level of service standard of capacity to provide domestic water and fire flow services for residential, commercial, and industrial uses measured in Equivalent Residential Units (ERU). The minimum ERU for rural is 900 cf/mo and urban is 700 cf/mo. Additionally, sewer systems shall meet federal, state, and local permit requirements for receiving water standards, and water systems shall meet federal, state, and local drinking water standards.

Based on project population growth several new infrastructure improvement projects in the Boston Harbor, Tamoshan and Grand Mound service areas are proposed as well as multiple additional projects to maintain the required level of service.

Proposed Projects

Improvement projects and associated facilities, totaling more than \$11.6 million, are proposed over the six-year planning period to meet or maintain level of service. These costs would be paid for by utility revenue, Real Estate Excise Tax, and loans as shown in Table 6-2.

Table 6-2 Water and Sewer Proposed Capital Projects and Funding

REVENUES FOR PROJECTS							
Fund Source	2022	2023	2024	2025	2026	2027	6-Yr. Total
Water & Sewer Utility Rates	\$661,000	\$1,776,000	\$969,000	\$1,557,000	\$1,336,000	\$700,000	\$6,999,000
Real Estate Excise Tax	\$540,000	\$2,640,000	\$0	\$0	\$0	\$0	\$3,180,000
Loans/Grants	\$0	\$0	\$0	\$0	\$0	\$0	\$0
TOTALS	\$1,201,000	\$4,416,000	\$969,000	\$1,557,000	\$1,336,000	\$700,000	\$10,179,000

EXPENDITURES FOR PROJECTS									
Project Name	Fund Source	Urban Growth Area	2022	2023	2024	2025	2026	2027	6-Yr. Total

SCADA Control System Evaluation/Upgrades

DESCRIPTION: Supervisory Control and Data Acquisition (SCADA) system needs to be upgraded due to communication issues and equipment age. The Radio SCADA system will be updated to allow continued operation and compliance and will aid in ongoing system optimization. Without proper communication and controls the system will not operate properly.

LOCATION: Multiple. 20248 Grand Mound Way, Grand Mound WA, 2349 63rd NW.,

JUSIFICATION (Need/Demand): Without proper communication and controls the system will not operate properly. Upgrades will allow for greater remote access and reduce the demand for staff to physically report to all alarms.

IMPLICATION OF NOT DOING THE PROJECT(S): The regulatory agencies may impose operational violations, fines, and could impose a moratorium on growth to the area if the county does not take steps to maintain current level of service and comply with the operational permits.

LINKS TO OTHER PROJECTS OR FACILITIES:

Grand Mound New Water Sources

DESCRIPTION: Evaluation, land acquisition, and installation of future Wells #3 and #4 as new water sources.

LOCATION: To be decided as part of final well siting evaluation.

JUSIFICATION (Need/Demand): This well site is required to meet water system demand for the twenty- year planning horizon.

IMPLICATION OF NOT DOING THE PROJECT(S): Inadequate pump capacity to meet demand. Reduced economic activity in the Grand Mound.

LINKS TO OTHER PROJECTS OR FACILITIES: Grand Mound Highway 99 to Highway 9 Sewer main extension/Grand Mound Water Main Extension.

Grand Mound Wastewater Treatment Plant Second Oxidation Ditch

DESCRIPTION: Design and construct new oxidation ditch, new disinfection equipment, and related components.

LOCATION: 20248 Grand Mound Way, Grand Mound, WA

JUSIFICATION (Need/Demand): The Grand Mound WWTP must be expanded in order to serve growth expected within the Grand Mound UGA, and to achieve compliance with regulatory compliance NPDES No.WA0042099.

IMPLICATION OF NOT DOING THE PROJECT(S):

The Department of Ecology may levy violations, fines, and may impose a moratorium on growth to the area if the County does not comply with the National Pollution and Discharge Elimination System (NPDES) permit of planning and scheduling for capital improvements to maintain capacity and achieve the effluent limitation of the NPDES permit.

LINKS TO OTHER PROJECTS OR FACILITIES: Grand Mound Wastewater Treatment Plant Expansion for Class A Reclamation

Grand Mound Wastewater Treatment Plant Expansion for Class A Reclamation

DESCRIPTION: Expand plant capacity to produce Class A reclaimed water. This was a condition of water rights acquisition. The timing of the improvements is dependent on the use of the water rights.

LOCATION: 20248 Grand Mound Way, Grand Mound, WA

JUSIFICATION (Need/Demand):
Department of Ecology condition required as part of water rights acquisition.

IMPLICATION OF NOT DOING THE PROJECT(S): Department of Ecology may issue violations, and levy fines. The County may lose water rights for the Grand Mound Area.

LINKS TO OTHER PROJECTS OR FACILITIES: Grand Mound Waste Water Treatment Plant Second Oxidation Ditch.

Tamoshan Water Treatment Unit Process Assessment/Upgrade

DESCRIPTION: Provide filtration treatment to the current water system to meet DOH requirements.

LOCATION: 2349 63rd NW.

JUSIFICATION (Need/Demand): The Tamoshan water treatment does not currently use filtration. Installation of a filtration system will ensure full year-round compliance with primary and secondary treatment standards.

IMPLICATION OF NOT DOING THE PROJECT(S):

Continue distributing water that may approach allowable limits for primary and secondary treatment limits. Regulatory agency may levy violations, fines, and impose additional conditions to the operating permit.

LINKS TO OTHER PROJECTS OR FACILITIES:

Tamoshan Sewer and Water Infrastructure Improvement Program

DESCRIPTION: Develop a sewer and water infrastructure program to maintain, repair, and replace failed and aging infrastructure.

LOCATION: Tamoshan Service Area

JUSIFICATION (Need/Demand): The existing infrastructure was constructed over 20 years ago and is reaching its life expectancy.

IMPLICATION OF NOT DOING THE PROJECT(S): The water and sewer system may experience periodic disruptions in service to customers, a decreased treatment capacity and efficiency, and potential

violations of the operating permits, if infrastructure is not adequately maintained, repaired, and/or replaced prior to critical failure.

LINKS TO OTHER PROJECTS OR FACILITIES:

Boston Harbor Sewer & Water Infrastructure Improvement Program

DESCRIPTION: Develop a sewer and water infrastructure program to maintain, repair, and replace failed and aging infrastructure.

LOCATION: Boston Harbor Service Area

JUSIFICATION (Need/Demand):

The existing infrastructure was constructed is reaching or is already beyond its life expectancy.

IMPLICATION OF NOT DOING THE

PROJECT(S): The water and sewer system may experience periodic disruptions in service, a decreased treatment capacity and efficiency, and potential violations of the operating permits if infrastructure is not

adequately maintained, repaired, and/or replaced prior to critical failure.

LINKS TO OTHER PROJECTS OR FACILITIES:

Olympic View Sewer Infrastructure Improvement Plan

DESCRIPTION: Improve and expand community drainfield, modernize STEP Tank Pumps, Control Boxes, replace lids and construct new cover over electrical components.

LOCATION: Olympic View community, located on 85th AVE NW.

JUSIFICATION (Need/Demand): The existing STEP systems were installed over 15 years ago. Portions of the collection system need to be replaced due to the age and type of original pipe materials used. The drainfield soils and design are not ideal and would not be approved today. May be required to bring drainfield up to current

standards to meet DOH required permit.

IMPLICATION OF NOT DOING THE PROJECT(S): Increased cost to operate and maintain the Olympic View Utility

LINKS TO OTHER PROJECTS OR FACILITIES:

Asset Management Program

DESCRIPTION: Create a Geographic Information System (GIS) database of all county owned water and sewer assets and integrate that database into the County's asset management software, VueWorks.

LOCATION: Boston Harbor, Tamoshan, Olympic View and Grand Mound Service Areas

JUSTIFICATION (Need/Demand): There is no centralized and easy to query asset management program that staff can use to track, plan and coordinate utility operations, capital facilities planning, and respond to service requests. The water and sewer utilities cannot accurately determine the needs and the timely action (preventative or repair/replacement) of assets to prevent loss of service and or minimize capital expense.

IMPLICATIONS OF NOT DOING THE PROJECT(S): Less efficient and more costly operations of the County's water and sewer utilities.

LINKS TO OTHER PROJECTS OR FACILITIES: Public Works department wide asset management program

Boston Harbor Wastewater Treatment Plan Generator Replacement

DESCRIPTION: The existing generator was purchased used and is outdated, parts are difficult to find, repairs are more frequent and costly, and the unit is not efficient compared with newer units.

LOCATION: 7126 Boston Harbor Rd NE, Olympia, 98506

JUSIFICATION (Need/Demand):

This project will ensure reliable emergency backup equipment for our Wastewater Treatment Plant ensuring that a power failure does not result in loss of sewer service or possible impacts to residents of Boston Harbor.

IMPLICATION OF NOT DOING THE PROJECT(S): The emergency generator at Boston Harbor may fail during a power outage resulting in loss of sewer service and impacts to health and safety of residents.

LINKS TO OTHER PROJECTS OR FACILITIES:

Grand Mound No. 2 Clarifier Rebuild and Recoating

DESCRIPTION: Clarifier #2 at the Grand Mound Wastewater Treatment Plant is over 20 years old and requires refurbishment and repairs. Clarifier #1 was refurbished several years ago and now the same is needed for Clarifier #2. This is necessary to keep the Wastewater Treatment Plan operational at full capacity and to prevent an unanticipated failure of the system that could impact water quality and compliance with the plants National Pollution Discharge Elimination System (NPDES) permit requirements.

LOCATION: 20248 Grand Mound Way, Grand Mound, WA

JUSIFICATION (Need/Demand):

This project is a routine repair and refurbishment which will allow the Grand Mound Wastewater Treatment Plant to provide reliable treatment of sewerage from the Grand Mound Community.

IMPLICATION OF NOT DOING THE PROJECT(S): If this is not funded there is increased risk of a failure of Clarifier #2 and reduced capacity of the Grand Mound Wastewater Treatment Plant until such time as repairs are made. This could require shutting off sewer service to large customers in the Grand Mound area until repairs are made curtailing business and services.

LINKS TO OTHER PROJECTS OR FACILITIES:

Tamoshan 63rd Ave AC Pipe Watermain Replacement

DESCRIPTION: Project proposes to replace the existing asbestos concrete (AC) water main line. AC pipe has a lifespan of 50-70 years and is prone to catastrophic failures when it fractures. This pipe is nearing the end of its lifespan and needs to be replaced. Additionally, decaying AC pipes can introduce asbestos into drinking water.

LOCATION: 63RD AVE NW, Olympia, WA 98502

JUSIFICATION (Need/Demand):
The existing infrastructure was constructed is reaching its life expectancy.

IMPLICATION OF NOT DOING THE PROJECT(S): If the watermain is not replaced until failure then the Tamoshan water system customers will experience a period of reduced water pressure and/or no water service to their homes until the pipe can be replaced.

LINKS TO OTHER PROJECTS OR FACILITIES:

CHAPTER 7 - GENERAL COUNTY GOVERNMENT FACILITIES

The 2019 inventory of the general government facilities that serves the county is 811,409 sq. ft. This inventory is shown below.

Table 7-1 Existing Inventory

Facility Name	Location	Capacity or size
Tilley Block Building	Tilley Rd	N/A
Tilley Sand Shed	Tilley Rd	3,363 sq ft
Tilley Bldg A-Administration	Tilley Rd	21,767 sq ft
Tilley Bldg B-Traffic	Tilley Rd	12,619 sq ft
Tilley Bldg C-Public Works	Tilley Rd	24,070 sq ft
Tilley Bldg D-Storage	Tilley Rd	11,400 sq ft
Tilley Bldg E-EOC	Tilley Rd	11,619 sq ft
Roads Littlerock Equip. Bldg.	Littlerock	936 sq. ft.
Roads Rainier Equip. Bldg.	Rainier	2,100 sq. ft.
Roads Rochester Equip. Bldg.	Rochester	2,100 sq. ft.
Heritage Hall	Fairground	9,120 sq. ft
Benoschek Building	Fairground	4,392 sq. ft
Deck Building	Fairground	2,560 sq. ft
Fir Building	Fairground	2,528 sq. ft

Future Needs

Chapter 6 of the Thurston County Comprehensive Plan does not contain level of service standards for general government facilities. Maintenance and Space Needs Assessment Plans inform the projects needed and prioritization, based on goals and policies supportive of providing safe, secure, accessible, and functional County facilities.

Proposed Improvements

Improvement and maintenance projects on general government facilities and sites over the six-year planning period total approximately \$123 million as shown in table 7-2. General descriptions and location of the proposed projects can be found on pages below.

Table 7-2 General County Government Proposed Project Funding

REVENUES FOR PROJECTS	2022	2023	2024	2025	2026	2027	6-Yr. Total
Fund Source							
Bond-Future	\$500,000	\$5,000,000	\$45,000,000	\$0	\$0	\$0	\$50,500,000

TCIF: Trial Court Improvement Fund

Courthouse Building #3 Secured Entrance (25584)

DESCRIPTION: This project will potentially construct an expanded secured entry for Building #3, as recommended in the 2014 SNAP Study.

JUSTIFICATION (Need/Demand):

Project Scope- The Courthouse Campus was built in 1978 and at that time security and design needs were not the same as they are today. The entry and lobby area of Building 3 creates a choke point for security screening. This creates the possibility for a potential safety problem due to the confined area in which screening takes place.

LOCATION: 2000 Lakeridge Dr. SW, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

If the entry is not changed it will continue to cause safety risks for both the public and the staff creating a very stressful environment.

LINKS TO OTHER PROJECTS OR FACILITIES: Courthouse and Regional Administrative Building, Thurston County Courthouse Infrastructure Improvements, Building 3 Court Improvements

County-Wide Security Improvements (25571)

DESCRIPTION: Develop a plan and projects to assess, improve and standardize critical security infrastructure throughout County facilities for workplace and public safety.

Project Scope: Conduct the planning, design, installation, and configuration of standardized security systems and supporting infrastructure in order to meet needs of tenants at the following facilities in priority order: Courthouse Buildings 5 and 6; Emergency Services Center; Public Health Building; Family Justice Center; Fairgrounds, Coroner; Tilley Campus Buildings A through E. Conduct a needs assessment and develop a plan for proposed improvements. Identify viable funding resources.

Determine sequence and timeline for improvements. Advise County leaders in reviewing and/or establishing supporting operational policies and procedures. Project components may include:

- Door Access Control/Card Key Systems
- Duress Alarms & Mass Notification Systems
- Security Camera Systems
- Intrusion Detection Systems
- Minor Structural Modifications to Enhance Physical Security.

LOCATION: County facilities at 2400 Evergreen Park Drive, 926 24th Way, 2703 Pacific Avenue, and 412 Lilly Road in Olympia, 3054 Carpenter Road in Lacey, 2801 32nd Avenue in Tumwater, and 9605 Tilley Road in rural Thurston County.

JUSTIFICATION (Need/Demand): County facilities security systems and infrastructure have been added ad hoc as resources could be identified. The result is an inconsistent and incomplete patchwork of aging systems, equipment, and technologies that fail to meet contemporary security needs. Security incidents and drills have shown the need for better security systems and infrastructure. A plan to deploy more integrated and standardized security tools across County facilities is needed to assure public and employee safety. In 2015, the County completed a study to evaluate security vulnerabilities of certain Courthouse buildings and recommend operational and/or system improvements. This has informed projects in 2016-18 to improve security for Buildings 1-4 at the Courthouse and will inform other County-wide security improvements.

IMPLICATION OF NOT DOING THE PROJECT: Continuing risk of injury or possible loss of life to employees and the public; continued financial losses and service disruptions due to thefts and vandalism.

Fairgrounds Building Infrastructure Improvements (25560)

DESCRIPTION: This project will make building infrastructure improvements at the Thurston County Fairgrounds and Events Center.

JUSTIFICATION (Need/Demand):

Project Scope- Some Fairgrounds and Events Center buildings, structures, and amenities are aging and/or limited in their usability. The County and Fair Boards intend to make capital improvements that will enhance the ability of the site to host more events and increase overall revenue.

LOCATION: 3054 Carpenter Road SE, Lacey, WA 98503

IMPLICATION OF NOT DOING THE PROJECT(S):

The Fairgrounds would not have an improvement to the site which would improve its operations and usage, as well as its ability to generate revenue.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

Public Health Fire Sprinkler Repairs (25618)

DESCRIPTION:

This project is the repairs of the existing fire sprinkler system

JUSTIFICATION (Need/Demand):

Project Scope – This project would modify piping of the current fire sprinkler system and make other necessary repairs that are needed to be in compliance with current code.

LOCATION: 412 Lilly Rd, Olympia, Wa. 98506

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will put the facility in danger possible issues in the event of a fire.

LINKS TO OTHER PROJECTS OR FACILITIES:

Thurston County Correctional Facility (TCCF) Secure Parking (25616)

DESCRIPTION:

The Thurston County Correctional Facility (TCCF) does not have a secure parking area for correctional staff.

JUSTIFICATION (Need/Demand):

Project Scope – This project would create a fenced and secure area for staff to park.

LOCATION: 3491 Ferguson St. SW, Tumwater, WA 98512

IMPLICATION OF NOT DOING THE PROJECT(S):

Without doing the project there are safety concerns for staff. Current parking for staff can be accessed by the public at any time. Due to recent protests that have taken place at the facility in the last year there is great concern.

LINKS TO OTHER PROJECTS OR FACILITIES: TCCF Expansion Project, TCCF IT Room Upgrades, TCCF Camera Upgrade

Tilley Campus Skybridge Repairs (25619)

DESCRIPTION: This project will consist of sealing the concrete on the current skybridges. It will involve removal of the current paint and the resurfacing of the current metal on the structure.

JUSTIFICATION (Need/Demand):

Project Scope-The metal supports and the handrailing for the structure have begun to rust.

LOCATION: 9605 Tilley Road South, Olympia, WA 98512.

IMPLICATION OF NOT DOING THE PROJECT:

Not completing this project will allow the elements to continue damage to the current skybridges. Creating safety

issues and the structure continues to deteriorate.

LINKS TO OTHER PROJECTS OR FACILITIES: Tilley Pump House, Tilley Generator Upgrades

3000 Pacific Ave. S.E. Lease and Tenant Improvements (25623)

DESCRIPTION: The County intends to enter into a lease contract for the building located at 3000 Pacific Ave. S.E. Olympia. Tenants that will occupy the facility are: Auditor, CPED, BoCC, I.T dept, BOE, H.R., Geodata, Central Services Admin. and Treasurer.

PROJECT SCOPE: Design and construction for build-out of all Tenant Improvements for County Departments listed above.

JUSTIFICATION: Obtain leased space to house administrative County functions and allow renovation and use of 2000 Lakeridge Dr. campus for Justice center and associated functions.

LOCATION: 3000 Pacific Ave. S.E. Olympia, WA 98501.

IMPLICATION OF NOT DOING PROJECT: Challenges with expansion/growth of court functions and expansion/growth of administrative departments are constrained at current location. Renovation of current campus facilities would be limited and difficult in occupied facilities.

LINKS TO OTHER PROJECTS OR FACILITIES: Expansion of courts functions. Renovation of 2000 Lakeridge Dr. Campus.

TCCF Expansion (25FLX)

DESCRIPTION: The Thurston County Corrections Facility (TCCF) was planned and designed to be built in phases as detention capacity needs increased over time. This project will address current needs for adult detention space in the County by adding 100-130 high/medium security beds.

Project Scope – Estimated size of the detention expansion is roughly 20,000 square feet, north of the current high-security cell block. Specific detention priorities are: flexible housing for female inmates (low- medium-high security); flexible housing for inmates experiencing mental health and/or substance abuse issues; and housing for additional male inmates (high- security). The project will also address needs for onsite courtroom space. Estimated size of this addition is roughly 3,000-5,000 square feet depending on the number of

courtrooms feasible. This is not expected to affect portions of the site projected for future further expansion. The project will also address storm water management system improvements needed to support the expansion and to meet current regulatory requirements.

JUSTIFICATION (Need/Demand): The TCCF was built as part of long-range plans to relieve overcrowding at the Courthouse Jail. Phase 1 was completed in 2010 to house 350 inmates. However, the current inmate population sometimes exceeds that capacity. Although initiatives are underway to stem the growth in incarceration rates, inmate populations are still expected to grow over time and additional capacity is needed. In addition, it is important to effectively address specialized population needs and needed courtroom space at the facility.

Due to changing weather patterns and rising ground water table, the site's site storm water system is not infiltrating as expected or to current regulatory standards. One of the three existing storm-water galleries is not performing to design standards. A storm water solution is necessary for gaining permits to expand the TCCF or any other additions to the site.

LOCATION: 3491 Ferguson St. SW, Tumwater, WA 98512

IMPLICATION OF NOT DOING THE PROJECT(S): While efforts continue to reduce the jail population growth rate, at some point the ability to operate the TCCF efficiently may be compromised and population management may become more difficult and costlier. This also puts the County at increasing risk of costly litigation over jail conditions.

LINKS TO OTHER PROJECTS OR FACILITIES: TCCF IT Room AC Upgrades, TCCF Roofing and Stucco Repair, TCCF Camera Upgrade

Building 6 Roof Repair (25612)

DESCRIPTION:

This project is the removal of existing roofing and the replacement with new composition and PVC

JUSTIFICATION (Need/Demand):

Project Scope – The roofing both composition and torch down has reached the end of its useful life and needs to be replaced with new composition and PVC roofing and flashings.

LOCATION: 926 24th Way, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will put the facility in danger of water damage due to water penetrating the facility.

LINKS TO OTHER PROJECTS OR FACILITIES:

Public Defense Upgrades and the County Wide Security Upgrades, Building 6 HVAC Replacement

CSA Building Triage Expansion (25578)

DESCRIPTION:

This project is a six-bed expansion of the exiting Thurston -Mason County Mental Health Triage Center

JUSTIFICATION (Need/Demand):

Project Scope – The project is a 2,000 square foot, six bed expansion of the existing Thurston-Mason County Mental Health Triage Center. It will be funded by a Department of Commerce grant.

LOCATION: 3825 Ferguson St. SW, Tumwater, WA 98512

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing the project will put pressure on the Thurston County Correctional Facility and will limit the County's ability to help public at large.

LINKS TO OTHER PROJECTS OR FACILITIES: TCCF Expansion Project

Thurston County Courthouse Infrastructure Upgrades (25610)

DESCRIPTION:

The Building Condition Assessment completed by MENG analysis identified structure, equipment and systems that have exceeded their lifespan. They require major repair or replacement.

JUSTIFICATION (Need/Demand):

Project Scope – This project is needed to allow safe and continuous occupancy of the site, along with meeting the space needs of county departments. It also will assure that current safety rules and standards are met.

LOCATION: 2000 Lakeridge Dr. SW, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will leave both staff and the public in a potentially unsafe and stressful environment. It also leaves the building systems at risk of catastrophic failure, which may make the buildings unusable until the systems are repaired.

LINKS TO OTHER PROJECTS OR FACILITIES: Building 3 Courtroom Improvements, Building 3 Secured Entrance

Mottman Complex Remodel (25617)

DESCRIPTION: This project would expand the current usable space for Auditor Elections. It would also remodel space at the complex to fit the needs of Facilities and Records.

JUSTIFICATION (Need/Demand):

The Auditor Elections division of the Auditors office has needed more space with which to run elections. The Presidential elections cycle and the increase in voter involvement in recent elections has created a need for more space to run operations and make sure that the County has a safe and secure elections. Along with providing them with the area for additional equipment. It would also allow Facilities and Records to move out of leased space.

LOCATION: 2905 29th Avenue SW, 2915 29th Avenue SW, and 2918 Fergusons Street SW, Tumwater, Washington, 98512.

IMPLICATION OF NOT DOING THE PROJECT(S): If not done, Auditor Elections will not have sufficient space to properly run the next Presidential election in a safe and secure manor. Facilities and Records will also not have the space needed to efficiently operate from.

LINKS TO OTHER PROJECTS OR FACILITIES:

County-Wide Infrastructure for Charging Vehicles (25620)

DESCRIPTION:

Develop a plan and project to install electric vehicle charging stations at County Buildings.

Project Scope: Conduct the planning, design, and installation of vehicle charging stations at various County owned buildings.

LOCATION: County facilities at 2400 Evergreen Park Drive, 926 24th Way, 2703 Pacific Avenue, and 412 Lilly Road in Olympia, 3054 Carpenter Road in Lacey, 2801 32nd Avenue in Tumwater, and 9605 Tilley Road in rural Thurston County.

JUSTIFICATION (Need/Demand): Current Capacity allows for one additional electrical vehicle at the Courthouse and 2 additional electrical vehicles at Tilley.

IMPLICATION OF NOT DOING THE PROJECT: Not developing County infrastructure will limit the ability to add EVs to the County fleet as vehicles suitable for the County's use are available.

Thurston County Correction Facility (TCCF) IT Room AC Upgrades (25609)

DESCRIPTION:

The project would include the replacement of the current cooling system for the data room

JUSTIFICATION (Need/Demand):

Project Scope – The current cooling system is at the end of its useful life and facing imminent failure.

LOCATION: 3491 Ferguson St. SW, Tumwater, WA 98512

IMPLICATION OF NOT DOING THE PROJECT(S): Failure to proceed with this project will lead to failure of the current cooling system. This will cause the IT equipment located in the room to overheat and fail. If failure of the equipment occurs, systems at the facility will be inoperable.

LINKS TO OTHER PROJECTS OR FACILITIES: TCCF Expansion Project, TCCF Roofing & Stucco, TCCF Recreation Yard, TCCF Camera Upgrade

Courthouse Building #4 Sewer Improvement (25613)

DESCRIPTION: This project will replace the existing incoming sewer line, with a new line to the current facility.

JUSTIFICATION (Need/Demand):

Project Scope – The existing sewer line is partially collapsed. Causing sewage to back up at times.

LOCATION: 929 Lakeridge Dr. SW, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will lead to failure of the current sewer line. When this occurs, there will be no bathroom facilities available for use on the site therefore not allowing the building to be occupied.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

Courthouse Mansard Roof Repair/Replacement

DESCRIPTION: This project is for the cleaning, repair, painting or replacement of the public-facing portions of the mansard roofs on the Courthouse campus to protect against rust and safety risks.

Project Scope - Hire a contractor to clean, repair, paint or replace the mansard roofs on Courthouse Buildings 1, 2, and 3. The mansard roofs are primarily decorative in function.

LOCATION: 2000 Lakeridge Dr. SW, Olympia, WA 98502

JUSTIFICATION (Need/Demand):

The Courthouse Campus was built in 1978. The mansard roofs are one of the most noticeable features on the Courthouse campus, and flaking paint and moss build up have taken its toll on the roofing and on the public's perception on how well the site is maintained.

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing the project would leave the site in a substandard condition and shorten the life of the roofing.

LINKS TO OTHER PROJECTS OR FACILITIES: Thurston Courthouse Infrastructure Upgrades

Tilley Main Campus Generator Improvements (25624)

DESCRIPTION: This project will consist of planning, design and reworking the electrical system at the Main Campus to allow portions of the heating system and lighting to operate in the event of a power outage.

JUSTIFICATION (Need/Demand):

Project Scope-Public Work's operates their emergency services 24 hours a day, 365 days a year. Currently there is no heating or lighting in portions of the buildings during a power outage, making it impossible for staff to maintain operations.

LOCATION: 9605 Tilley Road South, Olympia, WA 98512.

IMPLICATION OF NOT DOING THE PROJECT:

Not proceeding will limit the ability of the Public Works to operate efficiently and maintain needed operations for citizens of Thurston County in the event of an extended power outage.

LINKS TO OTHER PROJECTS OR FACILITIES: Tilley Campus Pump House, Tilley Skybridge Repairs

TCCF Camera System Upgrade(25F04)

DESCRIPTION:

This project would replace the current analog camera system with a new IP based camera system.

JUSTIFICATION (Need/Demand):

Project Scope – The current camera system is at the end of its lifespan. Procuring cameras and support for the current system has proven to be difficult. The camera system is an important piece to the operation of the facility, along with providing safety for the staff and inmates.

LOCATION: 3491 Ferguson St. SW, Tumwater, WA 98512

IMPLICATION OF NOT DOING THE PROJECT(S):

Not completing this project puts the operations & staff at a major risk if the current system fails and is not repairable.

LINKS TO OTHER PROJECTS OR FACILITIES: TCCF Expansion Project, TCCF IT Room Upgrades, TCCF Roofing & Stucco Repair, TCCF Recreation Yard

Emergency Services Center UPS Upgrade

DESCRIPTION:

This project would modify the current Uninterruptable Power Supply. Adding additional reliability to TComm's current System.

Project Scope – The project will consist of reworking the current back up power supply for TComm. Backup power is essential for a facility that functions 24 hours a day 365 days a year. This may include equipment replacement and any necessary modifications to the design of the current system to ensure the greatest efficiency and reliability.

LOCATION: 2703 Pacific Avenue SE, Olympia

JUSTIFICATION (Need/Demand):

The UPS system serving this critical emergency services facility is aging and additional capacity may need to be added to keep compliant with current standards.

DOING THE PROJECT(S):

Not doing this project could result in a system failure that would seriously compromise critical emergency services.

LINKS TO OTHER PROJECTS OR FACILITIES: Emergency Services Center Roof Replacement

Building 6 HVAC Replacement(25F06)

DESCRIPTION:

This project is the removal and replacement of existing Heating Ventilation and Air Conditioning (HVAC) system at Building 6.

JUSTIFICATION (Need/Demand):

Project Scope – The existing system has reached the end of its practical life span; it is in a constant state of repair and the system is hard to get parts for. The replacement system will be much more energy efficient than the existing system

LOCATION: 926 24th Way, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will put system at risk of failure which could contribute to further damage to the building with possibility of plumbing system freezing in the winter.

LINKS TO OTHER PROJECTS OR FACILITIES: Public Defense Upgrades and the County Wide Security Upgrades, Building 6 roof repairs

Courthouse Building #3 Courtroom Improvements(25F08)

DESCRIPTION:

Conduct the planning, design, and construction of restructured space in building 3. This project will conduct a needs assessment and develop a plan of proposed improvements to meet near term requirements for the courts. This includes design and construction of an additional Courtroom and relocation of various departments within District Court to allow more effective operation of District Court within Building 3.

JUSTIFICATION (Need/Demand):

Project Scope – District court needs another courtroom to meet demand. District court is also in need of a restructuring of their current office space to house the employees within the department. These projects can include any aspect of

construction, heating, cooling, plumbing, electrical, and miscellaneous infrastructure to support the successful completion of the project.

LOCATION: 2000 Lakeridge Dr. SW, Olympia, WA 98502

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will limit the timeliness and levels of service that District Court is charged with providing under the law to the public and would potentially leave both staff and the public in a potentially unsafe and stressful environment.

LINKS TO OTHER PROJECTS OR FACILITIES: Building 3 Secured Entrance, Thurston County Courthouse Infrastructure Improvements

Tilley Pump House Improvements (25605)

DESCRIPTION:

Design and install new equipment in the wellhouse that provides domestic water for activities on the Public Work site and must meet onsite operational need.

Project Scope – This project will design and install new pumps, pressure tanks, and metering to ensure continued operation of the well.

The project is not scoped to drilling a new well or improving the existing wellhouse.

LOCATION: 9605 Tilley Road S, Olympia, WA 98502

JUSTIFICATION (Need/Demand):

The current equipment is in excess of 25 years old. The industry standard for replacement of this type of equipment is 15 to 20 years. Regular maintenance is performed on this equipment, but there are already indications of failure of the pressure tanks contained within the wellhouse.

IMPLICATION OF NOT DOING THE PROJECT:

If a planned project isn't performed, it is likely one or more aspects of this equipment will fail at a time when it would significantly impact the operation of the Tilley Campus. It would be difficult to operate the Tilley Campus without a reliable source of domestic water.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

Major Maintenance - Special Projects (25999)

DESCRIPTION:

Plan and conduct miscellaneous facilities maintenance and repair projects in response to emergent life safety and operational needs or regulatory obligations. Upgrade or replace systems, structures, and equipment as the need arises to maintain current levels of use.

JUSTIFICATION (Need/Demand):

The 2016 Building Condition Assessment completed by MENG Analysis identified numerous systems, structures, and equipment at County facilities that have exceeded their useful life and will require repair and/or replacement due to debilitated condition. Many components are exhibiting some level of failure and are requiring stopgap repairs or replacement if stop-gap repairs are not successful.

LOCATION: County facilities at 2000 Lakeridge Drive, 2400 Evergreen Park Drive, 926 24th Way, 2703 Pacific Avenue, and 412 Lilly Road in Olympia, 3054 Carpenter Road in Lacey, 2801 32nd Avenue in Tumwater, and 9605 Tilley Road in rural Thurston County and other buildings as necessary.

IMPLICATION OF NOT DOING THE PROJECT:

Not including special projects in the plan would limit the County's ability to address emergent, foreseeable needs, potentially disrupting vital County business operations. Failing to maintain buildings will cause accelerated decay and the eventual need for replacement. Failure to repair and renovate as well as failure to accommodate accessibility issues can place staff and the public at risk.

LINKS TO OTHER PROJECTS OR FACILITIES:

Land Acquisition(25F09)

DESCRIPTION:

Purchase of property in Thurston County

JUSTIFICATION (Need/Demand):

Project Scope – This project represents the purchase of property in Thurston County. This allows for the future expansion of current county departments as needed for courts or other departments.

LOCATION: Thurston County

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will limit the ability for growth of the county departments. The current county sites are limiting the services capable of being supplied to the public.

LINKS TO OTHER PROJECTS OR FACILITIES: Thurston County Courthouse Infrastructure Improvements.

Carpenter Road Transition Center Site Development(25F04)

DESCRIPTION

Conduct the planning, design, and construction of infrastructure improvements to the site.

JUSTIFICATION (Need/Demand):

Project Scope – Thurston County needs a safe and secure site for individuals, to help transition back into everyday society

LOCATION: 440 Carpenter Rd SE, Lacey, Wa. 98503

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project will limit the abilities the county has to help with the homeless population in the county.

LINKS TO OTHER PROJECTS OR FACILITIES: N/A

Emergency Services Center Roof Replacement (25585)

DESCRIPTION:

This project would replace the roof at the facility housing TCOMM-911 and Medic One.

JUSTIFICATION (Need/Demand:

Project Scope -The intent is to replace an asphalt shingle roof with another asphalt shingle roof. Recommendations from a roofing consultant will determine any sheeting repairs and type of shingle to be specified.

LOCATION: 2703 Pacific Avenue SE, Olympia.

IMPLICATION OF NOT DOING THE PROJECT(S):

Not doing this project results in a high risk of the roof failing which could seriously compromise critical emergency services.

LINKS TO OTHER PROJECTS OR FACILITIES: TComm UPS Upgrade

CHAPTER 8 – FACILITIES OF OTHER PUBLIC ENTITIES

Public facilities provided by other public entities in this section is provided for information only. The adopted capital facilities plans of these jurisdictions, as amended, are incorporated by reference. Information is requested annually by Thurston County. Each public entity is considered the most accurate source of up-to-date information on their capital facilities plans.

Table 8-1 includes the major public facility improvements planned by school districts, fire districts/authorities, port districts and transit entities that responded to Thurston County's request for information.

Table 8-1 Facilities of Other Public Entities **NOTE: THESE FIGURES HAVE BEEN UPDATED AS OF 9.24.21**

Projects (Name and Location of Each Capital Project)		6 Year Costs	Funding Source (For 6 year projects)
Project Name	Location		
Rainier School District #307			
Construction/modernizations	207 Centre St.	\$1,000,000	TBD

SEPA DETERMINATION OF NONSIGNIFICANCE (DNS)

Proponent/ Lead Agency	Thurston County Community Planning and Economic Development Department 2000 Lakeridge Drive SW, Building #1 Olympia, WA 98502 Contact: Maya Teeple, (360) 545-2593
Description of Proposal	This SEPA review is for amendment of the Thurston County Comprehensive Plan Appendix G. This is a repeal and replace of the 2021-2026 Capital Improvement Program (CIP). The CIP identifies new, revised and expanded capital facilities to be provided in the coming six years and the plan for financing them. The CIP is a planning document, and although it identifies specific facility projects for purposes of budget and financing, amending this document is a non-project action.
Project No.	2021104762
Location of Proposal	Thurston County
Threshold Determination	The lead agency for this proposal has determined that it does not have a probable significant adverse impact upon the environment. An Environmental Impact Statement is <u>not</u> required under RCW 43.21C.030(2)(c). This decision was made after review by the Lead Agency of a completed Environmental Checklist for the 2022-2027 CIP update and other information on file with the Lead Agency. This information is incorporated is available to the public at https://www.thurstoncountywa.gov/planning/Pages/capital-improvements.aspx or upon request.
Responsible Official	Joshua Cummings, Director
Date of Issuance:	October 15, 2021
Comment Deadline:	October 29, 2021
Appeal Deadline:	November 5, 2021

Christina Chaput, Interim Planning Manager

This Determination of Nonsignificance (DNS) is issued under WAC 197-11-340. The lead agency will not act on this proposal for 14 days from the date of issue or until the appeal period has passed, if applicable. No permits may be issued, and the applicant shall not begin work until after the comment and any appeal periods have expired

and any other necessary permits are issued. If conditions are added, deleted, or modified during the 14 day review period, a modified DNS will be issued. Otherwise, this DNS will become final after the expiration of the comment deadline and appeal period, if applicable.

Appeals

Threshold determinations may be appealed pursuant to TCC 17.09.160 if: (1) a written notice of appeal, meeting the requirements of TCC 17.09.160(D), and the appropriate appeal fee is received by the Thurston County Community Planning and Economic Development Department within seven (7) calendar days of the last day of the comment period on the threshold determination and; (2) the person filing the appeal is an aggrieved party and submitted written comments prior to the comment deadline, per the requirements of TCC 17.09.160(B).

NOTE: The issuance of this Determination of Nonsignificance does not constitute project approval. The applicant must comply with all applicable requirements of Thurston County Departments and/or the Hearing Examiner prior to receiving permits.

Creating Solutions for Our Future

Joshua Cummings, Director

MEMORANDUM

TO: Christina Chaput, Interim Community Planning Manager

FROM: Maya Teeple, Senior Planner

DATE: October 12, 2021

SUBJECT: Capital Improvement Program 2022-2027 Appendix G SEPA Review - DNS

Thurston County annually updates its Capital Improvement Program (CIP), which is a 6-year financing plan of capital facilities. This is a non-project proposal. The CIP details the revenue sources and future costs for capital facilities located throughout the County. These capital facilities ensure that infrastructure and facilities are built to support forecast population growth and meet levels of service standards adopted in the Comprehensive Plan. The 2021-2026 CIP will be repealed and replaced in its entirety with a 2022-2027 CIP.

Staff recommends a Determination of Non-Significance for this proposal as it is unlikely to have significant adverse environmental impacts. The following findings are made in evaluation by Thurston County Staff of SEPA checklist:

1. Projects listed in the CIP must undergo environmental analysis at the individual project permit level. Listing projects on the CIP does not guarantee that they will be permitted. Proposed projects must comply with applicable Thurston County Codes and other federal, state, and local regulations and additional measures may be required at the project level.
2. Proposed projects may produce limited-duration noise, and may also provide incentives to residences for alternative transportation, reduce risk of water contamination and degradation, reduce and control release of toxic emissions, and control stormwater discharges.
3. Specific projects may impact or benefit plants, animals, fish and marine life and will undergo review with appropriate state and federal agencies based on potential impacts. Proposed measures are to be determined at the project level based on Critical Areas

Ordinance, Shoreline Master Program, and other local, state and federal habitat protection laws.

4. No increase in transportation, public services, or utility demands are anticipated. Proposals are geared toward maintaining or improving levels of service for each facility, including roads and utilities.

THURSTON COUNTY COMMUNITY PLANNING AND ECONOMIC DEVELOPMENT DEPARTMENT ENVIRONMENTAL CHECKLIST

Purpose of Checklist

The State Environmental Policy Act (SEPA), Chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An Environmental Impact Statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

Instructions for Applicants - **USE BLACK INK ONLY**

This Environmental Checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can. Please **do not** write in the area that is specified for ☐ agency use only ☐.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you.

A site plan must accompany the Environmental Checklist. It should be clearly legible, scaled accurately and include information regarding boundary lines of subject and adjacent properties; roads, existing and proposed; existing buildings; wells and drain fields, if any; geographical features (such as steep slopes, low areas, seasonal or year-round drainages and shorelines) and details of the project. Please submit one copy of the site plan 8" x 11" or 8" x 14" in size.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be a significant adverse impact.

Use of Checklist for Non-project Proposals

Non-project proposals are those which are not tied to a specific site, such as adoption of plans, policies, or ordinances. Complete this checklist for non-project proposals, even though questions may be answered "does not apply." In addition, complete the Supplemental Sheet for Non-project Actions (Part D).

For non-project actions, the references in the checklist to the words "project," "applicant," and "property or site" should read as "proposal," "proposer," and "affected geographic area," respectively.

Fees: Thurston County Development Services - Minor Administrative Permits
Thurston County Development Services - Major Hearing Examiner Permits

ENVIRONMENTAL ELEMENTS

**Evaluation for
Agency Use Only**

To be Completed by Applicant

1. Earth

- a. **General description of the site (circle one): Flat, rolling, hilly, steep slopes, mountainous, other**

VARIES THROUGHOUT COUNTY.

- b. **What is the steepest slope on the site (approximate percent slope)?**

N/A

- c. **What general types of soils are found on the site (for example, clay, sand gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.**

N/A

- d. **Are there surface indicators or history of unstable soils in the immediate vicinity? If so, describe.**

N/A

- e. **Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill.**

N/A

- f. **Could erosion occur as a result of clearing, construction, or use? If so, generally describe.**

N/A

- g. **About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?**

N/A

- h. **Proposed measures to reduce or control erosion, or other impacts to the earth, if any:**

N/A

2. Air

- a. **What types of emissions to the air would result from the proposal (i.e., dust, automobile, odors, industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.**

N/A

- b. **Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.**

N/A

- c. **Proposed measures to reduce or control emissions or other impacts to air, if any:**

N/A

ENVIRONMENTAL ELEMENTS

Evaluation for
Agency Use Only

To be Completed by Applicant

3. Water

a. Surface

- (1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

N/A

- (2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

N/A

- (3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

N/A

- (4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

N/A

- (5) Does the proposal lie within a 100-year flood plain? If so, note location on the site plan.

N/A

- (6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

N/A

b. Ground

- (1) Will ground water be withdrawn, or will water be discharged to ground water? Give general description, purpose, and approximate quantities if known.

N/A

- (2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: domestic sewage; industrial, containing the following chemicals . . .; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

N/A

To be Completed by Applicant

c. **Water Run-off (including stormwater)**

(1) **Describe the source of runoff (including stormwater) and method of collection and disposal, if any (include quantities, in known). Where will this water flow? Will this water flow into other waters? If so, describe.**
N/A

(2) **Could waste materials enter ground or surface waters? If so, generally describe.**
N/A

d. **Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:**

N/A

4. **Plants**

a. **Check or circle types of vegetation found on the site: N/A**

- ☐ Deciduous tree: alder, maple, aspen, other
- ☐ Evergreen tree: fir, cedar, pine, other
- ☐ Shrubs
- ☐ Grass
- ☐ Pasture
- ☐ Crop or grain
- ☐ Wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- ☐ Water plants: water lily, eelgrass, milfoil, other
- ☐ Other types of vegetation

b. **What kind and amount of vegetation will be removed or altered?**

N/A

c. **List threatened or endangered species known to be on or near the site.**

N/A

d. **Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:**

N/A

5. **Animals**

a. **Circle any birds and animals which have been observed on or near the site or are known to be on or near the site: N/A**

Birds: hawk, heron, eagle, songbirds, other:
Mammals: deer, bear, elk, beaver, other:
Fish: bass, salmon, trout, herring, shellfish, other:

b. **List any threatened or endangered species known to be on or near the site.**

N/A

c. **Is the site part of a migration route? If so, explain.**

N/A

d. **Proposed measures to preserve or enhance wildlife, if any:**

N/A

ENVIRONMENTAL ELEMENTS

Evaluation for
Agency Use Only

To be Completed by Applicant

6. Energy and Natural Resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

N/A

- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

N/A

- c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any:

N/A

7. Environmental Health

- a. Are there are any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, which could occur as a result of this proposal? If so, describe.

N/A

- (1) Describe special emergency services that might be required.

N/A

- (2) Proposed measures to reduce or control environmental health hazards, if any:

N/A

- b. Noise

- (1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?

N/A

- (2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A

- (3) Proposed measures to reduce or control noise impacts, if any:

N/A

8. Land and Shoreline Use

- a. What is the current use of the site and adjacent properties?

N/A

- b. Has the site been used for agriculture? If so, describe.

N/A

- c. Describe any structures on the site.

ENVIRONMENTAL ELEMENTS

**Evaluation for
Agency Use Only**

To be Completed by Applicant

N/A

- d. **Will any structures be demolished? If so, what?**

N/A

- e. **What is the current zoning classification of the site?**

- f. **What is the current comprehensive plan designation of the site?**

N/A

- g. **If applicable, what is the current Shoreline Master Program designation of the site?**

N/A

- h. **Has any part of the site been classified an "environmentally sensitive" area? If so, specify.**

N/A

- i. **Approximately how many people would reside or work in the completed project?**

N/A

- j. **Approximately how many people would the completed project displace?**

N/A

- k. **Proposed measures to avoid or reduce displacement impacts, if any?**

N/A

- l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

N/A

9. Housing

- a. **Approximately how many units would be provided, if any? Indicate whether high-, middle-, or low-income housing.**

N/A

- b. **Approximately how many units, if any, would be eliminated? Indicate whether high-, middle, or low-income housing.**

N/A

- c. **Proposed measures to reduce or control housing impacts, if any:**

N/A

10. Aesthetics

- a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

N/A

- b. **What views in the immediate vicinity would be altered or obstructed?**

N/A

- c. **Proposed measures to reduce or control aesthetic impacts, if any:**

N/A

11. Light and Glare

ENVIRONMENTAL ELEMENTS

**Evaluation for
Agency Use Only**

To be Completed by Applicant

- a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**
N/A
- b. **Could light or glare from the finished project be a safety hazard or interfere with views?**
N/A
- c. **What existing off-site sources of light or glare may affect your proposal?**
N/A
- d. **Proposed measures to reduce or control light and glare impacts, if any:**
N/A

12. Recreation

- a. **What designated and informal recreational opportunities are in the immediate vicinity?**
N/A
- b. **Would the proposed project displace any existing recreational uses? If so, describe.**
N/A
- c. **Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:**
N/A

13. Historic and Cultural Preservation

- a. **Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.**
N/A
- b. **Generally describe any landmarks or evidence of historic, archaeological, scientific, or cultural importance known to be on or next to the site.**
N/A
- c. **Proposed measures to reduce or control impacts, if any:**
N/A

14. Transportation

- a. **Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.**
N/A
- b. **Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?**
N/A
- c. **How many parking spaces would the completed project have? How many would the project eliminate?**
N/A
- d. **Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).**

ENVIRONMENTAL ELEMENTS

**Evaluation for
Agency Use Only**

To be Completed by Applicant

N/A

- e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

N/A

How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

N/A

- g. Proposed measures to reduce or control transportation impacts, if any:

N/A

15. **Public Services**

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

N/A

- b. Proposed measures to reduce or control direct impacts on public services, if any.

N/A

16. **Utilities**

- a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

N/A

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

N/A

C. **SIGNATURE**

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Date Submitted: 9-8-2021_____ Signature: *Jennifer Davis*
Jennifer Davis, Planning Manager

THURSTON COUNTY
SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS
(do not use this sheet for project actions)

Non-project proposals are those which are not tied to a specific site, such as adoption of plans, policies, or ordinances.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment. When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

To be completed by Applicant

Evaluation for
Agency Use Only

NOTE: Projects listed on the CIP must undergo environmental analysis at the individual project permit level. Listing the projects on the CIP does not guarantee that they will be permitted.

- 1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?**

Construction of Buildings: Major construction projects may produce periods of limited-duration noise. Construction of new buildings is required to include considerations for innovative use of alternative hours, telecommuting, distributed service locations, and work at home opportunities. Priority is given to long-term energy efficiency through design and construction.

Parks and Recreation: Trailhead and trail improvements should provide incentives to residence for alternative transportation options that may reduce car trips and associated air emissions. Park improvements may facilitate increased park use.

Water and Sewer Utility Development: Upgrades, maintenance and repairs of other county-owned sewer and water utilities will reduce the risk of water contamination and degradation of water quality. Grand Mound projects are designed to improve and assure adequate water and sewer service to an expanding community.

Solid Waste: Waste and Recovery Center (WARC) projects are designed to control the release of toxic emissions from the site. Addition maintenance and repair projects will maintain safety, customer service, and environmental controls at the waste recovery center and drop box areas.

Stormwater: Maintenance and improvement projects for stormwater facilities are proposed to control stormwater discharges that may contaminate water. New stormwater control projects are designed to reduce water quality risks to groundwater from infiltration of untreated stormwater. Installation of stormwater conveyance systems should reduce the possibility of flooding and associated water contamination.

THURSTON COUNTY
SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS
(do not use this sheet for project actions)

Installation of in-stream structures are intended to improve fish passage and improve down-gradient shellfish habitat including provisions such as the placement of large woody debris, riparian cover, bank stabilization projects. Habitat surveys will also be conducted to identify and quantify stream health and down-gradient shellfish area in association with capital facilities planning efforts.

Roads and Transportation Services: Road construction projects have associated short-term noise impacts. Projects will improve traffic circulation thereby reducing localized emissions from autos, improve fish passage, and improve protection of groundwater from contamination.

Proposed measures to avoid or reduce such increases are:

See above. Additional measures to be determined at the individual project level.

2. How would the proposal be likely to affect plants, animals, fish, or marine life?

County Buildings: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Parks and Recreation: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Water and Sewer Utility Development: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Solid Waste: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Stormwater: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Roads and Transportation Services: Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to comply with applicable Thurston County Codes and other federal, state, and local regulations.

THURSTON COUNTY
SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS
(do not use this sheet for project actions)

Proposed measures to protect or conserve plants, animals, fish, or marine life are: To be determined at the individual project level based on the Critical Areas Ordinance, Shoreline Master Program, and other local, state and federal habitat protection laws. Acquisition of additional open space and critical habitat areas will provide more habitat protection for important species. Fish passage projects improve access to habitat by fish species.

3. How would the proposal be likely to deplete energy or natural resources?

Each individual project will undergo review with appropriate state and federal agencies based on potential impacts. Projects will be required to be in compliance with applicable Thurston County Codes and other federal, state, and local regulations.

Proposed measures to protect or conserve energy and natural resources are:
County Buildings: Major maintenance and repair projects should improve energy efficiency of buildings.

All development proposals are required to comply with the Thurston County Critical Areas Ordinance and Shoreline Master Program as well as state and federal regulations that are intended to protect natural resource areas. Review will also take place with the State Environmental Policy Act at the project proposal level.

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection; such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, flood plains, or prime farmlands?

Development of existing park facilities from passive to active use may impact sensitive areas by increasing human use of the sites. Raising roadways and installation of larger roadway culverts to allow fish passage will result in more opportunities to reach spawning habitat by listed salmonids.

Proposed measures to protect such resources or to avoid or reduce impacts are: See above. Additional mitigation measures to be determined at the individual project level in compliance with local critical areas regulations, shoreline rules, and state and federal laws protecting sensitive areas.

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?

All planned projects must be consistent with the county's Shoreline Management Program, Critical Areas Ordinance, basin plans, and other county, state and federal planning documents and regulations and will be required to go through all appropriate review processes.

Proposed measures to avoid or reduce shoreline and land use impacts are:

THURSTON COUNTY
SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS
(do not use this sheet for project actions)

To be determined at the individual project level.

6. How would the proposal be likely to increase demands on transportation or public services and utilities?

No increase in demands anticipated. Proposals are geared toward maintaining or improving the levels of service set for each facility, including roads and utilities. It is possible that some road improvements will result in increased use of certain roadways, with associated local impacts from traffic.

Proposed measures to reduce or respond to such demand(s) are: CIP projects are designed to respond to forecast increases in population and corresponding demand on facilities.

7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.

None. The goal of this project is to be in full compliance with the Growth Management Act. Additional environmental review to ensure compliance with local, state, and federal environmental laws will be required at the permitting stage for each project.
