MEMORANDUM

Patrick M. Libbey, Director
Diana T. Yu, MD, MSPH
Health Officer

DATE: February 5, 1996

TO: On-site Sewage Professionals and other interested parties

FROM: Gregg Grunenfelder, Director

SUBJECT: Article IV clarification on designs with repair applications

After review of Section 12.1 of Article IV, our department believes the original intent of this section was and is to require that a design be submitted with an application for new construction, but that an application for a repair (failing system) is allowed to be submitted without the design. This will allow an on-site review to be done by our department for those "difficult repair" sites before design submittal.

We would always encourage a design to be submitted with the repair application in the general sense, reserving the occasional non-design application for the truly difficult repair situation.
