Hello Scott,

Cultivation activities will comply with all terms, conditions, and conservation measures associated with the programmatic consultation for shellfish farming activities in Washington State inland marine waters between the Seattle District Corps of Engineers and the National Marine Fisheries Service and the U.S. Fish and Wildlife Service. Additionally, Taylor Shellfish employs Environmental Codes of Practice to ensure all activities meet environmental standards.

Documents attached for your reference.

Please let me know if you have additional questions or need anything else for your report.

Happy Holidays,

Erin

Hi Erin,

I'm trying to get this staff report and everything finished before I head out on Christmas holiday. I'll be gone this Friday through Jan. 2nd and need to get this done asap. I got a little distracted with some other projects. What I was

wondering about is one of the SEPA conditions and if you've addressed it yet. I could not remember so here is the condition.

2. Prior to moving forward to a public hearing, the applicant shall provide either a FEMA Habitat Assessment, a biological evaluation / biological assessment addressing ESA listed species in the vicinity or provide documentation (letter, email etc.) from FEMA indicating that a Habitat Assessment is not required for the project.

Thank you!!

Scott McCormick | Associate Planner, MES (he / him)
