Another question. Are we able to get access to any of the other documents such as the environmental checklist? Any chance that is available on line?

Subject: Aurora Oaks

Good morning.

We have received the Notice of Application regarding the above proposed development. Can you give me a rough timeline on when the public hearing would be?

I know you can't give definite answers, but if everything gets approved and they are given the go ahead, are we talking a few months, six months, a year before they can break ground?

Imagine our concern. We are one of the properties on Waldon Drive abutting this project. Thinking about the traffic alone on our quiet street is enough to make us consider selling.

The preliminary map is impossible to read as its print is so small.

Thank you for your time.

Kim Otis Branham
