

Shoreline Master Program 2018 Update

Preliminary Shoreline Environment Designations

Shoreline Environmental Designations Summary

Natural:

Protect those shoreline areas that are relatively free of human influence or that include intact or minimally degraded shoreline functions intolerant of human use. Only very low intensity uses are allowed in order to maintain the ecological functions and ecosystem-wide processes.

Rural Conservancy:

Provide for sustained resource use, public access, and recreational opportunities while protecting ecological functions, and conserving existing ecological, historical, and cultural resources.

Shoreline Residential:

To accommodate residential development and appurtenant structures and provide appropriate public access and recreational uses in areas where medium and high density residential developments and services exist or are planned.

Urban Conservancy:

Protect and restore ecological functions of open space, floodplain and other sensitive lands where they exist in urban and developed settings, while allowing a variety of compatible uses.

Mining:

To protect shoreline ecological functions in areas with mining activities within shoreline jurisdiction. To provide sustained resource use, and protect the economic base of those lands and limit incompatible uses.

Aquatic:

Protect, restore, and manage the unique characteristics and resources of the areas waterward of the ordinary high-water mark.

Shoreline Environment Designation

- Natural
- Rural Conservancy
- Shoreline Residential
- Urban Conservancy
- Aquatic*
- Stream Reach Breaks
- Lake Reach Breaks
- Marine Reach Breaks
- Cities
- Urban Growth Areas
- Major Roads
- Railroads
- Streams

*Aquatic SED applies to all shorelines of the state below the ordinary high water mark. Please see Map 1, Thurston County Shorelines of the State to identify areas where the Aquatic SED will apply.

Shoreline jurisdiction boundaries depicted on this map are approximate. They have not been formally delineated or surveyed and are intended for planning purposes only. Additional site-specific evaluation may be needed to confirm or verify the information shown on this map. Planning-level channel migration zones are derived from remotely sensed data and are meant to be used for general planning purposes only. Delineating actual channel migration areas requires detailed on-site analysis and surveys that are beyond the scope of this data. For more information, see WA Dept. of Ecology Publication #14-06-025, A Methodology for Delineating Planning-Level Channel Migration Zones.

Thurston County makes every effort to ensure that this map is a true and accurate representation of the work of County Government. However, the county and all related personnel make no warranty, express or implied, regarding the accuracy, completeness or convenience of any information disclosed on this map. Nor does the County accept liability for any damage or injury caused by the use of this map.

To the fullest extent permissible pursuant to applicable law, Thurston County disclaims all warranties, express or implied, including, but not limited to, implied warranties of merchantability, data fitness for a particular purpose, and non-infringement of proprietary rights.

Under no circumstances, including, but not limited to, negligence, shall Thurston County be liable for any direct, indirect, incidental, special or consequential damages that result from the use of, or the inability to use, Thurston County materials.
