WHAT YOU CAN DO TO KEEP OUR WATER CLEAN

Spin the wheel to learn how you can help today!

What can I do?

If we are not careful, stormwater can carry pollutants left on the ground into our streams, lakes and even underground aquifers (our main source of drinking water).

Stormwater facilities, such as the Albany Street Stormwater Pond, can help prevent flooding and prevent stormwater pollution in the first place.

The simple act of picking up pet waste or using organic fertilizer can keep pollutants from flowing into our streams, lakes and drinking water.

Simple actions add up to cleaner water! Spin the wheel to learn how you can help!
