

The Septic System Professional must use this form to draw a sketch of the septic system components based on their inspection. This information is necessary for system maintenance. Information on this form is to be used for general reference and not for legal or official use.

Tax Parcel #:

*Measurements on the drawing must be from fixed points, such as a building foundation. The sketch must include all existing site features, including all septic system components (tanks, transport lines, drainfield area), wells, waterlines, structures, and surface water. Any encroachments (i.e. structures, driveways, etc.) onto the septic system components must be identified on the sketch.

A full-page view of a blank sheet of white graph paper. The paper features a uniform grid of thin gray lines forming small squares. A thicker black border runs along the top and left edges of the page.
