A monthly invoice to the County for each DVR/County Customer. Payment shall be made when DVR and the County have received all required reports and requested documentation from the Contractor.
- 7.4.3. **High School Transition Services as defined in Exhibit E, Statement of Work** The County shall pay the Contractor monthly for services delivered to individuals who have an open High School Transition County Service Authorization. Reimbursement for individual client support services shall not to exceed maximum monthly amounts, based on client's activity phase as described in detail in Exhibit E. To receive payment, the Contractor must submit: 1. A

monthly High School Transition Service Report on approved County form, 2. A completed Service Delivery Outcome Report (SDOR) on approved reporting form when a client has completed an internship/assessment and/or when the client achieves job stabilization, and 3. A monthly invoice to the County for each County High School Transition customer. Payment shall be made when the County has received all required reports and requested documentation from the Contractor.

7.4.4. **Job Foundation (Value Based Payment) Project as defined in Exhibit F, Statement of Work** The County shall pay the Contractor a lump sum of \$2,400.00 for successful completion of and County and DDA acceptance/approval of each Job Foundation Report that has been graded “Satisfactory” or higher by the County, according to DDA’s Job Foundations Quality Review Tool, found on [DDA’s County Best Practices](#) website.

7.5. **Allowable Costs** The County shall pay the Contractor only for allowable costs in compliance with [RCW 43.09.200](#), the most recently published Budgeting and Accounting and Reporting System (BARS) manual, [DDA’s Employment Phases and Billable Activities](#), and [DDA’s Community Inclusion Billable Activities](#). To be allowable, costs must be (a) reasonable, (b) allocable to the government sponsored activities, (c) treated in conformance with any specific limitations, conditions or exclusions prescribed in the applicable cost principles, and (d) treated consistently (i.e., assigned to benefiting activities in a consistent manner).

7.6. **Monthly Invoices with Documentation** All requests for reimbursement by the Contractor for performance hereunder must be submitted on a County approved invoice with attached County provided CMIS spreadsheet. The Contractor may submit a combined claim for all programs/services covered by this Agreement, provided the claim for each individual is separately identified. Separate identification occurs on the CMIS spreadsheet by indicating the number of service units delivered to each individual listed and the fee per unit. A unit is defined as:

7.6.1. An "Hour" is at least fifty (50) minutes of client service. Partial hours, to the quarter (15 minutes), may be recorded.

7.6.2. Contractor will complete CMIS documentation in compliance with Thurston-Mason Guidelines: Monthly Billing, including the “Monthly Client Service Update” document.

7.7. **Timelines and Modifications to Billing** All initial invoices with documentation must be received within ten (10) calendar days following the last day of the month in which the service is provided. If an invoice or required documentation is incorrect, it may be returned to the Contractor. The Contractor can expect to receive payment from a correct invoice and documentation within thirty (30) days from time of receipt and approval by the County. The Contractor must also ensure that all requests for reimbursement have documented evidence of service hours provided (such as case notes). If such documentation cannot be produced upon request by the County, those service hours will not be reimbursed.

8. Accounting and Reporting

8.1. **Annual Program Budget** The Contractor shall provide the County with revenue and expenditure information within 60 days of execution of this Agreement. Information shall be specific to each program provided under this Agreement and include the Contractor’s projected and actual revenues and expenditures from the previous year and the anticipated

revenue and expenditures for the current year. Expenditure detail shall include employee salaries, wages and FTE detail, and relate to allowable expenditures as prescribed in the Budgeting Accounting and Reporting System ([BARS](#)).

- 8.2. **Annual Audit** An annual audit or review of financial statements performed by an outside independent Certified Public Accountant is required for Contractors receiving over \$100,000 for the delivery of services set forth in this Agreement. A copy of the annual audit shall be submitted to Thurston-Mason County Developmental Disabilities within 9 months of the close of this Agreement or upon receipt of the audit report by the Contractor.
- 8.3. **Payment Standard** The Contractor shall not be paid for services rendered under this Agreement unless and until they have been performed to the satisfaction of the County. No payment shall be made for any work performed by the Contractor, except for work identified and set forth in this Agreement or supporting exhibits or attachments incorporated by reference into this Agreement.
- 8.4. **Alternate Funding** Contractor ensures that all clients pursue DVR funding as a resource prior to accessing County funding. Client support services shall not be reimbursed under this Agreement when the same services are paid for under the [Rehabilitation Act of 1973 \(DVR\)](#), [P.L. 94-142 \(Public Education\)](#) or any other source of public or private funding.
 - 8.4.1. **Notification of DVR Status** The Contractor shall notify the County when a client for whom they are providing support services is also a client of DVR.
 - 8.4.2. **Notification of Contractor Status** The Contractor shall notify the County within 24 hours if DVR declines to work with a Contractor or any of their employees.
 - 8.4.3. Clients shall be assisted in accessing DVR services per the DDA/DVR Memorandum of Understanding (MOU).
- 8.5. **Payment Withholding Due to Non-Performance** In the event the Contractor has failed to perform any substantial obligation to be performed by the Contractor under this Agreement and such failure has not been cured within ten (10) business days following notice from the County, then the County may, in its sole discretion, upon written notice to the Contractor, withhold any and all monies due and payable to the Contractor, without penalty until such failure to perform is cured or otherwise adjudicated. "Substantial" for purposes of this Agreement means faithfully fulfilling the terms of this Agreement with variances only for technical or minor omissions or defects.
- 8.6. **Allowable Payment Period** Unless otherwise provided for in this Agreement or any exhibits or attachments hereto, the Contractor shall not be paid for any billing or invoices presented for payment prior to the execution of this Agreement or after its termination.
- 8.7. **Recovery of Fees** If the Contractor bills and is paid fees for services that the County later finds were (a) not delivered or (b) not delivered in accordance with Agreement standards, the Contractor shall reimburse those funds to the County.

9. Information System Security and Protection of Personal Information

- 9.1. **Definitions** The words and phrases listed below, as used in this Section 7, shall each have the following definitions:
 - 9.1.1. **AES** means the Advanced Encryption Standard, a specification of Federal Information Processing Standards Publications for the encryption of electronic

data issued by the National Institute of Standards and Technology (<http://nvlpubs.nist.gov/nistpubs/FIPS/NIST.FIPS.197.pdf>)

- 9.1.2. **Authorized User(s)** means an individual or individuals with an authorized business requirement to access DSHS Confidential Information.
- 9.1.3. **Business Associate Agreement** means an agreement between DSHS and a contractor who is receiving Data covered under the Privacy and Security Rules of the Health Insurance Portability and Accountability Act of 1996. The agreement establishes permitted and required uses and disclosures of protected health information (PHI) in accordance with HIPPA requirements and provides obligations for business associates to safeguard the information.
- 9.1.4. **Category 4 Data** is data that is confidential and requires special handling due to statutes or regulations that require especially strict protection of the data from which especially serious consequences may arise in the event of any compromise of such data. Data classified as Category 4 includes but is not limited to data protected by HIPAA (Pub. L. 104-191) as amended by the Health Information Technology for Economic and Clinical Health Act of 2009 (HITECH) [45 CFR Parts 160 and 164](#); the Family Educational Rights and Privacy Act ([FERPA](#)) [20 U.S.C. §1232g](#); [34 CFR Part 99](#); Internal Revenue Service's [Publication 1075](#); Substance Abuse and Mental Health Services Administration regulations on [Confidentiality of Alcohol and Drug Abuse Patient Records 42 CFR Part 2](#); and/or Criminal Justice Information Services, [28 CFR Part 20](#).
- 9.1.5. **Cloud** means data storage on servers hosted by an entity other than the Contractor and on a network outside the control of the Contractor. Physical storage of data in the cloud typically spans multiple servers and often multiple locations. Cloud storage can be divided between consumer grade storage for personal files and enterprise grade for companies and governmental entities. Examples of consumer grade storage would include iCloud, Dropbox, Box.com, and many other entities. Enterprise cloud vendors include Microsoft Azure, Amazon Web Services, O365, and Rackspace.
- 9.1.6. **Encrypt** means to encode Confidential Information into a format that can only be read by those possessing a "key"; a password, digital certificate, or other mechanism available only to authorized users. Encryption must use a key length of at least 128 bits (256 preferred) for symmetric keys, or 2048 bits for asymmetric keys. When a symmetric key is used, the Advanced Encryption Standard (AES) must be used if available.
- 9.1.7. **FedRAMP** means the Federal Risk and Authorization Management Program (www.fedramp.gov) which is an assessment and authorization process that federal government agencies have been directed to use to ensure security is in place when accessing Cloud computing products and services.
- 9.1.8. **Hardened Password** means a string of at least eight characters containing at least three of the four-character classes: Uppercase alphabetic, lowercase alphabetic, numeral, and special characters such as an asterisk, ampersand, or exclamation point.
- 9.1.9. **Mobile Device** means a computing device, typically smaller than a notebook, which runs a mobile operating system, such as an iOS, Android, or Windows Phone. Mobile Devices include smart phones, most tablets, and other form factors.
- 9.1.10. **Multifactor Authentication** means controlling access to computers and other IT resources by requiring two or more pieces of evidence that the user is who they

claim to be. These pieces of evidence consist of something the user knows, such as a password or PIN, something the user has such as a key card, smart card, or physical token, and something the user is, a biometric identifier such as a fingerprint, facial scan, or retinal scan. "PIN" means a personal identification number, a series of numbers which act as a password for a device. Since PINS are typically only four to six characters, PINS are usually used in conjunction with another factor of authentication, such as a fingerprint.

9.1.11. **Portable Device** means any computing device with a small form factor, designed to be transported from place to place. Portable devices are primarily battery powered devices with base computing resources in the form of a processor, memory, storage, and network access. Examples include but are not limited to mobile phones, tablet, and laptops. Mobile Device is a subset of Portable Device.

9.1.12. **Portable Media** means any machine-readable media that may routinely be stored or moved independently of computing devices. Examples include magnetic tapes, optical discs (CD's or DVD's), flash memory (thumb drive) devices, external hard drives, and internal hard drives that have been removed from a computing device.

9.1.13. **Secure Area** means an area to which only authorized representatives of the entity possessing the Confidential Information have access, and access is controlled through the use of a key, card key, combination lock or comparable mechanism. Secure Areas may include buildings, rooms, or locked storage containers (such as a filing cabinet or desk drawer) within a room as long as access to the Confidential Information is not available to unauthorized personnel. In otherwise Secure Areas, such as an office with restricted access, the Data must be secured in such a way as to prevent access by non-authorized staff such as janitorial or facility security staff, when authorized Contractor staff are not present to ensure that non-authorized staff cannot access it.

9.1.14. **Trusted Systems** include only the following methods of physical delivery: (1) hand-delivery by a person authorized to have access to the Confidential Information with written acknowledgement of receipt; (2) United States Postal Service ("USPS") first class mail, or USPS delivery services that include Tracking, such as Certified Mail, Express Mail or Registered Mail; (3) commercial delivery services (e.g. FedEx, UPS, DHL) which offer tracking and receipt confirmation; and (4) the Washington State Campus mail system.

9.1.15. **Trusted Network** means a network operated and maintained by the Contractor, which includes security controls sufficient to protect DSHS Data on that network. Controls would include usage of State of Washington Secure Email Portal, a firewall between any other networks, access control lists on networking devices such as routers and switches, and other such mechanisms which protect the confidentiality, integrity, and availability of the Data.

9.1.16. **Unique User ID** means a string of characters that identifies a specific user and which, in conjunction with a password, passphrase or other mechanism, authenticates a user to an information system.

9.2. **Confidentiality and Confidential Information** The parties shall not use, publish, transfer, sell or otherwise disclose any Confidential Information gained by reason of this Agreement for any purpose that is not directly connected with the performance of the services contemplated there under, except: As provided by law; or, in the case of Personal Information, as provided by law or with the prior written consent of the person or representative of the person who is the subject of the Personal Information. The parties

shall protect and maintain all Confidential Information gained by reason of this Agreement against unauthorized use, access, disclosure, modification, or loss. This duty requires the parties to employ measures and policies to be described in section 7, Information System Security and Protection of Personal Information. All Contractors and Subcontractors must:

- 9.2.1. Ensure the security of Confidential Information.
 - 9.2.2. Use a trusted network.
 - 9.2.3. Ensure that portable devices and portable media containing confidential DSHS information, including but not limited to laptops and flash memory drives, are under the physical control of staff with authorized access to the data, even if the data is encrypted, when transporting data outside of a secure area. This also applies to emails and/or email attachments.
 - 9.2.4. Encrypt all DSHS confidential information when transporting data outside of a secure area.
- 9.3. **Authority** The security requirements described in this document reflect the applicable requirements of Standard 141.10 (<https://ocio.wa.gov/policies>) of the Office of the Chief Information Officer for the state of Washington, and of the DSHS Information Security Policy and Standards Manual. Reference material related to these requirements can be found here: <https://www.dshs.wa.gov/ffa/keeping-dshsclient-information-private-and-secure>, which is a site developed by the DSHS Information Security Office and hosted by DSHS Central Contracts and Legal Services.
- 9.4. **Administrative Controls** The Contractor must have the following controls in place:
- 9.4.1. A documented security policy governing the secure use of its computer network and systems, and which defines sanctions that may be applied to Contractor staff for violating that policy.
 - 9.4.2. If the Data shared under this agreement is classified as Category 4 data, the Contractor must be aware of and compliant with the applicable legal or regulatory requirements for that Category 4 data.
 - 9.4.3. If Confidential Information shared under this agreement is classified as Category 4, the Contractor must have a documented risk assessment for the system(s) housing the data.
- 9.5. **Authorization, Authentication, and Access** In order to ensure that access to the Data is limited to authorized staff, the Contractor must:
- 9.5.1. Ensure use of Multi-factor Authentication to connect from the external end point to the internal end point.
 - 9.5.2. Have documented policies and procedures governing access to systems with the shared Data.
 - 9.5.3. Restrict access through administrative, physical, and technical controls to authorized staff.
 - 9.5.4. Ensure that the user accounts are unique and that any given user account logon ID and password combination is known only to the one employee for whom that account is assigned. For purpose of non-repudiation, it must always be possible to determine which employee performed a given action on a system housing the Data based solely on the logon ID used to perform the action.
 - 9.5.5. Ensure that only authorized users are capable of accessing the Data.

- 9.5.6. Ensure that an employee's access to the Data is removed immediately:
- a. Upon suspected compromise of the user credentials
 - b. When their employment or the contract under which the Data is made available to them is terminated
 - c. When they no longer need access to the Data to fulfill the requirements of the contract.
- 9.5.7. Have process to periodically review and verify that only authorized users have access to systems containing DSHS Confidential Information.
- 9.5.8. When accessing the Data from within the Contractor's network (the Data stays within the Contractor's network at all times), enforce password and logon requirements for users within the Contractor's network including:
- a. A minimum length of 8 characters with at least 3 of the following character classes: uppercase letters, lowercase letters, numerals, and special characters such as an asterisk, ampersand, or exclamation point.
 - b. That a password does not contain a user's name, logon ID, or any form of their full name.
 - c. That a password does not consist of a single dictionary word. A password may be formed as a passphrase which consists of multiple dictionary words.
 - d. That passwords are significantly different from the previous 4 passwords. Passwords that increment by simply adding a number are not considered significantly different.
- 9.5.9. When accessing Confidential Information from an external location (the Data will traverse the Internet or otherwise travel outside of the Contractor's network), mitigate risk, and enforce password and logon requirements for users by employing measures including:
- a. Ensuring mitigations applied to the system don't allow end-user modification.
 - b. Not allowing the use of dial-up connections.
 - c. Using industry standard protocols and solutions for remote access. Examples would include RADIUS and Citrix.
 - d. Encrypting all remote access traffic from the external workstation to Trusted Network or to a component within the Trusted Network. The traffic must be encrypted at all times while traversing any network, including the Internet, which is not a Trusted Network.
 - e. Ensuring that the remote access system prompts for re-authentication or performs automated session termination after no more than 30 minutes of inactivity.
 - f. Ensuring use of Multi-factor Authentication to connect from the external end point to the internal end point.
 - g. Passwords or PIN codes may meet a lesser standard if used in conjunction with another authentication mechanism, such as biometric (fingerprint, facial recognition, iris scan, etc.) or token (software, hardware, smart card, etc.) in that case:

- i. The PIN or password must be at least 5 letters or numbers when used in conjunction with at least one other authentication factor.
 - ii. Must not be comprised of all the same letter or number (i.e. 1111, etc.).
 - iii. Must not contain a “run” of 3 or more consecutive numbers (i.e. 1234, etc.).
- h. If the contract specifically allows for the storage of Confidential Information on a Mobile Device, passcodes used on the device must:
 - i. Be a minimum of six alphanumeric characters.
 - ii. Contain at least three unique character classes (i.e. upper, lower case, number).
 - iii. Not contain more than a three consecutive character run (i.e. 1234 or abc123).
- i. Render the device unusable after a maximum of 10 failed logon attempts.

9.6. Protection of Data The Contractor agrees to store Data on one or more of the following media and protect the Data as described:

- 9.6.1. **Hard disk drives.** For Data stored on local workstation hard disks, access to the Data will be restricted to Authorized User(s) by requiring logon to the local workstation using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards.
- 9.6.2. **Network server disks.** For Data stored on hard disks mounted on network servers and made available through shared folders access to the Data will be restricted to Authorized Users through the use of access control lists which will grant access only after the Authorized User has authenticated to the network using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards. Data on disks mounted to such servers must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism. For DSHS/County Confidential Information stored on these disks, deleting unneeded Data is sufficient as long as the disks remain in a Secured Area and otherwise meet the requirements listed in the above paragraph. Destruction of the Data as outlined in sub section 7.11 Data Disposition may be deferred until the disks are retired, replaced, or otherwise taken out of the Secured Area.
- 9.6.3. **Optical discs (CDs or DVDs) in local workstation optical disc drives.** Data provided by DSHS/County on optical discs which will be used in local workstation optical disc drives and which will not be transported out of a Secured Area. When not in use for contracted purposes, such discs must be locked in a drawer, cabinet, or other container to which only Authorized Users have the key, combination or mechanism required to access the contents of the container. Workstations which access DSHS Data on optical discs must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism.
- 9.6.4. **Optical discs (CDs or DVDs) in drives or jukeboxes attached to servers.** Data provided by DSHS/County on optical discs which will be attached to network

servers and which will not be transported out of a Secured Area. Access to Data on these discs will be restricted to Authorized Users through the use of access control lists which will grant access only after the Authorized User has authenticated to the network using a Unique User ID and Hardened Password or other authentication mechanisms which provide equal or greater security, such as biometrics or smart cards. Data on discs attached to such servers must be located in an area which is accessible only to authorized personnel, with access controlled through use of a key, card key, combination lock, or comparable mechanism.

- 9.6.5. **Paper documents.** Any paper records must be protected by storing the records in a Secured Area which is only accessible to authorized personnel. When not in use, such records must be stored in a secure area and/or locked container, such as a file cabinet, locking drawer, or safe, to which only authorized persons have access.
- 9.6.6. **Remote Access.** Access to and use of the Data over the State Governmental Network (SGN) or Secure Access Washington (SAW) will be controlled by DSHS staff who will issue authentication credentials (e.g. a Unique User ID and Hardened Password). Contractor will notify the County immediately whenever an Authorized User in possession of such credentials is terminated or otherwise leaves the employ of the Contractor, and whenever an Authorized User's duties change such that the Authorized User no longer requires access to perform work for this Agreement.
- 9.6.7. **Data storage on portable devices or media.** Except where otherwise specified herein, DSHS/County Data shall not be stored by the Contractor on portable devices or media unless specifically authorized within the terms and conditions of this Agreement. If so authorized, the Data shall be given the following protections:
 - a. Encryption must use a key length of at least 256 bits for symmetric keys, or 2048 bits for asymmetric keys. When a symmetric key is used, the Advanced Encryption Standard (AES) must be used if available.
 - b. Control access to devices with a Unique User ID and Hardened Password or stronger authentication method such as physical token or biometrics.
 - c. Manually lock devices whenever they are left unattended and set devices to lock automatically after a period of inactivity if this feature is available. Maximum period of inactivity is 20 minutes.
- 9.6.8. Apply administrative and physical security controls to Portable Devices and Portable Media by:
 - a. Keeping them in a Secure Area when not in use
 - b. Using check-in/check-out procedures when they are shared and
 - c. Taking frequent inventories.
- 9.6.9. When being transported outside of a Secure Area, Portable Devices and Portable Media with DSHS/County Confidential Information must be under the physical control of Contractor staff with authorization to access the Data, even if the Data is encrypted.

9.7. Data stored for backup purposes

- 9.7.1. DSHS/County Confidential Information/Data may be stored on portable media as part of a Contractor's existing, documented backup process for business continuity or disaster recovery purposes. Such storage is authorized until such time as that media would be reused during the course of normal backup operations. If backup media is retired while DSHS/County Confidential Information/Data still exists upon it, such media will be destroyed at that time in accordance with the disposition requirements in subsection 7.11 Data Disposition.
- 9.7.2. DSHS/County Data may be stored on non-portable media (e.g. Storage Area Network drives, virtual media, etc.) as part of Contractor's existing, documented backup process for business continuity or disaster recovery purposes. If so, such media will be protected as otherwise described in this Section. If this media is retired while DSHS/County Confidential Information still exists upon it, the data will be destroyed at that time in accordance with the disposition requirements in subsection 7.11 Data Disposition.
- 9.8. **Cloud Storage.** DSHS/County Confidential Information requires protections equal to or greater than those specified elsewhere within this exhibit. Cloud storage of Data is problematic as neither DSHS, the County, nor the Contractor have control of the environment in which the Data is stored. For this reason:
- 9.8.1. DSHS/County Data will not be stored on any consumer grade Cloud solution, unless all of the following conditions are met:
- a. Contractor has written procedures in place governing the use of the Cloud storage and the Contractor attests in writing that all such procedures will be uniformly followed
 - b. The Data will be encrypted while within the Contractor network
 - c. The Data will remain encrypted during transmission to the Cloud
 - i. The Data will remain encrypted at all times while residing within the Cloud storage solution.
 - ii. The Contractor will possess a decryption key for the Data, and the decryption key will be possessed only by the Contractor and/or the County and DSHS.
 - iii. The Data will not be downloaded to non-authorized systems, meaning systems that are not either the County, DSHS or Contractor networks.
 - iv. The Data will not be decrypted until downloaded onto a computer within the control of an Authorized User and within either the County, DSHS, or Contractor's network.
- 9.8.2. Data will not be stored on an Enterprise Cloud storage solution unless either:
- a. The Cloud storage provider is treated as any other Sub-Contractor and agrees in writing to all of the requirements within this exhibit, or
 - b. The Cloud storage solution used is FedRAMP certified
- 9.8.3. If the Data includes protected health information (PHI) covered by HIPPA, the Cloud provider must sign a Business Associate Agreement prior to Data being stored in their Cloud solution.

9.9. **System Protection.** To prevent compromise of systems which contain DSHS/County Data or through which that Data passes:

- 9.9.1. Systems containing DSHS/County Data must have all security patches or hotfixes applied within 3 months of being made available.
- 9.9.2. The Contractor will have a method of ensuring that the requisite patches and hotfixes have been applied within the required timeframes.
- 9.9.3. Systems containing DSHS/County Data shall have an Anti-Malware application installed.
- 9.9.4. Anti-Malware software shall be kept up to date. The product, its anti-virus engine, and any malware database the system uses, will be no more than one update behind current.

9.10. **Data Segregation**

- 9.10.1. DSHS/County Data must be segregated or otherwise distinguishable from non-DSHS/County data. This is to ensure that when no longer needed by the Contractor, all DSHS/County Data can be identified for return or destruction. It also aids in determining whether DSHS Data has or may have been compromised in the event of a security breach. As such, one or more of the following methods will be used for data segregation.
- 9.10.2. DSHS/County Data will be kept on media (i.e. hard disk, optical disc, tape, etc.) which will contain no non-DSHS/County Data and/or
- 9.10.3. DSHS/County Data will be stored in a logical container on electronic media, such as a partition or folder dedicated to DSHS/County Data and/or,
- 9.10.4. DSHS/County Data will be stored in a database which will contain no non-DSHS/County data and/or,
- 9.10.5. DSHS/County Data will be stored within a database and will be distinguishable from non-DSHS/County data by the value of a specific field or fields within database records.
- 9.10.6. When stored as physical paper documents, DSHS/County Data will be physically segregated from non- DSHS/County data in a drawer, folder, or other container.
- 9.10.7. When it is not feasible or practical to segregate DSHS/County Data from non-DSHS/County data, then both the DSHS/County Data and the non-DSHS/County data with which it is commingled must be protected as described in this Section.

9.11. **Data Disposition.** When the Agreement work has been completed or when the Data is no longer needed, except as noted in subsection 7.6.2 above, Data shall be returned to DSHS/County or destroyed. Media on which Data may be stored and associated acceptable methods of destruction are as follows:

Data stored on:	Will be destroyed by:
Server or workstation hard disks, or Removable media (e.g. floppies, USB flash drives, portable hard disks) excluding optical discs	Using a “wipe” utility which will overwrite the Data at least three (3) times using either random or single character data, or Degaussing sufficiently to ensure that the Data cannot be reconstructed, or

	Physically destroying the disk
Paper documents with sensitive or Confidential Information	Recycling through a contracted firm provided the contract with the recycler specifies that the confidentiality of Data will be protected, and the information destroyed through the process.
Paper documents containing Confidential Information requiring special handling (e.g. protected health information)	On-site shredding, pulping, or incineration
Optical discs (e.g. CDs or DVDs)	Incineration, shredding, or completely defacing the readable surface with a course abrasive
Magnetic tape	Degaussing, incinerating or crosscut shredding

9.12. **Notification of Compromise or Potential Compromise.** The compromise or potential compromise of DSHS/County shared Data must be reported to the County and to the DSHS Contact designated in the Contract within one (1) business day of discovery. If no DSHS Contact is designated in the Contract, then notification must be reported to the DSHS Privacy Officer at dshsprivacyofficer@dshs.wa.gov. The Contractor must also take actions to mitigate the risk of loss and comply with any notification or other requirements imposed by law or by DSHS/County.

9.13. **Data shared with Subcontractors.** If DSHS Data provided under this Contract is to be shared with a subcontractor, the Contract with the subcontractor must include all of the data security provisions within this Contract and within any amendments, attachments, or exhibits within this Contract. If the Contractor cannot protect the Data as articulated within this Contract, then the contract with the sub- Contractor must be submitted to the DSHS Contact specified for this contract for review and approval.

9.14. **Breach of Section 9. Information System Security and Protection of Personal Information:** Any breach of this Section may result in termination of the Agreement and the demand for return of all records in connection with this Agreement. The Contractor agrees to indemnify and hold harmless Thurston and Mason Counties and the state of Washington for any damages related to the Contractor's unauthorized use or disclosure of personal information.

10. Amendments and Changes in Work

10.1. In the event of any errors or omissions by the Contractor in the performance of any work required under this Agreement, the Contractor shall make any and all necessary corrections without additional compensation. All work submitted by the Contractor shall be certified by the Contractor and checked for errors and omissions. The Contractor shall be responsible for the accuracy of the work, even if the work is accepted by the County.

10.2. No amendment, modification or renewal shall be made to this Agreement unless set forth in a written Agreement Amendment, signed by an authorized representative of each party. Work under an Agreement Amendment shall not proceed until the Agreement Amendment is duly executed by the County.

11. Hold Harmless and Indemnification

11.1. To the fullest extent permitted by law, the Contractor agrees to indemnify, defend and hold the State of Washington and Thurston and Mason Counties, their elected and appointed officers, officials, employees, agents and volunteers, harmless from and against any and all "Claims" by any and all persons or entities which (1) are caused in whole or in part by any

act or omission, negligent or otherwise, of the Contractor, its employees, former employees, agents, representatives, volunteers, partners, shareholders, subcontractors in any tier or anyone for whose acts any of them may be liable, or (2) are directly or indirectly arising out of, resulting from, or in connection with the performance or failure to perform under this Agreement. This indemnification obligation of the Contractor shall not apply in the limited circumstance where the Claims are caused by the sole negligence of the County. STATEMENT OF WORK
INDIVIDUAL SUPPORTED EMPLOYMENT (ISE) ADDENDUM
Exhibit B

The services to be performed by the Contractor under this Agreement as described in Section 4 of this Agreement are set forth as follows:

1. Service Definition

Individual Supported Employment (also referred to as “Individual Employment” or “IE”) services are part of an individual’s pathway to employment and shall be tailored to the individual’s needs, interests and abilities and promote career development. These services are necessary to help individuals with developmental disabilities obtain and continue competitive, integrated employment within the community that meets HCBS settings requirements. The individual must be compensated at or above the state’s minimum wage, using the higher of the Federal, state or local rate and at a rate comparable to the wage paid to non-disabled workers performing the same tasks, including receiving the same benefits and opportunities for advancement. Services provided by the Contractor may include tasks such as intake, discovery, assessment, job preparation, job marketing, job supports and record keeping as required to assist a client in obtaining and maintaining a job. The level of services provided will align with a client’s demonstrated need, acuity, and service level as stated in their PCSP.

2. Service Requirements

- 2.1. Clients engaged in an Individual Employment program shall be supported by the Contractor to work towards a living wage. A living wage is the amount needed to enable an individual to meet or exceed his/her living expenses. Clients should be supported to average twenty (20) hours of work per week or eighty-six (86) hours per month. However, each client’s preferred hours of employment must be taken into consideration. The amount of service supports a client receives shall be determined by the client’s demonstrated need, acuity level, available service hours as assessed by DDA and the client’s individual work history.
- 2.2. The Contractor shall work collaboratively with each client to develop an Individualized Work Plan (IWP) within 60 days from the initial date of service authorization. Signed copies of the IWP shall be submitted to the County and DDA Case Resource Manager within 60 days of service authorization and annually, in accordance with the Contractor’s agreed IWP annual timeframe. Each IWP shall contain:
 - a. Client-centered SMART (Specific, Measurable, Attainable, Relevant, Time-bound) goals
 - b. Client’s individual skills, gifts, interests, preferred activities
 - c. Measurable goals, action steps, strategies, and activities
 - d. Client’s current employment data
 - e. Client’s career, hourly wage, and weekly hour goals
 - f. Information regarding accommodation, equipment and supports the client will need to be successful
 - g. Employment/workplace safety considerations specific to the needs of the client

- h. A summary of the client's previous year's goals and accomplishments
 - i. The names of individuals who participated in the creation of the IWP
 - j. Signatures from the client and client's guardian/representative, if applicable
- 2.3. The Contractor shall work collaboratively with each client to develop a semi-annual progress report, due by month 7 of a 12-month period. Semi-annual progress reports will summarize progress made toward achieving the goals identified in the IWP and outline any additional or new strategies to assist the client in achieving identified goals. The Contractor shall incorporate feedback from the client, guardian(s), job site supervisor and any other employment team members and submit the report to the County and DDA Case Resource Manager upon completion. Semi-annual progress reports shall contain the following information:
 - a. Current employment data
 - b. Current SMART goals
 - c. Information regarding the achievement/completion of previously defined goals or progress made toward achieving goals
 - d. New SMART goals, as appropriate
 - e. Information regarding the date and method of communication used to discuss the Progress Report with the client
- 2.4. If a client participating in Individual Employment Services has not obtained paid employment at minimum wage or higher within six months, the Contractor will ensure that the following steps are taken:
 - 2.4.1. Conduct a review of the progress toward employment goals.
 - 2.4.2. Consult with the client and the client's guardian, if applicable.
 - 2.4.3. Develop additional/new strategies that may include providing technical assistance, changing to a new provider, and/or providing additional resources necessary to support the individual's pursuit of employment. The additional/new strategies will be documented in the Individual Work Plan or Progress Report and submitted to the client, County, and the client's DDA Case Resource Manager.
- 2.5. If, after twelve months from the initial date of service authorization a client remains unemployed, an additional review shall be conducted. The Contractor will address the steps outlined in the previous six-month Individual Work Plan/Progress Report.
- 2.6. After nine (9) months of participation in Individual Supported Employment activities, a client may request to participate in Community Inclusion in addition to or instead of Individual Supported Employment.
- 2.7. Client maximum service hours shall correlate with the County Service Authorization and/or annual PCSP created and updated by the client's DDA Case Resource Manager. Record keeping hours exceeding three (3) hours must be approved by the County prior to incurring charge. In the event that a client's employment support needs have changed, and additional service hours are needed, the Contractor shall use the *Request for Additional Service Hours* form to formally communicate a request to the County and the DDA Case Manager. Additional service hours will only be reimbursed by the County

when both the County and DDA have approved the request. All service hour adjustments shall be carried out in accordance with the *Thurston-Mason Guidelines Request for Additional Service Hours* and with DDA's policy regarding additional service hours.

- 2.8. All clients shall be contacted by the Contractor at least once per month and any communication with clients shall be documented in Contractor's client database and/or in client's electronic or physical file.
- 2.9. Individual Employment staff hours must be attributed to the [*Individual Employment Billable Activities and Phases*](#) located on DDA's "County Best Practices" website.
- 2.10. All annual and amended PCSPs received by the client's DDA Case Resource Manager are required to be signed by the Contractor and returned to the DDA Case Resource Manager with-in 10 calendar days. By signing the PCSP, the Contractor acknowledges that they have received a copy of the assessment, are aware of the client's supports and needs and are aware of the duties assigned to them. The County does not expect a Contractor to sign a PCSP in which they are assigned to tasks they do not believe they can perform.

3. Contractor Performance Plan requirement

The Contractor will develop a written Agency Performance Report that will have two components: a Contract Year Performance Plan and a Performance Detail Report. The Contract Year Performance Plan describes objectives, expected outcomes, and how and when the objectives will be accomplished. This component will be developed annually to establish broad goals and objectives for the contract period. The Performance Detail Report will accompany this plan and will be populated with new data quarterly (every three months). Reports will be sent to ddreports@co.thurston.wa.us.

- 3.1. The Contract Year Performance Plan shall include an analysis of the Contractor's performance over the previous reporting period including changes in service delivery, challenges identified and suggestions for new strategies to increase employment outcomes. The County Performance Report Template shall be utilized for report submission.
- 3.2. The quarterly Performance Detail Report shall include the following information:
 - 3.2.1. For clients employed within the time period covered by the report:

 - a. **By acuity** – Months unemployed, reasons for continued unemployment, follow up steps.

4. Agency as Employer

For Individual Employment placement where the service provider is also the Client's employer, long term funding will remain available to the service provider employer **for six months after the client's date of hire**. At the end of the six-month period, if the client continues to need support on the job, another service provider who is **not** the employer of record must provide the support unless the County issues an exception. The Contractor/Employer must submit a request for exception to the

Agency as Employer policy in writing on the County's *Agency as Employer* form. The request must include initial client goals, goals achieved to date and include new long-term goals for the client. All approvals by the County will be communicated to the Contractor on the request form.

- 4.1. If the County approves the continuation of long-term supports where the service provider is also the client's employer, a semi-annual review will be conducted by the County and a new written exception request from the Contractor will be required.
 - 4.2. If the continuation of *Agency as Employer* is not approved by the County, the Contractor **must** assist the client in developing alternative goals and in obtaining new employment opportunities in the community. This may include referring the client to DVR for additional services.
5. Client/service documentation in the client file shall be reviewed and updated, at a minimum, on an annual basis and include both safety protections/plan per the standards of the environment in which the client is working and/or receiving services, as well as accommodations put into place specific to the client's need.
6. Service termination shall occur after all parties, including the client, Contractor, County and DDA Case Resource Manager, are aware and agree to the closure of the service. The Contractor shall follow the Thurston-Mason County Guidelines: *Service Termination*, to end services.
7. All employment-related services must adhere to the Home and Community Based settings (HCBS) requirements of 42CFR 441 530(a)(1).
