MEMORANDUM

August 08, 2019

Schelli Slaughter,
Director

Rachel C. Wood, MD, MPH
Health Officer

TO: Scott McCormick, Thurston County Community Planning & Economic Development

FROM: Amy Crass, Thurston County Environmental Health Division *AC*

SUBJECT: Project 2019103224, Folder Sequences 19-108060 XK (19-108472 XL), Tax Parcel 13936340700, Veloni Joint Aquatic Resources Permit Application (JARPA)

The above-referenced project has been routed to this office for review and comment. The application is requesting an after the fact approval for the replacement of a concrete block retaining wall and the installation of new siding and a roof to the existing boathouse. The property is served by a single-family well and an existing on-site septic system. The block wall was installed in order to increase/maintain bank stabilization. The wall is in the same footprint as the original wall. The new roof and siding on the boat house are intended to improve weathering functions and maintain the life of the structure. Construction and demolition of the project was completed manually with hand tools or like equipment. Demolition materials were hauled off-site except for some of the brick blocks remaining on the deck adjacent to the boat house.

Environmental Health's review of the project is complete and the proposal appears to meet the requirements of the Thurston County Sanitary Code. Therefore, **Environmental Health approval of this application is recommended.** If you have any questions regarding Environmental Health's review of this application, I can be reached at (360) 709-3049.
