---

Hi Abbie,

Thank you for the opportunity to review the proposal onsite. The wall appears to be consistent with the SMP and CUP criteria in WAC 173-27-160. I got in touch with Zach Meyer. He said his site visit request was to initiate a general discussion for the permit and he did not have any specific concerns.

For projects like this, Ecology might advise some mitigation as way to meet criterion (d), "the proposed use will cause no significant adverse effects to the shoreline environment." However, the replacement wall did not appreciably increase the development footprint or cause significant environmental impacts. Furthermore, opportunities for meaningful mitigation are limited to the ivy-covered bluff, but as the consultant points out, removing the ivy would likely destabilize the 80% slope.

Let me know if any questions come up on this one.

Thanks again,  
Lizzie

Hey Lizzie,

Here is a [link](#) to the Geotech report as discussed.

I look forward to hearing any comment or concerns from Ecology.

Let me know if you have any questions.

Thank you,

---
