Dear Mr. McCormick,

Our neighborhood is critically impacted by the proposed Aurora Oaks Planned Residential Development. Not only will it add stress to the McCallister Springs water resource, but exponentially increase air and noise pollution with so much additional traffic.

More importantly the influx and density of population in our area would seriously challenge the local schools. Our educators are already facing huge financial problems trying to secure our current safety standards for bus routes.

Please consider the overall damage to our asphalt surface roadway and underground utilities that would be inevitable with the actual construction that would take place. Because we live in a full old growth forest, removing the heavily rooted trees to make way for underground utilities would hardly be cost effective as compared to meadow lands. Please feel free to contact us at 360-742-4031, or on line at rsorca@comcast.net. Thank you for your considerations on this matter.

Respectfully,
Sherry and Richard
