Brett,

I represent Mark Conwell, the underlying applicant for this project. It was stalled for some time awaiting resolution of Marvin Road corridor traffic planning, and my client would now like to move forwards. In checking status using the online lookup I see that the assigned reviewer is still Tony Kantas whom I know is no longer with the County. Would you be able to let me know the name of the new CPED reviewer for this project so I can follow up directly?

Kevin,

Would you be able to tell me the current status of the intersections impacted by the Marvin Road “white paper” and the County’s “reserve capacity” fee? It is my understanding that the OTP developer is constructing improvements now at Mullen/Marvin and 25th and Marvin per their approvals, and that the Union Mills and 19th Ave SE improvements are or will be funded with the current TIP, which would appear to address all of the deficient intersections in the corridor. Is that understanding correct?

Thanks in advance to both of you for your assistance.

Best,

Heather
