

# FREE Dumpster Program for Neighborhoods & HOAs

*Note: This is a one time per pond offer -- available only once in the pond life.*

## To be eligible for the program:

- The stormwater pond (wet or dry) must be located within Thurston County and outside of Lacey, Tumwater, and Olympia city limits.
- The stormwater pond must meet the maintenance threshold as outlined in the maintenance checklist.
- There will be an initial site inspection to be performed by a Water Resources Specialist to confirm maintenance needs and the vegetation type to be removed from the stormwater pond.
- If approved, Thurston County's Stormwater Utility will coordinate the delivery and pick-up of the dumpster to your stormwater pond.
- A representative from the neighborhood must be available for the dumpster delivery to ensure that the driver places the dumpster in the correct location.
- LeMay/Pacific Disposal will deliver and pick-up the dumpster. The dumpster can remain at the site for up to 10 days, allowing for work to be completed over two weekends if needed.
- ONLY materials coming from the pond cleanout are allowed in the dumpster. Absolutely no hazardous wastes or household items will be accepted. The HOA or neighborhood representative will be responsible for all costs associated with non-allowed materials.
