# Thurston County A & C. S. HABITAT CONSERVATION PLAN

### **4 STEPS TO ESTIMATE MITIGATION FEE FOR YEAR-ROUND PERMITTING**

#### **Total the Acres Impacted by Project**

Include all soil disturbance (grading & fill, hard surfaces, structures, driveways, utilities, drinking well, septic system, and drain fields).

• Note: A standard single-family residence will impact a fraction of an acre.

#### Look Up Species Mapped on Property

Go to the <u>county's online permitting map</u>, find the project property by address or parcel number, then go to the HCP section, check all the boxes in the section. Find and note:

- Service area (TPG, YPGS, YPGE, YPGN, OPG, TCB, OVS) TABLE 1
- MPG Soil type (More Preferred or Less Preferred) TABLE 2
- MPG Area (Occupied, near or unknown) –TABLE 2

### Find Habitat Value & Cost per Credit

Use species information from Step 2 to find credit value of habitat and cost for impacting an acre from Tables 1 & 2 below. Note what you find in step 4.

### Fill in the Blanks to Estimate Credits Needed & Mitigation Fee

Impact area (sq ft or acre	es From Step 1	x Habitat Value	From Table 2	=	Credits Needed
Conversion: 43,56	0 sq feet = 1 acre				Mitigation
Cost per Credit	From Table 1	x Credits Needed	From line above	-	Mitigation Fee Estimate

TABLE 1 Cost for impacting one acre of ESA*-protected habitat						
Service Area (by species)	TPG	YPG S	YPG E	YPG N	OPG	
Estimated Credit Cost per Sq Ft	\$0.30	\$0.34	\$0.40	\$0.47	\$1.18	
Estimated Credit Cost per Acre	\$12,910	\$14,644	\$17,137	\$20,215	\$51,111	
Subspecies Location Acronym Tenino Pocket Yelm Pocket Gopher South, East or North Olympia Pocket Gopher						
*ESA=Endangered Species Act (federal law)						

TABLE 2 MPG Credit Value of ESA*-protected habitat						
AREA	SOILS					
AREA	More Preferred	Less Preferred				
1-Occupied	1.6	1.6				
2-Near Occupancy	1.55	1.35				
3-Suitable habitat	1.2	0.75				
*ESA=Endangered Species Act (federal law)						

#### Avoid

Site the project outside

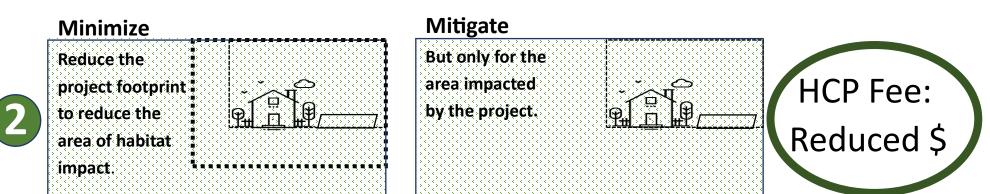

of Endangered Species Act protected habitat.

ESA protected habitat

#### Impact Area = 5,000 ft<sup>2</sup> (0.12 acres)

## Mitigation Fee Range (based on 5,000 sf of impact to ESA-protected habitat.)

Service Area (by species)	TPG	YPG S	YPG E	YPG N	OPG
Lowest	\$1,111	\$1,261	\$1,475	\$1,740	\$4,400
Highest	\$2,371	\$2,689	\$3,147	\$3,713	\$9,387
