

COVID-19 Testing Locations

There are many locations in Thurston County offering COVID-19 testing. Some locations have drive-through or walk-up testing services while others offer appointments in their clinics. Since every location handles testing differently, **please call** ahead of time.

We encourage anyone seeking testing to contact their health care provider first. Many local providers are offering COVID-19 testing to their patients.

Who should be tested for COVID-19? Use the CDC Self-Checker tool: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/coronavirus-self-checker.html>.

- People who have [symptoms of COVID-19](#).
- People who have come into close contact with someone with COVID-19 should be tested to check for infection:
 - [Fully vaccinated people](#) should be tested 5-7 days after their last exposure.
 - People who are not fully vaccinated should get tested immediately when they find out they are a close contact. If their test result is negative, they should get tested again 5-7 days after their last exposure or immediately if symptoms develop.
- People not fully vaccinated with COVID-19 vaccine who are prioritized for expanded [community screening](#) for COVID-19.
- People who have been asked or referred to get testing by their healthcare provider, state, tribal, or local health department.

While awaiting test results, stay home and away from others to prevent the spread of COVID-19 at your home and in the community. For more information about COVID-19 visit: <http://bit.ly/ThurstonCOVID-19>
