ADDITIONAL COMMENTS AND NOTES

Thurston County (Lower Chehalis Watershed)

HOW TO SUBMIT COMMENTS

Comments include corrections or clarifications pertaining to misspellings, labeling, and/or missing information on flood maps. This information will be reviewed and changes will be made as appropriate. Send comments, by mail or email, to your community contacts listed below, and the Region X Service Center (if emailing) at regionxhelpdesk@starr-team.com.

HOW TO SUBMIT APPEALS

1. In order to file an appeal, you will need to include the following:
 - a. Information indicating that the elevations and/or delineations are scientifically and/or technically incorrect.
 - b. Scientific and technical data as well as mapping which demonstrate that alternative methods or applications result in more correct estimates of Base Flood Elevations.
2. To file your appeal, please submit a signed letter with the corresponding technical information to your respective jurisdiction and FEMA (see addresses above). Comments and appeals are due by the end of the 90-day appeal period (exact appeal period timing to be determined, but currently estimated to start in November and conclude in February 2019).

If your local government deems the information appropriate, local officials will review and submit the information formally to FEMA. If you are an owner or lessee of real property within the aforementioned jurisdictions, you may submit appeals directly to FEMA at rsc10@starr-team.com, as desired.

For questions or additional information, please contact the Region X Service Center at rsc10@starr-team.com or 425-329-3679.
