

HEALTH OFFICER DIRECTIVE

WHEREAS, on January 21, 2020, the first case of novel coronavirus disease (COVID-19, caused by the SARS-CoV-2 virus) was confirmed in a person from Washington, who had traveled from China; and

WHEREAS, by the end of February 2020, multiple counties had increasing cases of COVID-19 reported; and

WHEREAS, on February 29, 2020, Governor Jay Inslee proclaimed a state of emergency within the State of Washington due to COVID-19; and

WHEREAS, on March 11, 2020, the World Health Organization declared a state of pandemic due to COVID-19; and

WHEREAS, on March 11, 2020, the first case of COVID-19 was confirmed in a Thurston County resident; and

WHEREAS, on March 13, 2020, President Donald Trump declared a National Emergency due to COVID-19, and on March 22, 2020 a Major Disaster was declared for the State of Washington; and

WHEREAS, on March 23, 2020, Governor Inslee imposed a “Stay Home – Stay Healthy” Order throughout Washington State prohibiting all people in Washington State from leaving their homes or participating in social, spiritual, and recreational gatherings of any kind regardless of the number of participants, and all non-essential businesses in Washington State; and

WHEREAS, on May 4, 2020, Governor Inslee issued a Proclamation modifying his “Stay Home – Stay Healthy” Order, with a phased-in approach to re-open Washington, which will increase the number of Thurston County residents and frequency of their encounters with non-household members, and will increase their risk of exposure to persons with infectious COVID-19; and

WHEREAS, on May 27, 2020, Thurston County was approved to move into phase 2 of the recovery plan and need to maintain the conditions that made them eligible to move to phase two in order to stay in phase 2 and advance to phase 3; and

WHEREAS, on May 27, 2020, an outbreak in a long-term care facility is under investigation; and

WHEREAS, the age, condition, and health of a significant portion of the population of Thurston County and its local cities and towns places it at risk for serious health complications, including death, from COVID-19; and

WHEREAS, a large surge in the number of persons with serious infections can compromise the ability of the regional healthcare system to deliver necessary healthcare to the public; and

WHEREAS, individuals can be infected and contagious before or even without developing symptoms (pre-symptomatic and asymptomatic), and the evidence suggests a significant number of infections may be transmitted in this manner; and

WHEREAS, the United States Centers for Disease Control and Prevention (“CDC”) confirmed that a significant number of individuals who are infected remain asymptomatic and that as many as 25 percent of these individuals may contribute to transmission of the SARS_CoV-2 virus; and

WHEREAS, one key transmission method for COVID-19 is respiratory droplets that individuals expel when they breathe, talk, cough or sneeze; and

WHEREAS, the CDC recommended that members of the public should cover their noses and mouths with a cloth face covering to prevent inadvertently spreading COVID-19 while interacting with others outside their homes in public settings where other social distancing measures are difficult to maintain;

WHEREAS, on April 7, 2020, The Thurston County Health Officer issued recommendations on wearing face covers, stating that: “Masking can protect others around you, in case you are infected and do not have symptoms or are just coming down with symptoms” The mask could help by blocking infectious droplets from spreading when someone with the infection coughs, sneezes or speaks; and

WHEREAS, there is a national shortage of medical grade masks, surgical masks, and N-95 respirators that are critically needed for healthcare providers who are on the front lines working to protect all of us, and health officials are increasingly urging non-medical workers to wear non-medical grade cloth face coverings to help curb the spread of COVID-19; and

WHEREAS, workers of certain essential businesses and other frontline employees must be protected because they face greater exposure and risk of contracting COVID-19 due to their frequent in person contact with members of the public and inability to work from home and widespread mask use may decrease the risk of spread from someone with unrecognized infection; and

WHEREAS, there is a long history of racism and discriminatory policies that Native, People of Color, immigrant and refugee, LGBTQ communities, homeless, victims of domestic violence, and other marginalized communities have faced in Washington state that may impact an individual’s ability to feel safe while wearing a face covering; and

WHEREAS, Thurston County government is dedicated to providing all its residents with fair and equal access to services, opportunities, and protection; inviting and encouraging public engagement; and reflecting consideration for cultural differences; and

WHEREAS, the Revised Code of Washington, Title 70.05.070(2)-(3), requires and empowers the local health officer to take such action as is necessary to maintain health and to control and prevent the spread of any contagious or infectious diseases within the jurisdiction; and

WHEREAS, the Washington Administrative Code, Title 246-100-036, requires the local health officer, when necessary, to institute disease control measures as he or she deems necessary based on his or her professional judgment, current standards of practice, and the best available medical and scientific information; and

Based upon the above, as the Local Health Officer, I hereby find that directing the population of Thurston County to wear face coverings in certain public places is reasonable and conducive to maintain health and to the control and prevention throughout Thurston County of COVID-19, a contagious and infectious disease.

EFFECTIVE on May 28, 2020, as the Local Health Officer, I hereby **DIRECT** as follows:

FACE COVERING DIRECTIVE

A. All individuals must wear face coverings over their noses and mouths except when eating or drinking when they will be at (1) indoor public settings, or (2) outdoor public locations and cannot maintain distancing of approximately six feet from another individual who does not share their household. At this time, because it is still important to conserve medical-grade or N95 respirators for health care workers, unless a particular health reason requires it, individuals should use fabric coverings, such as cloth face masks, scarves and bandana coverings or other material as recommended by CDC. Cloth face masks must be worn properly in order to avoid contaminating the hands or face of the user. Before putting on a mask and after removing a mask, an individual should clean their hands with alcohol-based hand rub or soap and water and change masks when moist and wash after use. While in use, avoid touching the mask. Worn masks may be contaminated with infectious agents.

B. The following individuals do not need to comply with this Directive:

1. Any child aged three years or less;
2. Any child aged 4-12 years unless parents and caregivers supervise the use of face coverings by children to avoid misuse;
3. Any individual who has any type of disability that prevents them from comfortably wearing or removing a face covering;
4. Any individual who is deaf and uses facial and mouth movements as part of communication;
5. Any individual who has been advised by a medical, legal, or behavioral health professional that wearing a face covering may pose a risk to that individual;
6. Any individual who has trouble breathing or is unconscious, incapacitated, or otherwise unable to remove the face covering without assistance.

C. This Directive applies to any indoor public setting or outdoor public location where a person will be in within six feet of another individual, who does not share the same household, and includes, but is not limited to the following sectors:

1. Groceries, pharmacies, and other retail that sells food and beverage products, including but not limited to grocery stores, corner stores and convenience stores (including liquor stores), farmers' markets, food banks, farm and produce stands, supermarkets, big box stores that sell groceries and essentials and similar food retail establishments.
2. Commercial retail stores that supply essential sectors, including convenience stores, pet supply stores, auto supplies and repair, hardware and home improvement, garden stores and nurseries that support food cultivation and production, office supply stores that support working-from-home, and home appliance retailers.

3. Restaurant carry-out and quick-serve food operations – including food preparation, carry-out, and delivery food employees.
4. Cannabis retail and dietary supplement retail stores.
5. Tobacco and vapor sellers.
6. Buses, light rail, and other forms of public transportation.

D. Nothing in this Directive reduces or eliminates the requirements imposed by Directives and Orders from the Local Health Officer, Governor, or other regulatory local, state, or federal agency including employer specific directives from the Washington State Department of Labor and Industries.

E. Face covering use does not replace the need to practice physical distancing (staying away from ill people, staying home and avoiding all non-essential activities and contact with others), frequent handwashing, and avoiding touching of the face;

F. Violation of this Directive does not create grounds for residents or law enforcement to stop, detain, issue a citation, arrest, intimidate, or harass individuals who do not comply with it. This Directive may and should be used to educate, encourage, and persuade individuals to wear face coverings.

G. All commercial establishments in Thurston County are directed to post signage advising individuals to wear face coverings on the premises.

I strongly urge all people in Thurston County to support the health and well-being of the community by complying with this Directive without delay.

This **Directive** shall **EXPIRE** upon determination by the Local Health Officer that there is no longer a need for face coverings due to COVID-19.

Signed and directed this 27th day of May 2020, in Olympia, Washington, by

Diana T. Yu, MD, MSPH
Acting Local Health Officer
Thurston County
